Introduction

Cashew, the king of dry fruits, is not merely the best topping for a delicious last course; it is also an aphrodisiac that can boast of many curative properties. Cashew nut Shell Liquid (CNSL) is a reddish brown viscous liquid, having the Honey comb structure of the shell of cashew nut obtained from cashew tree.

It has leathery oval leaves and bears reddish flowers growing in clusters, and red or yellowish pear-shaped fruits referred to as cashew apples. The kidney-shaped ovary with a hard double shell growing at the bottom of each fruit is the cashew nut. Between the shell and the nut is found a black caustic oil difficult to remove – the cashew nut shell liquid (CNSL), which can be processed for industrial uses.

The cashew shell is used to extract cashew nutshell liquid (CNSL), which is an important by-product of cashew industry. The nut has a shell of about 1/8 inch thickness inside which is a soft honeycomb structure containing a dark reddish brown viscous liquid. It is called the cashew nut shell liquid, which is the per carp fluid of the cashew nut.

CNSL has innumerable applications, such as friction linings, paints, laminating resins, rubber compounding resins, cashew cements, polyurethane based polymers, surfactants, epoxy resins, foundry chemicals, and intermediates for chemical industry. The shell liquid, which is extracted out of the outer shell of the nut, also has industrial applications in the automotive industry, leather, and tobacco curing. It offers much scope and varied opportunities for the development of other tailor-made polymers.

India has the largest area under cashew and is confined mainly to the peninsular areas. It is grown in Kerala, Karnataka, Goa and Maharashtra along the west coast and Tamil Nadu, Andhra Pradesh, Orissa and West Bengal along the east coast. The highest productivity is observed in Kerala and Maharashtra with over one ton per ha. India is also one of the largest cashew consuming countries in the world.

Cashew nut cultivation is limited to coastal areas. But there is very high demand for cashew nut and its products from all parts of the country. The demand for cashew nut outstrips production.

The demand for cashew nut is gradually increasing. India is leading producer, processor, consumer and exporter of cashew nuts in the world. It is one of the important agricultural commodities exported from India to many countries in the world.

About two third of cashew produced in the country is consumed locally. India accounts for 65 percent of total cashew nut exports in the world and export cashew to more than 60 countries.

The production potential for the product is very high. The total production of raw cashew nut in the country could be as much as 2 lakh tonnes and at 10% recovery by weight, the production potential for CNSL is as much as 20,000 tonnes. There is a good scope for the export of CNSL to other countries which at present is on the decline.

As India is the largest processor country in the world, it is left with more quantity for exports that also makes it the largest exporter in the world cashew market. It annually exports around 4 million cartons in one year. There is a good scope for CSNL production units due to demand from both indigenous and international markets.

Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Scope of the Report

The report titled Market Survey cum Detailed Techno Economic Feasibility Report on Cashew Nut Processing with CNSL provides an insight into the Cashew Nut market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Cashew Nut Processing with CNSL project. The report assesses the market sizing and growth of the Indian Cashew Nut Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Cashew Nut sector in India along with its business prospects. Through this report we have identified Cashew Nut Processing with CNSL project as a lucrative investment avenue.

Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects.

Here's we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is "Instant Online Project Identification and Selection"

NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.
