

Production of Bamboo Toothbrush. Eco-Friendly Toothbrushes. Small Manufacturing Business Ideas.

Introduction

Plant-based bamboo toothbrush with all components made from plant: bristles, handle, wrapper and box. Compostable packaging. Brush with Bamboo makes the world's most eco-friendly toothbrushes made with the highest quality standards. Each bamboo toothbrush replaces a non-biodegradable plastic toothbrush. The toothbrush is an oral hygiene instrument used to clean the teeth, gums, and tongue.

It consists of a head of tightly clustered bristle, atop of which toothpaste can be applied, mounted on a handle which facilitates the cleaning of hard to reach areas of the mouth. They are usually used alongside floss. They are available with different bristle textures, sizes, and forms. Most dentists recommend using a soft toothbrush since hard-bristled toothbrushes can damage tooth enamel and irritate the gums

Types of toothbrush

- **Electric toothbrush**
- **Interdental brush**
- **Sulca brush**
- **End-tuft brush**
- **Chewable toothbrush**

Market Outlook

Compostable toothbrush market will grow in the future owing to the rising awareness of plastic pollution and which is becoming one of the reason for the consumers to reconsidering their everyday choices. Brushing teeth has been a part of daily routine from so long that consumers are thinking about compostable toothbrushes. Compostable toothbrushes are not generally fully compostable as their bristles are made up of nylon, however their stick is made up of bamboo. Bamboo toothbrushes are quickly becoming a staple in many households, not only because they're naturally antimicrobial, but also because of their eco-friendliness and biodegradability. A bamboo toothbrush will naturally decompose after it is been disposed of. In the over-polluted world, switching over to bamboo toothbrushes is so crucial and which is one of the reason of the growth of compostable toothbrush market.

During the forecast period. Globally, health and hygiene and wellness industries is likely to push market for compostable toothbrush. The emerging economies are expected to create significant demand for compostable toothbrush as there are lot of government regulations on the usage of plastics which is driving the growth of compostable toothbrushes. The compostable toothbrush market is expected to grow at a significantly high growth rate due to the increasing population and changing habitats. China and India's developing market is expected to have a positive impact on the growth of the compostable toothbrush market. North America is a growing market due to new Act and FDA regulations for the biodegradable products which is likely to boost the compostable toothbrush market.

The Global Bamboo Toothbrush Market to grow from USD 525.8 million in 2018 to USD 842.1 Million by 2024 at a CAGR of 7%. With 3.5 billion toothbrushes being sold each year,

the bamboo toothbrush market has a wide scope for expansion, especially considering that the global toothbrush market is reaching maturity. With numerous anti-plastic legislation being promulgated in various countries along with government support for eco-friendly alternatives for plastic goods, the bamboo toothbrush industry could eventually dominate the global toothbrush industry. A rapidly expanding consumer base and support from numerous governments for eco-friendly ventures are expected to drive market growth during the forecast period.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Bamboo Toothbrush .” provides an insight into Bamboo Toothbrush market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Bamboo Toothbrush project. The report assesses the market sizing and growth of the Indian Bamboo Toothbrush Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Bamboo Toothbrush sector in India along with its business prospects. Through this report we have identified Bamboo Toothbrush project as a lucrative investment avenue.
