The name earth was given by the older chemist to all substances that remained unchanged by fire lime, magnesia, strontium, and baryte were found to have alkaline reactions and were called alkaline earths. The alkaline earth metal include magnesium, calcium, strontium and barium. Magnesium sulphate is used as a purgative in medicine, in sizing and loading paper, silk and cotton. It is also used in dyeing and fire proofing chemicals, tanning and weighting leather. It may be used in the manufacture of paints and soaps. There are few organised and unorganised sectors manufacturer of magnesium sulphate. There is a less demand of magnesium sulphate as fertiliser. Most of the demand is fulfilled by our own manufacturers. Any new entrepreneur can well venture into this field.
