Processing Industry

**BANANA BASED BANANA**

**WINE PRODUCTION BUSINESS**

# Introduction

The traditional Jamaican beverage known as banana wine is now available in a variety of forms. While some recipes call for fermented or fresh bananas, others call for dried banana. Banana wine typically ferments for three days, after which the finished product is packaged in 750ml bottles with cork stoppers.

# Uses and Applications

Vitamin B6 and potassium, which are crucial minerals for a healthy human body, are abundant in bananas. Additionally, they contain folate, which is crucial for pregnant women as it aids in cell production. With all these nutrients, bananas are perfect for producing wine, so it only makes natural that someone would create a company that manufactures banana wine.

Because there is no alcohol in this fruit-based wine, you won't experience hangovers or other alcohol-related issues after drinking it. Additionally, this beverage will provide your body with a wealth of nutritious advantages.

# Manufacturing Process

The method used to make banana wine is called banana wine manufacturing. The harvesting of bananas for the essential yeast and sugars is the first step in this procedure. The banana fruit is then crushed, and the juice is extracted. A must or base mash is produced by mixing sugar, yeast, and water in the following step of this procedure. You can use a wine presser to extract the liquid from you must after fermentation has taken place (typically two weeks or more). Your finished product would be packaged as the last stage in this procedure.

# Benefits Of Starting Banana Wine Production Business

1. The wine is ideal for folks who don't typically drink wine because it is sweeter than other wines with lower alcohol level.
2. Its also low in sulfites and acidity, making it preferable for people who have difficulties digesting other alcoholic beverages and softer on the stomach. Because it is gluten-free, many people who cannot consume gluten can drink it without worrying about being ill.
3. Since bananas, which are high in potassium, make up the majority of the recipe, this is a great post-workout beverage for replacing electrolytes that were lost.
4. Bananas are a great option for consumers looking for healthier drink choices because they are also high in fiber and antioxidants.

# Market Size in India

The enormous demand for banana wine has caused manufacturing to increase quickly in India. The production of banana wine was projected to increase by 10% yearly in 2013. Because it is affordable, sweet, and can be consumed either way, banana wine is very common.

# Global Market Outlook

The forecast term is expected to see a CAGR of 4.5% for the global banana market (2022-2027). With 55.0% of the world's production in 2020. Bananas are also a significant food and source of income. The global banana wine market demand extended size of US\$ 85.7 Million in 2021 and is predicted to gain USD 117.61 million by 2025. The increase of demand is entirely influenced by the modern-day cooks' growing popularity of marinating with banana wine.
