

Desiccated Coconut Powder Production Business.

Coconut Processing & Value Added Products from Coconut

Introduction

Desiccated Coconut Powder is obtained by drying ground or shredded coconut kernel after the removal of brown tests. It finds extensive use in confectioneries, puddings and many other food preparations as a substitute to raw grated coconut. It is finely grated, dried, unsweetened form of coconut, obtained by drying shredded or ground kernel. It is used as a substitute to raw grated coconut in confectioneries, desserts like puddings, cookies, cakes, pastries, and other food preparations. Making Desiccated Coconut. Two main types: tall and dwarf.

Desiccated coconut is the product that is obtained by drying the granulated or shredded white meat of the fully mature coconut kernel, by means of a mechanical air drying. Coconut is known outside the tropics mainly through the popularity of desiccated coconut in cakes and chocolate bars. In fact according to industry experts there is excellent scope for production of coconut-based items such as desiccated coconut, coconut cream and coconut milk powder and packaged coconut tender water as a beverage.

Uses

desiccated coconut powder is used as an ingredient in savory and sweet recipes, for imparting coconut flavor and texture as topping. No cholesterol and is rich in dietary fiber. It can be added to hot or cold cereals and as an addition to baked goods. Also consumed as a snack item.

Market Outlook

Development of the baking industry due to change in lifestyle & food habit of consumers has driven the growth of the desiccated coconut powder market. Moreover, it is easily available in the market through retail stores, online, supermarkets, which has fueled the market growth. However, the supply of coconut is expected to be uncertain in future due to adverse climatic changes, which is likely to hamper the growth of the desiccated coconut powder market in the upcoming years. Moreover, availability of several substitutes for desiccated coconut powder in the market such as fresh coconut, Brazil nuts, or macadamia that offers similar nutty flavor & texture like desiccated coconut powder acts as a key restraint of the market. On the contrary,

increase in consumer preferences for organic ingredients to be used in their foods is anticipated to boost the demand for organic desiccated coconut powder, thereby offering remunerative opportunities for market expansion in the near future. There has been an increase in the sales and demand for organic desiccated coconut and fair trade products which has a direct impact in driving the market growth of desiccated coconut. Desiccated coconut is a key ingredient in traditional bakery of many European countries such as kokosmakronen of the Netherlands and coconut macaroons of the U.K. Apart from this it is also used in many products like breakfast cereals. Most recently there has been an increase in interest of consumers in desiccated coconut based products such as kokosmakronen, breakfast cereals and also many Asian dishes, which has benefited the progress for desiccated coconut market.

Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Desiccated Coconut Powder.” provides an insight into Desiccated Coconut Powder market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Desiccated Coconut Powder project. The report assesses the market sizing and growth of the Indian Desiccated Coconut Powder Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Desiccated Coconut Powder sector in India along with its business prospects. Through this report we have identified Desiccated Coconut Powder project as a lucrative investment avenue.
