Introduction

Are you searching for manufacturing business ideas? If you have sizeable money to invest and a more risk-taking ability, starting a business is a good decision. Product manufacturers can generate new value, minimize costs, and increase operational stability by focusing and prioritizing on four broad areas: production, product design, value recovery, and supply-chain management. Thinking about stepping into manufacturing industry business, you need to consider the option of starting on a limited size production. Starting with the making of essential components of the various industries. Once you set up things well, you could choose to start an industry and gradually become the giant of the industry.

Projects:- Project Reports & Profiles
Get ready and quickly go through these top business ideas that are the best options available with high return on investment. Choose any of these high net profit margin ideas if you want to start a venture in the manufacturing industry. Becoming an entrepreneur easier than ever before—technology is shrinking the world, opening markets, and making it possible for many people to strike out on their own in the field of their dreams. An entrepreneur who starts his own business can break free from this actuarial perspective and redefine the value he brings to the market.

Books:- BOOKS & DATABASES
Dairy Farming & Dairy Products (Milk, Butter, Ghee & Paneer)

Dairy farming may be a class of agriculture for long-term production of milk, which is processed for eventual sale of a dairy product. Dairying is a very important source of subsidiary income to small/marginal farmers and agricultural laborers. India derives nearly 33% of the gross Domestic population from agriculture and has 66% of economically active population, engaged in agriculture. The share of livestock product is estimated at 21% of total agriculture sector. Milk production alone involves over 70 million producers, each raising one or two cows/buffaloes primarily for milk production. Additionally to exploit, the manure from animals provides an honest source of organic matter for improving soil fertility and crop yields. The gobar gas from the dung is used as fuel for domestic purposes as also for running engines for drawing water from well. In Hinduism; cow urine features a special significance as a drink. Sprinkling of cow urine is said to possess a spiritual cleansing effect furthermore. Gomutra isn't a toxic industrial waste material. 95% of its water, 2.5% consists of urea, and therefore the remaining 2.5% may be a mixture of minerals, salts, hormones and enzymes.

Related Projects:- Milk & Dairy Products
The global dairy products market is expected to grow at a CAGR of 5.2% from 2019 to reach $645.8 billion by 2025. Dairy is defined as a business enterprise that deals with the processing and harvesting of animal milk for human consumption. Some of the common milch animals include cow, goat, buffalo, camel and sheep. The milk obtained from these animals can be consumed directly and processed into ice cream, cheese, paneer, butter, ghee, condensed milk and yogurt. These products offer various nutrients such as calcium, proteins, zinc, magnesium, and vitamin D and B12. With widespread demand for dairy products and their proactive function in the global food industry, dairy plays a crucial role in the growth of the economies worldwide. Over the years, the dairy industry has witnessed improvements in product safety through specialization, modernization and consolidation. Moreover, advancements in global trade have also influenced the profitability of dairy farms.

**Related Books:**[ Milk Processing, Dairy & Dairy Products, Poultry Industries](#)

As of 2018, India is the leading milk producing country in the world, accounting for ~19% of the global market share. The milk processing industry in India is expected to expand at a compound annual growth rate (CAGR) of ~14.8% between FY 2018 and FY 2023, and will reach INR 2,458.7 Bn in FY 2023.
Groundnut oil may be a vegetable oil derived from groundnuts. It’s also called groundnut oil. The oil features a strong peanut flavor and aroma. It’s often utilized in American, Chinese, South Asian and Southeast Asian cuisine, both for general cooking, and within the case of roasted oil, for added flavor. Unrefined groundnut oil features a smoke point of 320°F/160°C and is employed as a flavor ant for dishes like sesame oil. Groundnut haulms are nutritious and widely used for feeding livestock. The groundnut oil consists of mixed glycerides, and contain a high proportion of unsaturated fatty acids, especially Oleic (50-56%) and Linoleic (18-30%).

**Related Projects: - Edible Oils Projects**

In India, groundnut is cultivated in 5.8 million hectares. Gujarat is that the highest producer of groundnut oil in India. Groundnut seed contains 50-55% of the oil. It’s one among the most effective oil seeds to extract oil from. Increasing use of groundnut oil in cosmetics are getting to be one altogether the primary drivers of the peanut oil market.
The abrasive, volatizing, and cleansing properties of hot-pressed groundnut oil and its derivatives are boosting its application in BPC product and cosmetics, such as moisturizers and skin cleansers. Growing popularity of blended oil are getting to be one altogether the critical groundnut oil market trends. The utilization of cheap alternatives, similar to oil in blended oil makes it more affordable than conventional oil. These advantages can boost the popularity of homogenized groundnut oil and consequently fuel the growth of the groundnut oil market.

