

NEW PROJECTS FOR ENTREPRENEURSHIP

*Most Profitable Small & Medium
Businesses To Start*

Welcome to the World of Entrepreneurship

“Entrepreneurship” is the practice of starting new organizations or revitalizing mature organizations, particularly new businesses generally in response to identified opportunities.

The first step to initiate planning is to identify a suitable project. To start your own venture you have to decide on many things. Making a choice of the right project is a difficult decision for an entrepreneur and is an imperative decision.

There are no set rules to identify a suitable project, though this is one decision on which the success of your entire venture hinges. So, don't take hasty decisions.

Most prospective entrepreneurs tend to display the herd tendency and go for a project, which people have already ventured into. This is not a healthy attitude as success of one in a particular field does not guarantee success of the other. While identifying a suitable project, you should make a SWOT analysis of your own strengths and weaknesses.

The next step, after you have selected your project, is to collect all information about it.

The most important information is about the potential market of the items you selected. This book aims at providing a thorough understanding and analysis of the 50 highly profitable industrial projects that you can start. It describes formulae, properties, raw materials used and manufacturing processes of different products. Undoubtedly, this book is a gateway leading you to become your own boss.

The important projects described in the book are Linear Alkyl Benzene, Soy Flour & Milk Processing, Urea Formaldehyde Resin Adhesive, Toothpaste Production, Gypsum Board, Surgical Absorbent Cotton, Starch Derivatives Production, Wet – blue leather, PVC paste Resin, Saccharin, Sodium Chlorite, Phosphate Fertilizer, Tomato Paste, Paint, Autoclaved Aerated Concrete (AAC Blocks), Carbon Black, Caffeine, Sodium hydrosulfite, Magnesium Sulphate (Fertiliser Grade), TMT Bar, Glass Fibre, Plastic (P.V.C.) Laminated Collapsible Tubes, Complex fertilizers, Copper Powder By Electrolysis Process,

Atomized Metal powder, Electro Plating, Activated Carbon from Wood, Rubber Powder from Waste Tyres, Precipitated Calcium Carbonate, PVC Flex Banner Production, Reclamation of Used Engine Oil, Edible Corn Oil, Malt Production, Ethyl Oleate, Wheat Flour Mill, Instant Noodles, Zinc, Castor Oil & Pomace, Garlic Oil and Powder, Silica from Rice Husk, Thermocol Cups, Glass and Plates, Match Box (Automatic Plant), Camphor,

*LDPE/LLDPE Pouch Films, E-waste recycling,
Cattle Feed, Saw Pipe, Polyethylene Wax,
Disposable Plastic Syringes, Cement.*

*It will be a standard reference book for
professionals and use by everyone who wants to
start-up as entrepreneur.*

TABLE OF CONTENTS

1. HOW TO START AN INDUSTRY SUCCESSFULLY

*Choose an Industry or Location Conduct Your
Feasibility Studies Sources of Project Ideas*

(a) Analysis of Industries' Performance

(b) Analysis of Inputs and Outputs of Industries

(c) Analysis of Imports and Exports

(d) Government's Guideline to Industries, Published Annually is Available

(e) Suggestions of Financial Institutions and Developmental Agencies

(f) Survey of Local Resources

(g) Analysis of Economic and Social Trends

(h) New Technologies

Create Your Business Plan

Finance Your Business

Cash Flow

Collateral

Commitment

Character

Make a Good Impression with Your Lenders

Market Research

2. PROJECT IDENTIFICATION

How This Book Helps You to Identify the Project?

3. LINEAR ALKYL BENZENE

Uses

Properties

Typical Property of Linear Alkyl Benzene

Raw Materials Required

Process Description

Flow Diagram

Environmental Exposure

Occupational Exposure

Machinery Required

4. SOY FLOUR & MILK PROCESSING

*Physical Characteristics & Chemical
Composition of the Soybean Chemical
Composition Representative Proximate
Composition Uses*

*Raw Material For Soy Flour For Soy Milk Process
Description*

- 1. Soy Flour Process Description*
- 2. Soy Milk Process Description*

Process Flow Diagram

Soy Flour

Machinery Required for Soy Flour

Soy Milk

Machinery Required for Soy Milk

5. UREA FORMALDEHYDE RESIN ADHESIVE

Uses of Urea Formaldehyde Resin Properties of Urea

Formaldehyde Resin Raw Material Process

Description

Process Flow Diagram for Urea Resin

Adhesive Plant Machinery Required Equipment

6. TOOTHPASTE PRODUCTION

*Toothpaste Composition and Ingredient
Functionality*

*Typical Toothpaste Ingredients Process Description
Storing and Filling the Finished Toothpaste Process
Flow Diagram
Machinery Required*

7. GYPSUM BOARD

Characteristics of Gypsum Board

Uses

Raw Material

Gypsum Board Constituents

Process Description

Transportation

Installation

Flow Diagram

Machinery Required

Gypsum Drying Section
Gypsum Calcining Section
Forming and Drying Section
Utility Section

