

Looking to start a business that will make you money? Check out these 7 business ideas for startups!

This list of seven business ideas for startups that can make you money will show you plenty of good options to consider, as well as some that you should keep in mind when thinking about your unique situation and skill set!

Wheat Processing Unit

(Wheat Starch, Vital Wheat Gluten, Modified Starches, Fibres & Proteins)

A wheat processing unit is a piece of machinery that is used to turn wheat into starchy foods like white flour, pasta, and pastries. Vital wheat gluten, which has a high protein content and is utilised in many gluten-free goods, can also be made from processed wheat.

Business Plan: <u>Setup Wheat Processing Unit</u>
(Wheat Starch, Vital Wheat Gluten, Modified
<u>Starches, Fibres & Proteins</u>)

Additional qualities, such as a thicker texture or a richer colour, can be added to processed wheat and utilised in ice cream and cake mixes.

Almost anyplace wheat is farmed, a wheat mill, also known as a wheat processing factory, can be found. The wheat storage unit, wheat cleaning system, wheat grinding unit, and wheat packing machine are the four basic components of a wheat mill.

ADVANTAGES OF SETTING UP WHEAT PROCESSING UNIT

In addition to storing raw grains, wheat processing machines are utilised for a variety of food manufacturing processes. Steel, aluminium, and plastic are some of the materials that can be used to make these wheat processing units. They are used to keep dry fruits and other consumables free of moisture in addition to storing grains.

Additionally, these wheat processing technologies assist in the separation of damaged grains from excellent grains, eliminating waste from low-quality grains or crops. They also help to keep insects away from stored goods, which could cause damage otherwise. Apart from these benefits, wheat processing equipment can be customised to match the needs and specifications of unique consumers.

> Related Feasibility Study Reports: <u>Cereal Processing (Rice, Dal, Pulses, Oat, and Wheat)</u>, <u>Sugar and value added Products and Projects</u>

The market is estimated to increase at a CAGR of 3.1 percent between 2022 and 2027 as a consequence of the aforementioned factors. A key driver of the global Wheat starch market is the rising demand for wheat starch as a stabilising and gelling agent in numerous end-use industries. Wheat starch is a thickening ingredient used in a wide variety of meals. Gelatinization and retrogradation thicken dishes using wheat starch.

3-Chloropivaloyl Chloride

Manufacturing Business

The hazardous liquid 3chloropivaloyl chloride has a horrible odour. In addition to being utilised as an intermediate in chemical synthesis, it has been used in research applications for DNA modification. When inhaled or absorbed through the skin, 3chloropivaloyl chloride is flammable, moisture and oxygen sensitive, and dangerous.

> Business Plan: 3-Chloropivaloyl Chloride

<u>Manufacturing Business Plan</u>

3-Chloropivaloyl chloride is used as an intermediate in the organic synthesis of medicines and agrochemicals. Antibiotic properties can be found in the chemical. It can be used to make furfural, picolinic acid, methanol chlorohydroxide, alpha acetylsalicylic acid (aspirin), 3chloro acetic acid, and paratoluenesulfonic acid.

> Related Feasibility Study Reports: Chemicals

(Organic, Inorganic, Industrial) Projects

It's also utilised in the manufacture of perfumes like rose oxide and civetone. It is also utilised in the production of pesticides such as fenitrothion.

The chemical is used in the production of dyes, paints, and rubber compounds. It's also used to extract gold from ores using the cyanidation process. It can also be used as an epoxidation catalyst.

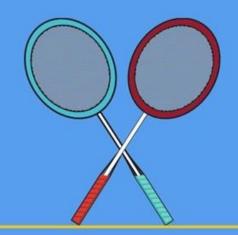

India's demand for acid chlorides is predicted to grow at a CAGR of more than 8% between 2020 and 2024. The Indian market is expected to grow substantially throughout the forecast period due to rapidly increasing population and urbanisation. Over the forecast period, rising demand for acid chlorides is expected to be driven by increased exports of organic and inorganic chemicals, increased production of dyes and dye intermediates such as reactive acid and direct dyes, and rising demand for polymer from various end-use sectors such as automotive, construction, and healthcare.

Badminton Rackets

Manufacturing Business

Badminton rackets production is a business that assists players in learning to play badminton and providing them with the necessary equipment. However, because starting a Badminton Rackets manufacturing business from scratch can be tough,...

