

Production and Processing of Turpentine Oil.

Fractionation of Turpentine Oil

Introduction

Turpentine (also called spirit of turpentine, oil of turpentine, wood turpentine and colloquially turps) is a fluid obtained by the distillation of resin obtained from live trees, mainly pines. It is mainly used as a solvent and as a source of materials for organic synthesis. Turpentine is composed of terpenes, mainly the monoterpenes alpha-pinene and beta-pinene with lesser amounts of carene, camphene, dipentene, and terpinolene.

Turpentine oil is made from the resin of certain pine trees. It is used as medicine. Turpentine oil is a multicomponent mixture of turpene hydrocarbons, and its composition depends to a great extent on the nature of the raw material. Turpentine oil is widely used in industry as a solvent for varnishes and paints and as a raw material in the production of camphor, terpin hydrate, Flotation Oil, lubricating oils, insecticides, and perfumes. In medicine, turpentine oil is used in a preparation that acts as a local stimulant, anesthetic, and antiseptic. It is used externally in ointments for neuralgia and myositis.

Turpentine oil works as a feedstock chemical in the manufacture of flavorings, pinenes, pine oil, polymer additives and fragrances. It is also used as a commercial source of fuel and as an alternative of fossil fuels in a broad range of applications such as furnaces, rocket fuels and industrial boilers. Turpentine oil has a low heating coefficient ranging between 16,000 & 18,000 Btu/lb as compared to other fossil fuels such as gasoline, diesel, butane and propane.

Turpentine oil is one of the major product that exported from India. The global turpentine oil market is foreseeing maximum growth potential due to rapid increase in the demand for environment friendly products coupled with increase in consumption of household and personal care products. In addition, rise in manufacture of several chemical products which are widely used as fragrance agents, flavoring agents and solvents are some other major factors driving the growth of global turpentine oil market. However, factors such as decrease in production of paper, easy availability of cheaper petroleum products as well as low recovery of turpentine from Kraft wood process are some of the major aspects hindering the growth of turpentine oil market.

Turpentine oil market is classified based on product type, application and geography. Different product types of turpentine oil market include camphene, limonene, alpha-pinene, beta-pinene and others. On the basis of application, turpentine oil market is segmented as paints & inks, camphor, aromatic chemicals, adhesives and others. Based on geography, market is divided into North America, Latin America, Europe, Asia-Pacific and Middle East & Africa.

Major Queries/Questions Answered in the Report?

- 1. What is Turpentine Oil Fractionation industry ?**
- 2. How has the Turpentine Oil Fractionation industry performed so far and how will it perform in the coming years ?**
- 3. What is the Project Feasibility of Turpentine Oil Fractionation Plant ?**
- 4. What are the requirements of Working Capital for setting up Turpentine Oil Fractionation plant ?**

- 5. What is the structure of the Turpentine Oil Fractionation Business and who are the key/major players ?**
- 6. What is the total project cost for setting up Turpentine Oil Fractionation Business?**
- 7. What are the operating costs for setting up Turpentine Oil Fractionation plant ?**
- 8. What are the machinery and equipment requirements for setting up Turpentine Oil Fractionation plant ?**

9. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up Turpentine Oil Fractionation plant ?

10. What are the requirements of raw material for setting up Turpentine Oil Fractionation plant ?

11. Who are the Suppliers and Manufacturers of Raw materials for setting up Turpentine Oil Fractionation Business?

12. What is the Manufacturing Process of Turpentine Oil ?

- 13. What is the total size of land required for setting up Turpentine Oil Fractionation plant ?**
- 14. What will be the income and expenditures for Turpentine Oil Fractionation Business?**
- 15. What are the Projected Balance Sheets of Turpentine Oil Fractionation plant ?**
- 16. What are the requirement of utilities and overheads for setting up Turpentine Oil Fractionation plant?**
- 17. What is the Built up Area Requirement and cost for setting up Turpentine Oil Fractionation Business?**

18. What are the Personnel (Manpower) Requirements for setting up Turpentine Oil Fractionation Business?

19. What are Statistics of Import & Export for Turpentine Oil?

20. What is the time required to break-even of Cement Turpentine Oil Fractionation Business?

21. What is the Break-Even Analysis of Turpentine Oil Fractionation plant?

22. What are the Project financials of Turpentine Oil Fractionation Business?

- 23. What are the Profitability Ratios of Turpentine Oil Fractionation Project?**
- 24. What is the Sensitivity Analysis-Price/Volume of Turpentine Oil Fractionation plant?**
- 25. What are the Projected Pay-Back Period and IRR of Turpentine Oil Fractionation plant?**
- 26. What is the Process Flow Sheet Diagram of Turpentine Oil Fractionation project?**

- 27. What are the Market Opportunities for setting up Turpentine Oil Fractionation plant?**
- 28. What is the Market Study and Assessment for setting up Turpentine Oil Fractionation Business?**
- 29. What is the Plant Layout for setting up Turpentine Oil Fractionation Business?**

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Fractionation of Turpentine Oil.” provides an insight into Turpentine Oil Fractionation market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Fractionation of Turpentine Oil project. The report assesses the market sizing and growth of the Indian Turpentine Oil Fractionation Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Turpentine Oil Fractionation sector in India along with its business prospects. Through this report we have identified Turpentine Oil Fractionation project as a lucrative investment avenue.