8. *SURGICAL ABSORBENT COTTON*

Properties of Absorbent Cotton Raw Material Process
Description Based On Before Carding Method
(1) Opening and Cleaning
(2) Filling

(3) Bleaching

(4) Hydro-extracting

(5) Opening, Drying, Opening and Reserving

(6) Carding

(7) Winding, Cutting and Packing

*Process Flow Sheet for Absorbent Cotton
Making Machinery Required*

9. STARCH DERIVATIVES PRODUCTION

Uses

Some Important Definitions

Raw Material

Process Description

*General Process Flow for Starch-Derived Sweeteners
(Corn/Glucose Syrups, High Fructose Syrups,
Dextrose, Fructose, Maltodextrins and Syrup Solids)*

1. Glucose Syrup

Dextrose Syrup

Sorbitol

10. WET - BLUE LEATHER

Raw Material

33. RECLAMATION OF USED ENGINE OIL

Uses

Process Description

Blending

Process Flow Diagram

Sludge Disposal (Pollution Control)

Machinery Required

34. EDIBLE CORN OIL

Process Description Required Machinery

35. MALT PRODUCTION

Standard Malt and Specialty Malt

Barley Conditioning

Malting

Malt Treatment

Process Flow Diagram

Machinery Required

36. ETHYL OLEATE

Properties

Oleic Acid

Uses

Process Description

Machinery Required

37. WHEAT FLOUR MILL

*Composition of Wheat Properties of Wheat
Flour Flour Mill Products Manufacturing
Process Machinery Required Cleaning Section:
Machinery Milling Section: Machinery Conveying
Equipments Refraction Grinding System*

38. INSTANT NOODLES

*Manufacturing Process
Processing and Classification of Instant
Noodles Machinery Required*

39. ZINC

Uses of Zinc Process Description Process

Description Machinery Required Roasting

Process Acid Making Process Leaching

Process Electrolysis Process Casting Process

Cd Making Process CuSO₄ Making Process

40. CASTOR OIL & POMACE

Uses

Agriculture

Food

Paper

Plastics & Rubber

Perfumeries

Cosmetics

Electronics & Tele-Communications

Pharmaceuticals

Aints, Inks & Adhesives

Lubricants

Process Description

Process Flow Diagram

41. GARLIC OIL AND POWDER

Composition

Uses

Process Description

Machinery Required

42. SILICA FROM RICE HUSK

Composition of Rice Husk Ash on Dry Basis

1. *Digestion*

2. *Precipitation*

3. *Regeneration*

Process Flow Diagram

Machinery Required

43. THERMOCOL CUPS, GLASS AND PLATES

Uses

Food Packaging Like

Protective and Display Packaging

Process Description

Flow Diagram for EPS (Thermocol) Plates

Flow Diagram for Expanded Poly Styrene

Cups & Glass

Machinery Required For Plates For EPS Glass & Cups

44. MATCH BOX (AUTOMATIC PLANT)

Raw Material Product Specification Process

Description Match Box Manufacturing Filling

Finishing Process Process Flow Diagram

45. CAMPHOR

Uses

Production

Machinery Required

46. LDPE/LLDPE POUCH FILMS

Uses

Raw Materials Process Description

Machinery Required

47. E-WASTE RECYCLING

Effects on Environment and Human Health Effects of

E-Waste Constituent on Health Components of E-

Waste Management Process Description Manual

Dismantling and Sorting Mechanical Shredding and

Separation Metallurgical Processes Process Flow

Diagram

48. CATTLE FEED

Raw Materials for Concentrate Feeds

Process Description

Reception of Raw Material

Storage of Raw Materials

Blending

Grinding

Process Flow Diagram

Machinery Required

49. SAW PIPE

Uses

Industries Serviced

Oil and Gas Pipeline

Power Plant

Water & Sewerage

Structural

Raw Material

Product Specification

Process Description

The Making of Spiral Weld Pipes

Ultra-Sonic Testing

X-Ray Test and Fluoroscopy

Hydro Testing

Final Inspection, Visual Checking,

Weighing and Measuring Process Flow

Manufacturing & Testing Equipment

50. POLYETHYLENE WAX

Polyethylene Wax

Characteristic Properties of PE Wax

High Molecular Weight Polyethylene Wax

Low Molecular Weight Polyethylene Wax

Raw Material

Process Description

Reaction Conditions

Flow Diagram

Machinery Required

51. DISPOSABLE PLASTIC SYRINGES

Uses

Raw Material

Process Description

Plunger, Barrel & Gasket Production by

Injection Moulding Machine Advantages of Injection Moulding Assembly of Plunger, Barrel, Gasket and Needle by Machine Process Flow Diagram Packing by Poly Bag or Blister Sterilization by EO Sterilization Chamber Machinery Required

52. CEMENT

Uses

Types of Cement

Raw Material

*Process Description Mining and Crushing Raw Mill
C.F. Silo and Preheater Kiln Operation Cement
Grinding Process Flow Diagram Storage &
Dispatch Machinery Required*