> Related Feasibility Study Reports:

Miscellaneous Products, Projects

..learning how to start your own **Badminton Rackets manufacturing** business may make sense if you are interested in this area of work. We'll go over some of the steps you can take to get started. In comparison to Asia and Southeast Asia, Europe and the Americas have much less badminton fans. It is primarily popular in the Nordic countries, particularly Sweden.

Business Plan: <u>Badminton Rackets Manufacturing</u>
<u>Business</u>

Because the region is affected by the region, the temperature is low, and the night is even in the winter, indoor activities like badminton are quite popular.

The global badminton racket market was worth 580 million dollars in 2018 and is expected to reach 980 million dollars by the end of 2025, with a CAGR of 6.7 percent from 2019 to 2025. The goal of this research is to define, segment, and forecast the size of the Badminton Racket market by company, product type, end user, and major regions.

Plastic Waste Recycling Plant

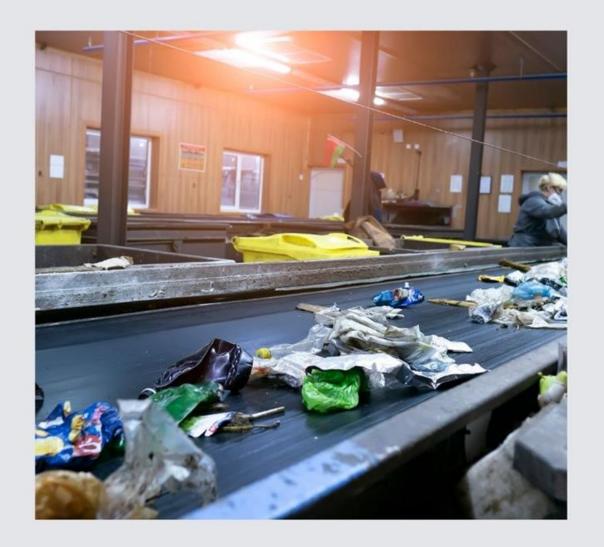

A Plastic Waste Recycling Plant (sometimes called a Plastic Recovery Facility) is an industrial facility that recycles and reuses plastic waste. Some companies are even capable of recycling some types of plastic into new resin pellets.

> Business Plan: <u>How to Setup Plastic Waste</u> <u>Recycling Plant</u>

If you're looking to start a business, there's never been a better time to get involved in plastic recycling in some way. More details on how to do so can be found further down. A plastic waste recycling plant, also known as a plastic crusher plant, is a machine that uses a shredding and classifying process to recycle waste plastic into secondary products.

BENEFITS OF RECYCLING PLASTICS

Plastic recycling has a number of benefits, including energy savings and lower greenhouse gas emissions. It also contributes to the conservation of nonrenewable resources such as oil and gas.

> Read Our Books Here: <u>Waste Management</u>, <u>Waste</u> <u>disposal and Recycling Industry</u>

Furthermore, whether through legal or informal economic activity, recycling provides a source of income for millions of people and families in disadvantaged countries.

Despite the fact that plastics consumption is fast increasing in developing nations, particularly due to increased demand for plastics from Asia, developing country plastic consumption per capita is significantly lower than in developed countries.

> Related Feasibility Study Reports: <u>Waste Management and Recycling, Industrial Waste Management,</u>

<u>Agro Waste, Municipal Garbage, Plastic, Paper, Metal, Iron, Glass, Rubber, Electronic, Medical Waste</u>

<u>Recycling, Solid Waste Treatment, Agricultural, Wood Waste, Residue Processing Projects</u>

Recycling, on the other hand, has a far greater use in developing countries for a variety of reasons. Despite increased global competition brought on by lower customs rates, India's sector has risen at a rate of over 11% per year, compared to global growth of 3 to 4%.

Lovastatin Production

from Dextrose, Peptone Powder, Sugar & Soyabean

Lovastatin is a medicine that helps to prevent strokes and heart attacks by lowering harmful cholesterol and lipids. Lovastatin is a statin medicine that reduces the risk of heart attack and stroke by lowering bad cholesterol and fats like LDL and triglycerides while retaining good cholesterol in the blood.

