Introduction

A4 paper is the size most used in the world. It is used as the classic paper sheet in all industrialized countries. Today, it is used for all printing documents, letters, magazines, forms, bit notice, posters, catalogues, magazines, In Engineering A4 size paper is the mostly used as hard copy of drawing or document in a handy way. It can be found in everyday life.

In the light of the internet revolution, massive inroads of digital printing and print on demand, the growth in demand for cut A4 size paper has been phenomenal.

In India, the segment growth of cut size has been around 18-20% per year. Beyond that the economy-value for money segment is growing @25%plus.

On the basis of product type, the printing papers market is divided into coated mechanical, uncoated mechanical, coated free-sheet and uncoated free-sheet. Among the product segment, only uncoated mechanical has shown growth. Demand for printing papers in emerging markets is expected to experience robust growth over the next five to ten years.

Consumption of printing paper will continue to advance as export-led economic development strategies give way to more domestic-driven growth. Finally, the developing world will benefit from those who have gone before them and can be expected to be early adopters of proven technologies such as digital printing, on-demand, color (where affordable) and software-driven document solutions.

The paper industry in India has become more promising as the domestic demand is on the rise. Increasing population and literacy rate, growth in GDP, improvement in manufacturing sector and lifestyle of individuals are expected to account for the growth in the paper industry of India. Paper Industry plays a vital role in the economic growth of a country through revenue generation, foreign exchange earnings, and employment generation. Paper finds its usage in recording, storage and dissemination of information.

India is the fastest growing market for paper globally. In sync with economic growth, paper consumption is poised for a big leap forward. The sector has touched 14.88 million tonnes of capacity in 2015-16. The estimated turnover of the industry is Rs 50,000 crore approximately and its contribution to the exchequer is around Rs 4,500 crore. The industry provides employment to more than 0.5 million people directly and 1.5 million people indirectly.

The paper industry also contributes towards fulfillment of various requirements of the industry as a whole like information dissemination, publicity etc. which in turn stimulate industrial growth of the country. The paper industry has, thus, a catalytic role to play not only for the overall growth of the industry but also for the living standards of the people.

Despite the continued focus on digitization, India's demand for paper is expected to rise 53 per cent by 2020, primarily due to a sustained increase in the number of school-going children in rural areas. Digital media has a lot of ground to cover, at least as far as penetration is concerned, primarily in rural areas. Paper is an established business and its consumption is being encouraged.

Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Copier Paper (A4 Size)” provides an insight into the Copier Paper market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Copier Paper (A4 Size) project. The report assesses the market sizing and growth of the Indian Copier Paper Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Paper sector in India along with its business prospects. Through this report we have identified Copier Paper (A4 Size) project as a lucrative investment avenue.