However, the high production cost of peanut oil is a major factor expected to restraint growth of the target market in the near future. In addition, high consumption of peanut oil results in various side effects in human health which is one of the major factors expected to hamper growth of the target market to a certain extent. Global peanut oil market is set to witness a steady CAGR of 4.25% in the forecast period of 2019- 2026.
Nicotine may be a natural product of tobacco, occurring within the leaves of nicotiana tabacum during a range of 0.5 to 7.5% counting on variety. Nicotine is additionally found within the leaves of nicotiana rustica, in amounts of 2–14%; in Duboisia hopwoodii and in Asclepias syriaca. Nicotine may be a widely used stimulant and potent para sympathomimetic alkaloid that's naturally produced within the nightshade family of plants. It’s used for smoking cessation to alleviate withdrawal symptoms. Nicotine may be a widely used stimulant and potent para sympathomimetic alkaloid that's naturally produced within the nightshade family of plants. It’s used for smoking cessation to relieve withdrawal symptoms.

Related Projects:- Tobacco, Pan Masala, Khaini, Gutkha, Supari, Zarda, Mouth Freshener
The India Tobacco Board has authorized a 2020 Traditional FCV crop size of 90 million kilos. However, crop size is estimated at 96 million kilos. A grade spread consisting of 20 million kilos of bright, 25 million kilos of the medium, and 51 million kilos of low style tobacco. 90% of the crop is already harvested. The average market price is USD 2.10 for this year. Indian Tobacco Board has authorized an NLS 2020 crop size of 46 million kilos. However, a crop size 42 million kgs is anticipated which was transplanted in 17,000 hectares and 90% of the crop has been harvested. The average market price is expected to be USD 2.30 for this year.

Intravenous fluids are fluids which are intended to be administered to a patient intravenously, directly through the circulatory system. These fluids must be sterile to guard patients from injury, and there are variety of various types available to be used. Many companies manufacture packaged intravenous fluids, also as products which may be mixed with sterile water to prepare a solution for intravenous administration.

Fluids are given when someone's body fluid volume falls. There are variety of things which may cause a drop by fluid volume. Vomiting and diarrhea are a classic example, which is why people are encouraged to drink fluids once they are sick, to stay their fluid volume stable. Another cause is blood loss, which causes problems both because people lose blood products, and because they experience a loss in fluid volume. Electrolyte levels within the blood also can become unstable as a result of rapid changes in fluid volume, during which case intravenous fluids are often used to restore the balance.

Related Projects:- IV Fluids, I.V. solutions, Intravenous fluids
The primary costumers for these manufacturing units are Hospitals, Clinics, Dialysis centers, Home care settings. The global Intravenous Fluid market size was valued at US$ 8,372.0 million in 2019 and is expected to witness a CAGR of 6.1% over the forecast period (2019 – 2027). The basic function of I.V. fluids is to replenish body fluids. It can also be used in the treatment of electrolyte metabolism, especially in severe cases, therapy of acid-base in balances, the volume substitution and volume replacement in surgery of accident victims suffering blood loss. It can be used as parenteral nutrition for severally ill and post-operative patients.

Related Books:- BOOKS & DATABASES
Nitrile gloves are a kind of disposable gloves made up of synthetic rubber, this suggests there's no risk of latex allergies. They the foremost popular gloves type in our range and offer superior strength, dexterity and resistance to oils and aqueous chemicals as compared to vinyl or latex. For these reasons, they're often utilized in the medical, laboratory and manufacturing industries. Nitrile gloves are an excellent compromise between latex and vinyl. Our Blue Nitrile gloves offer protection from bodily fluids providing a barrier that forestalls infection, cross-infection or cross-contamination. Tests revealed that Nitrile gloves are three times more puncture-resistant than rubber gloves.

Related Projects:- Disposable Products and Projects from Paper

The Indian market for medical gloves is still evolving. While the global market is growing at a compound annual growth rate (CAGR) of two per cent, the Indian market is at seven per cent growth. Every day there is a new hospital or nursing home popping up in India, so the demand for medical gloves is expected to increase.
Medical tourism is also driving the growth of this product category in our country. The market size therefore only for gloves in India is Rs 300 crore. In view of all this, there is a good scope to initiate small-scale rubber gloves manufacturing unit. The Global Rubber Gloves market is expected to grow at a CAGR of 8.5% between 2014 and 2022. The factors such as rising healthcare expenditure, increasing health threats and increasing hygiene awareness and healthcare regulations are driving the market growth.

**Related Video:** Production of Disposable Nitrile Gloves

Nitrile gloves are preferred over latex gloves because they resist chemicals, including certain disinfectants such as chlorine. There is a high rate of allergies to latex and contact allergic dermatitis among health workers. Non powdered gloves are preferred to powdered gloves.
Toothpaste may be a paste or gel to be used with a toothbrush to maintain and improve oral health and aesthetics. Since their introduction several thousand years ago, toothpaste formulations have evolved considerably - from suspensions of crushed egg shells or ashes to complex formulations with often over 20 ingredients. Among these are often compounds to combat dental caries, gum disease, malodor, calculus, erosion and dentin hypersensitivity. Furthermore, toothpastes contain abrasives to wash and whiten teeth, flavors for the aim of breathe freshening and dyes for better visual appeal. Effective toothpastes are people who are formulated for maximum bioavailability of their actives. This, however, are often challenging as compromises will need to be made when several different actives are formulated in one phase.