> Business Plan: Lovastatin Production Business
(from Dextrose, Peptone Powder, Sugar & Soyabean)

Lovastatin is a methoxylated carbobicyclic framework fatty acid ester of mevastatin. It's an anticholesteremic medication found in fungus species including Aspergillus terreus and Pleurotus ostreatus (oyster mushroom). Lovastatin is an antihypercholesterolemic medication that decreases blood cholesterol levels.

> Related Feasibility Study Reports: Chemicals

(Organic, Inorganic, Industrial) Projects

BIOMEDICAL APPLICATIONS OF LOVASTATIN

- Coronary heart disease (CHD)
- Actions to Lower Cholesterol
- Alzheimer's disease medications (AD)
- Renal disease is treated with lovastatin.
- Cancer and Lovastatin
 - Watch other Informative Videos: <u>Chemicals</u>

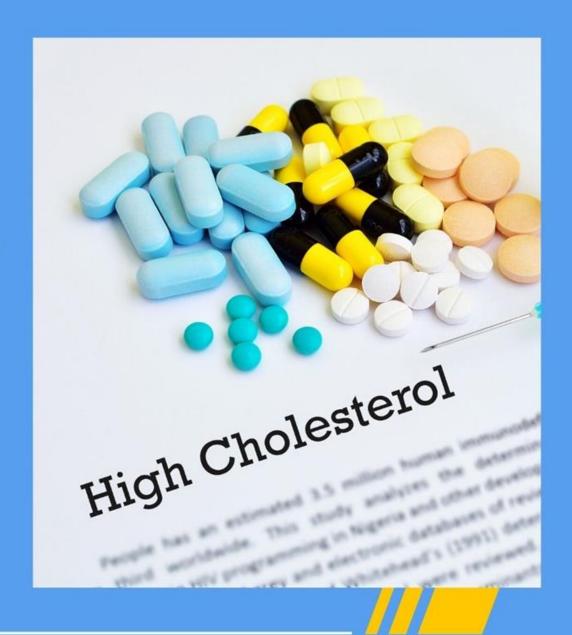

(Organic, Inorganic, Industrial)

Due to rising demand for statin drugs, the worldwide Cholesterol Lowering Medications Market is estimated to rise during the forecast period. Based on medicine class, the cholesterol-lowering pharmaceuticals sector is classified into statins and combinations, as well as others.

> > Read Our Books Here: <u>Chemical Technology</u> (<u>Organic, Inorganic, Industrial</u>), <u>Fine Chemicals</u>

Because of its improved effectiveness and lower costs, this pharmaceutical class is likely to dominate during the projection period. A major portion of the market is expected to come from the Asia Pacific region. This is due to a growth in healthcare knowledge, research, and government activities in the healthcare industry, all of which are contributing to the creation of jobs in the region.

Quartz Slabs

Manufacturing Business

Because quartz is one of the most abundant and hardest minerals on the planet, it's "hardly" surprising that manufacturers recognised its great potential as a surface material more than 50 years ago. Since then, quartz countertops have grown in popularity as homeowners have discovered what the early quartz pioneers already knew.

when the natural mineral quartz is improved via man's ingenuity, quartz worktops can compete with other natural stone counters in every way. Quartz's natural resilience to abrasion, scratches, dents, and even acids eliminates the need for sealants, even in its manufactured form.

Business Plan: Quartz Slabs Manufacturing Business

Quartz is a plentiful resource, and the finished product is nontoxic and nonallergenic, as well as lasting a lifetime, obviating the need for replacement. One of the most durable materials known to man is quartz. Quartz countertops outlast granite and are more versatile.

> Related Feasibility Study Reports: Minerals, Marble,

Granite, Gypsum, Quartz, Talc, Mica Projects

Quartz countertops are stainresistant, so a glass of wine dropped on them can be cleaned with a damp towel (not that you'll be spilling any wine, right?). Quartz comes in a variety of colours. What you see in the showroom or on a sample in your home may be what you get.

Processing, Glass and Ceramics

India is on the verge of tremendous urbanisation in the coming decades. By 2050, India's urban population is expected to be approximately 81 crore, with over one crore people moving to cities. Due to demographic changes, higher income, an increase in the share of nuclear families, and urbanisation, the housing sector in the country has grown rapidly in the last decade.

During the recent decade, quartz surfacing, particularly for countertops, has grown in popularity. Customers seeking a long-lasting and consistent aesthetic can turn to quartz surfacing products as an alternative to natural stone or other surfacing materials. As a result of its increased popularity, quartz surfacing producers are expanding their offers, giving solutions for both clients and the design community.

