From identifying your target market to creating a marketing strategy, we'll cover everything you need to know to create an effective business plan.

Start Manufacturing of

# Micronutrient Fortified Energy Dense Food

Micronutrient-fortified food helps to prevent chronic diseases like obesity, diabetes, and heart disease by increasing the intake of micronutrients (vitamins and minerals) that may otherwise be lacking in the diet. There are many micronutrients that play a role in maintaining healthy body weight and blood sugar levels, such as vitamins C and B6, folic acid, zinc, and magnesium. For health reasons, we need to take in certain essential vitamins and minerals every day and if we fail to do so, it can lead to various health issues later on.

# Readymade Khaini (Chewing Tobacco)

**Manufacturing Business**

Khaini is a type of chewing tobacco made with tobacco, lime, and spices. It is used as an oral snuff in India and Pakistan, with the states of Karnataka, Kerala, and Tamil Nadu having the highest consumption rates. It is also used in some parts of Sri Lanka and other parts of Southeast Asia. It has gained popularity in recent years in parts of Africa, where it is frequently sold as a low-cost substitute for cigarettes or chewing tobacco, or as a chewing gum after smoking marijuana or khat leaves.

# Phenolic Formaldehyde Resin Production

Phenol formaldehyde resins (PF) or Phenolic resins are synthetic polymers obtained by the reaction of phenol or substituted phenol with formaldehyde. Used as the basis for Bakelite, PFs were the first commercial synthetic resins (plastics). They have been widely used for the production of molded products including billiard balls, laboratory countertops, and as coatings and adhesives.