Related Projects: - Hygiene Products, Essential Personal Hygiene Products
The global toothpaste market is projected to grow at a CAGR of 6.1% during the forecast period. The toothpaste market was valued at USD 26.09 billion in 2018, and it is projected to reach USD 36.98 billion by 2024. Increasing dental problems among children and adults, due to poor eating habits, and the rise in popularity for herbal oral care products are the factors primarily driving the global toothpaste market.

Related Video:- Startup Business Opportunities in Toothpaste

The rapidly changing lifestyle, improper diet, including sugar-rich diets, and therefore the increased consumption of alcohol and tobacco have made oral health one among the main public health problems in almost every a part of the planet. The impact of oral diseases on people's everyday lives is subtle and pervasive, influencing food habits, sleep, rest, social roles, and almost every phase of the day. Collectively, oral diseases and disorders create substantial pain and suffering. Because of this, consumers across the planet have started paying immense attention to maintaining their oral health, which has led to a rise within the sales of toothpaste across the world.
The Active Pharmaceutical Ingredient (API) is that the part of any drug that produces the intended effects. Some drugs, like combination therapies, have multiple active ingredients to treat different symptoms or act in several ways. Production of APIs has traditionally been done by the pharmaceutical companies themselves in their home countries. But in recent years many corporations have opted to send manufacturing overseas to chop costs. This has caused significant changes to how these drugs are regulated, with more rigorous guidelines and inspections put into place.

**Related Projects:**- Active Pharmaceutical Ingredient (API) Products, Bulk API Manufacturing

India is that the seventh largest country within the world and has the second highest population. It a parliamentary democratic variety of government and has abundant natural resources and sufficient oil reserves.
The country features a huge skilled, English-speaking, and inexpensive labor force. Its young population and current economic policies have made it one among the most important recipients of FDI within the world. Asia Pacific is predicted to be the fastest-growing market over the forecast period. Because of the supply of affordable labor, major companies within the market are setting up API manufacturing plants in developing countries like China and India.

The global demand of APIs include ageing population, rising expenditures on healthcare, increasing prevalence of lifestyle diseases, etc. Looking forward, the market value is projected to reach US$ 258.8 Billion by 2025, exhibiting a CAGR of 5.6% during 2020-2025. The API market is competitive in nature and is becoming increasingly competitive. Consequently, manufacturers are required to enhance products in order to gain advantage over previously marketed products.

**Related Book:** [India Active Pharmaceutical Ingredient (API) Market](https://www.nlir.org)
The government also notified a scheme to promote bulk drug parks. For selected parks, financial assistance to the tune of 70 per cent of the project cost of common infrastructure facilities will be provided. In the case of Northeast states and hilly states (Himachal Pradesh, Uttarakhand, Union Territory of Jammu & Kashmir, and Union Territory of Ladakh), financial assistance will be 90 per cent of the project cost. The maximum assistance under the scheme for one bulk Drug Park will be limited to Rs 1,000 crore. The total financial outlay of the scheme is Rs 3,000 crore.

Reasons for Buying Our Report:

• The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product.
• The report provides vital information on the product like its characteristics and segmentation.
• The report helps you market and place the product correctly by identifying the target customer group of the product.
The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials.

The report provides a glimpse of government regulations applicable on the industry.

The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions.
Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.
Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites......Read more

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- Good Present/Future Demand
- Export-Import Market Potential
- Raw Material & Manpower Availability
- Project Costs and Payback Period

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,
Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects......Read more

Who are We?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services

- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad
What do We Offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Business Plan
- Market Research Reports
- Technology Books and Directory
- Industry Trend
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)
How are We Different?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision
Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation
Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI’s
- Foreign Investors
- Non-profit Organizations, NBFC’s
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations
Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling
Sectors We Cover  Cont...

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct
Sectors We Cover  Cont...

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing
Sectors We Cover  Cont...

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitability Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries
Sectors We Cover
Cont...

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing (Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.
Sectors We Cover  

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.
Sectors We Cover

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals
Sectors We Cover  cont...

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable
Objective

- To get a detailed scenario of the industry along with its structure and classification
- To provide a comprehensive analysis of the industry by covering aspects like:
  - Growth drivers of the industry
  - Latest market trends
  - Insights on regulatory framework
  - SWOT Analysis
  - Demand-Supply Situation
  - Foreign Trade
  - Porters 5 Forces Analysis
**Objective**

- To provide forecasts of key parameters which helps to anticipate the industry performance.
- To help chart growth trajectory of a business by detailing the factors that affect the industry growth.
- To help an entrepreneur/manager in keeping abreast with the changes in the industry.
- To evaluate the competitive landscape of the industry by detailing:
  - Key players with their market shares.
  - Financial comparison of present players.