<u>Processing</u>

Automated Vehicle Scrapping and Recycling Unit

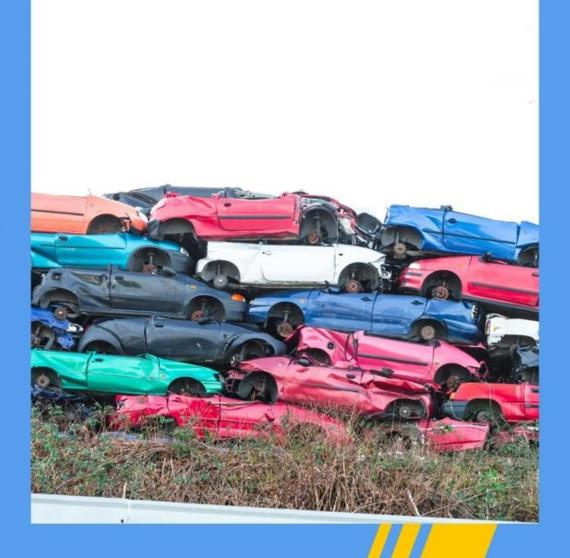

The deconstruction of automobiles for spare parts is known as vehicle recycling. Vehicles have value as a source of replacement components as they reach the end of their useful lives, which has given rise to the car dismantling industry. Commercial outlets in the business are often referred to as "wrecking yards," "auto dismantling yards," "vehicle replacement parts providers," and, more recently, "auto or vehicle recycling."

Vehicle recycling has been a part of the process for a long time, but manufacturers have been more active in recent years. Before transferring a discarded car to a steel mill, a crusher is typically used to reduce its size.

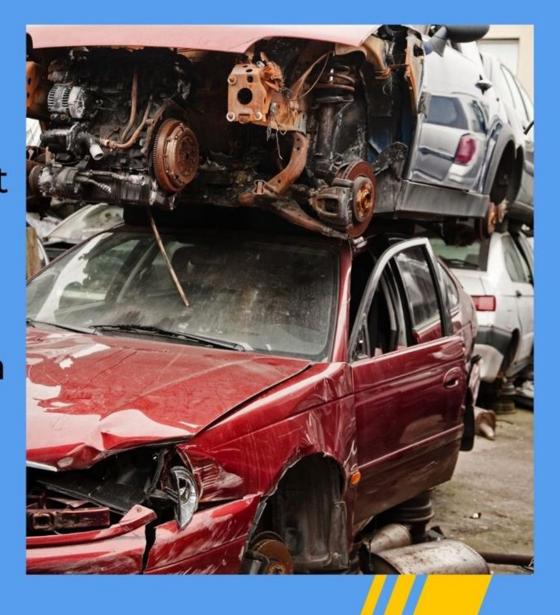

> Business Plan: <u>Automated Vehicle Scrapping</u> and <u>Recycling Unit</u>

IN INDIA, WHAT IS THE SCOPE OF VEHICLE RECYCLING?

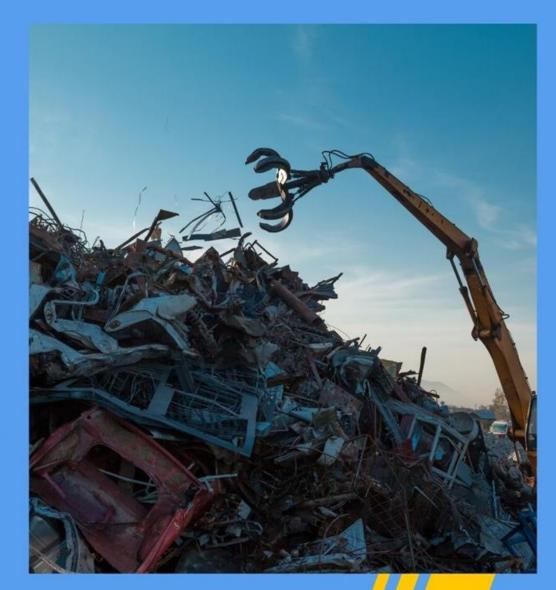

India, being the world's third-largest steel producer, offers enormous potential for vehicle recycling. Because it is mostly unorganised, auto recycling in India can provide a variety of benefits to the country, ranging from a boost to the automotive sector to fuel savings and job creation.

