Introduction

Ready to Eat food took its own sweet time to enter the Indian market. Today, apart from manufacturing, India is also exporting ready to eat Indian food. Ready-to-eat food as animal or plant derived food that is cooked, frozen, washed, cooked for hot holding, cooled, and processed to be consumed directly or after heating.

It is a category of convenience food where the preparation time is extremely short and convenient, to where the product is prepared in advance and can be eaten as sold depending upon the requirement of the users and the weather conditions. These foods meet the specific needs of convenience, nutritional adequacy, shelf stability, storage, distribution to the centers and have become very popular.

Convenience food, or tertiary processed food, is food that is commercially prepared (often through processing) to optimise ease of consumption. Such food is usually ready to eat without further preparation. It may also be easily portable, have a long shelf life, or offer a combination of such convenient traits. Convenience foods can include products such as candy; beverages such as soft drinks, juices and milk; fast food; nuts, fruits and vegetables in fresh or preserved states; processed meats and cheeses; and canned products such as soups and pasta dishes. Additional convenience foods include frozen pizza, chips such as potato chips, pretzels, and cookies.

Most of us think that Indian food is spicy and hence only Indians prefer our authentic preparation but that's not the case. There are products like Amritsari Chole, Dal Makhani, Biryanis, Gulab Jamun and many more such items that not only suit their taste but are also loved by them.

Frozen food covers a wide range of ready-to-serve food that requires no further cooking before they are ready for human consumption. Frozen ready-to-serve food is served by many food caterers, hotels, restaurants, fast food chains, food centres. They are also distributed to supermarkets for public consumption.

Demand for ready-to-eat food is growing fastest in metros where a lot of working people don't get enough time to cook elaborate meals. According to retailers, the most popular heat-and-eat items include preparations of paneer, chana masala, rajma masala and pav bhaji. The demand for tomato puree and ketchup are commonly-used commodities due to high fluctuations of market prices of fresh tomatoes. The main categories of packaged food are canned/dried processed food, frozen processed food, meal replacement products and condiments.

The market is anticipated to grow on account of increasing working population, growing per capita disposable income, rising per capita expenditure on prepared food, increasing middle class and affluent consumers, etc. With the rising employment opportunities and changing lifestyle of consumers, the demand for ready-to-eat food products in the country is projected to grow during the forecast period as well. India has a large base of young consumers, who form majority of the country's workforce. These young consumers hardly find time for traditional cooking due to their busy life styles which further creates significant potential for ready-to-eat food products.

Convenience food doesn't require a lot of preparation and is easy for consumption. Convenience food market comprises ready to cook and ready to eat products. Among which ready to eat includes frozen foods, chips, bakery items and others. Whereas ready to cook has been further segmented into snacks mix, dessert mix and curry mix.

Increased consumer awareness towards ready to mix food in India has changed consumer preferences for food resources which take less time and energy to prepare. In India, the demand for Ready-to-cook (RTC) food products has been increasing over the last few years on account of busier lifestyles and rising income levels of consumers. This has been consequently providing a huge impetus to RTC food products market in India, especially over the last five years. The Indian middle class, in particular, is witnessing a paradigm shift in their lifestyle and living standards. Presently, nuclear families and bachelors residing in metropolitans for academic and employment purposes are among the major consumers of RTC food products. Due to cultural diversities, companies are increasingly focusing on launching regional RTC products.

Increase in disposable income and consumer preferences for healthy and convenient food coupled with the rising demand for snacks and fried food products are expected to further boost the demand for ready-to-eat food products. In terms of value, the global ready-to-eat food products market is expected to expand at a CAGR of 7.2% during the forecast period (2016-2026) and is estimated to be valued at US\$ 195.3 Bn by the end of 2026.

- 27. What is the Market Study and Assessment for setting up the plant?**
- 28. What is the Plant Layout for setting up the plant?**

Reasons for buying our report:

- **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the project**
- **The report provides vital information on the product like it's characteristics and segmentation**
- **The report helps you market and place the product correctly by identifying the target customer group of the product**

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

NIIR PROJECT CONSULTANCY SERVICES

An ISO 9001:2008 Company

Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

We at NPCCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.

We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.

What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Market Research Reports*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we serve?

- *Public-sector Companies*
- *Corporates*
- *Government Undertakings*
- *Individual Entrepreneurs*
- *NRI's*
- *Foreign Investors*
- *Non-profit Organizations, NBFC's*
- *Educational Institutions*