The recycling business is placing a significant wager on the government's efforts. It is expected to produce business of USD 2.9 billion (roughly INR 190 billion) at first, based on 25% (7 million vehicles) of all automobiles that might be thrown. In the future years, these figures are likely to rise.

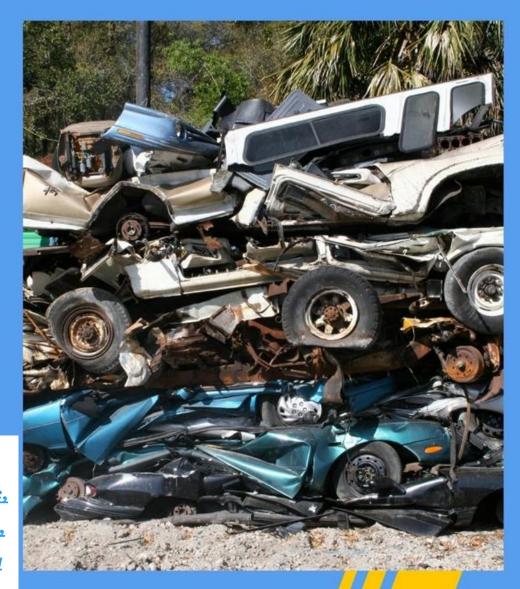

Read Our Books Here: <u>Waste Management</u>,
<u>Waste disposal and Recycling Industry</u>

In 2020, the worldwide car recycling market is expected to be worth \$20.6 billion. Between 2021 and 2026, the market is estimated to increase at a CAGR of 5.1 percent. One of the primary factors driving the market's progress is the rise of industrialization and urbanisation around the world.

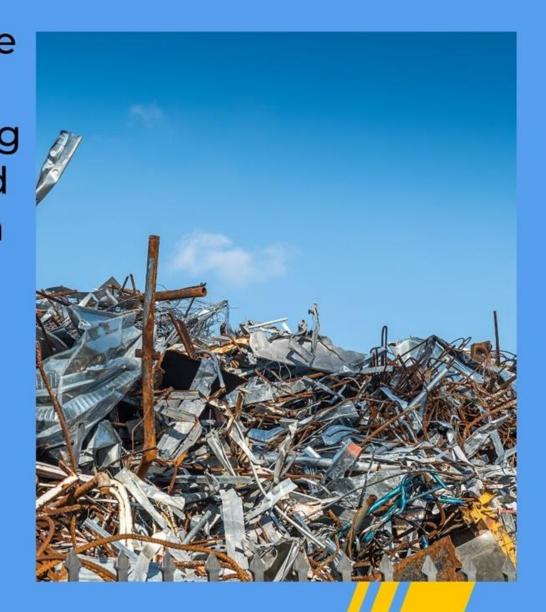

Related Feasibility Study Reports: <u>Waste Management and Recycling</u>, <u>Industrial Waste Management</u>, <u>Agro Waste</u>, <u>Municipal Garbage</u>, <u>Plastic</u>, <u>Paper</u>, <u>Metal</u>, <u>Iron</u>, <u>Glass</u>, <u>Rubber</u>, <u>Electronic</u>, <u>Medical Waste Recycling</u>, <u>Solid Waste Treatment</u>, <u>Agricultural</u>, <u>Wood Waste</u>, <u>Residue Processing</u> <u>Projects</u>

Another element driving growth is the growing use of metal scrap, particularly steel, in the manufacturing of more inexpensive, lightweight, and fuel-efficient vehicles. Market growth is further aided by increased consumer awareness of the environmental benefits of recycling materials and reduced reliance on natural resources.

Major Queries/Questions Answered in Business Plan

- 1. How has the industry performed so far and how will it perform in the coming years?
- 2. What is the Business Feasibility Study of the Plant?
- 3. What are the requirements of Working Capital for setting up the plant?
- 4. What is the structure of the industry and who are the key/major players?

- 5. What is the total Startup cost for setting up the plant?
- 6. What are the operating costs for setting up the plant?
- 7. What are the machinery and equipment requirements for setting up the plant?
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?
- 9. What are the requirements of raw material for setting up the plant?

- 10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?
- 11. What is the Manufacturing Process of the plant?
- 12. What is the total size of land required for setting up the plant?
- 13. What will be the income and expenditures for the plant?
- 14. What are the Projected Balance Sheets of the plant?

- 15. What are the requirement of utilities and overheads for setting up the plant?
- 16. What is the Built up Area Requirement and cost for setting up the plant?
- 17. What are the Personnel (Manpower) Requirements for setting up the plant?
- 18. What are Statistics of Import & Export for the Industry?
- 19. What is the time required to break-even?

- 20. What is the Break-Even Analysis of the plant?
- 21. What are the Project financials of the plant?
- 22. What are the Profitability Ratios of the plant?
- 23. What is the Sensitivity Analysis-Price/Volume of the plant?
- 24. What are the Projected Pay-Back Period and IRR of the plant?
- 25. What is the Process Flow Sheet Diagram of the plant?
- 26. What are the Market Opportunities for setting up the plant?
- 27. What is the Market Study and Assessment for setting up the plant?
- 28. What is the Plant Layout for setting up the plant?

Reasons for Buying Our Business Plan

- ✓ The Business Plan helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product
- ✓ This Business Plan provides vital information on the product like it's characteristics and segmentation
- ✓ This Business Plan helps you market and place the product correctly
 by identifying the target customer group of the product

- ✓ This Business Plan helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials
- ✓ The Business Plan provides a glimpse of government regulations applicable on the industry
- ✓ The Business Plan provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions

- Our research reports broadly cover Indian markets, present analysis,
 outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

How to Choose The Right Business For You?

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify Businesses based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the Business Ideas on the basis of mentioned pointers and identify a suitable Business Plan matching your investment requisites.....Read

Detailed Project Reports

Visit:-https://www.entrepreneurindia.co/complete-project-list

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- Good Present/Future Demand
- Export-Import Market Potential
- Raw Material & Manpower Availability
- Project Costs and Payback Period

The Business Plan covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....Read more

Who are we?

A trusted and leading name in the industry, we have been putting forth exceptionally integrated and comprehensive technical consultancy services. We believe that project consultancy serves as a critical element for the success of your projects. Moreover, we keep in mind that no client is the same and nor are the requirements. Therefore, we ensure uniqueness in every service you avail from us.

What do we offer?

- > Selection of Right Business Ideas For You (Project Identification)
- Detailed Project Reports/Pre-feasibility Reports
- Market Research Reports
- Business Plan
- > Technology Books and Directory
- Industry Trend
- Databases on CD-ROM
- Laboratory Testing Services
- > Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)

How are we different?

- > We have two decades long experience in project consultancy and market research field
- > We empower our customers with the prerequisite know-how to take sound business decisions
- ➤ We help catalyze business growth by providing distinctive and profound market analysis
- > We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors
- > We use authentic & reliable sources to ensure business precision

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- o NRI's
- Foreign Investors
- o Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- o Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- o Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- o Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling
- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct
- Copper & Copper Based Projects

Sectors We Cover cont..

- Dairy/Milk Processing
- o Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- o Essential Oils, Oils & Fats And Allied
- o Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- o Food, Bakery, Agro Processing
- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitability Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries
- Infrastructure Projects
- Jute & Jute Based Products

Sectors We Cover Cont...

- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- o Organic Farming, Neem Products Etc.
- o Paints, Pigments, Varnish & Lacquer
- o Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- o Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- o Plantations, Farming And Cultivations
- o Plastic Film, Plastic Waste And Plastic Compounds
- o Plastic, PVC, PET, HDPE, LDPE Etc.

Sectors We Cover cont...

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- o Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals
- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

Objective

- To get a detailed scenario of the industry along with its structure and classification
- To provide a comprehensive analysis of the industry by covering aspects like:
 - Growth drivers of the industry
 - Latest market trends
 - Insights on regulatory framework
 - SWOT Analysis
 - Demand-Supply Situation
 - Foreign Trade
 - Porters 5 Forces Analysis
- To provide forecasts of key parameters which helps to anticipate the industry performance
- To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- To help an entrepreneur/manager in keeping abreast with the changes in the industry
- To evaluate the competitive landscape of the industry by detailing:
 - Key players with their market shares
 - Financial comparison of present players

- Venturist/Capitalists
- Entrepreneur/Companies
- Industry Researchers
- Investment Funds
- Foreign Investors, NRI's
- Project Consultants/Chartered Accountants
- Banks
- Corporates
