

Food Processing & Agro Based Industries

For more details visit at: <http://goo.gl/cQIZgb>

Information

The Agribusiness sector in India has achieved remarkable successes over the last three and a half decades. This sector has evolved from traditional subsistence level farming to commercial agriculture producing high value and processed products. Agro processing is now regarded as the most promising and sunrise sector of the Indian economy in view of its large potential for growth and likely socio economic impact specifically on employment and income generation.

The agro industry is an important and vital part of the manufacturing sector in developing countries and the means for building industrial capacities. The food processing sector is a highly fragmented industry has the potential to be the driver of economic growth and enhance rural incomes. It has several segments like dairy, grain processing, fruits and vegetable processing, fisheries, consumer foods include packages foods, meat & poultry processing, beverages and packaged drinking water. India has a strong and dynamic food processing sector playing a vital role in diversifying the agricultural sector, improving value addition opportunities and creating surplus food for agro-food products.

As a matter of fact unprocessed foods are very much susceptible to spoilage on storage. The agro industry mainly comprises of the post-harvest activities of processing and preserving agricultural products for intermediate or final consumption. The right post harvest practices such as good processing techniques, and proper packaging, transportation and storage (of even processed foods) can play a significant role in reducing spoilage and extending shelf life. India, having an advantage of a strong agricultural base has tremendous potential to tap favourably and become a preferred sourcing destination for food products globally.

Some of the fundamentals of the book are biotechnological applications in dairy industry, packaging of orange squash in rigid plastic containers, quality assurance for food products, canning of vegetables, canning of broad beans, canning schedule for non acidic vegetables, confectionery manufacturing process, chewing gum and bubble gum, corn flakes and starch, dried milk powder skimmed milk powder, basic process for cereal puff snack making plant, preservation by addition of sugar, preservation by freezing, hygienic conditions in bakery plant, ice cream, fish canning and processing, etc.

This unique book is a vast single compilation on food processing with agro based projects. The book contains sections like confectionery, bakery, canning and preservation, packaging, fruits and vegetable products, agro based projects with processes, formulae, machinery and raw materials sources, utilization of Waste or By-Products etc. It is hoped that this book will be an invaluable resource to its readers who are new to this sector and will also find useful for new entrepreneurs, existing industries, food technologist, technical institution etc.

Table of Contents

- 1. Biotechnological Applications in Dairy Industry**
 - Introduction
 - Application of Biotechnology,
 - Starter Culter
 - Chesse Ripening
 - Microbial Rennet, Bio-Sweeteners,
 - Milk Production By-Product Utilization
 - Lactose Free Milk
 - Additives, Therapeutic Value,
 - Effluent Treatment, Milk Proteins

2. Packaging of Orange Squash in Rigid Plastic Containers

Introduction

Materials and Methods

Experimental Procedure, Analytical
Methods

Results and Discussion

Summary and Conclusion

3. Present Status and Future Trends in the Development of Snack Food Industry in the Country

Type of Sack Foods

Shelf Stable Fried Products

Moist Fried Products, Popped or Puffed Cereals

Extruded Products, Ready to Eat Expanded Products

Traditional Sweets

Nutritional Aspects, Packaging Profiles

Marketing Needs

Future Needs of Research and Development

4 Quality Assurance for Food Products

All Metal Detectors and
Separators

Safety Requires Intelligence
Safety and Service Guarantee

5. Canning of Vegetables

Canning of Broad Beans

Canning Schedule for Non-Acidic Vegetables

6. Chewing Gums

Formulation for Longer-Lasting Flavour and Sweetness

7. Cocoa Butter

Extracting Cocoa Butter with Carbon Dioxide
Flavour Enhancer for Cocoa

8. Confectionery Manufacturing Process Hard Candles

Soft Candles

Cotton Candles

Chewing Gum and Bubble Gum

Industry in India

Toffee

Chocolates

9. Corn Flakes and Starch

Manufacturing Process of Corn Flakes

Wheat and Rice Flakes

Corn Starch

Manufacturing Process of Cereal Starch

10. Dairy Products

Process Description for Evaporated Milk

Dried Milk Powder

Skimmed Milk Powder

Butter

Ghee

Milk Paneer

Cheese

Prevention of Common Defects in Chesse

11. Dehydration of Fruit & Vegetables

Sun Drying

Process of Dehydration

Process for Vegetables

Packing and Storage

List of Plant & Machinery

Quality Control Tests

Rehydration Ratio Determination, BIS Specifications

12. Expended/Extruded Snack Foods

Introduction, Manufacturing Process

Basic Process for Cereal Puff Snack
Making Plant
Prawn Cracker
Mincing Machine
Plant and Machinery

13. Extruded Sugar Products

Low Calorie Snack

High Protein Chocolate Snack

Expanded Confections

Special Packaging

Bonded to Ice Cream Cone

Ice Cream Cone, Fig.

14. Fish Canning and Processing

Uses and Applications

Handling of Raw Materials

Treatment of Fish Before Canning

Packing

Methods of Obtaining a Vacuum

Heat Processing

Labeling and Boxing

Detection of Non-Sterile Packs

Prevention of Bacteria Spoilage

Chemical Spoilage

List of Plant & Machinery

Dried Fish Meal

15. Fruit Beverages

Preparation and Preservation

Use of Fining Agents

Pasteurization

Preservation with Chemicals

Preservation by Addition of Sugar,

Preservation by Freezing

Preservation by Carbonation, Preservation
by Filtration

Squashes and Cordials

Dehydration of Ripe Banana

Canning Schedule for Fruits (Table)

16. Fruit Juices, Squashes and Cordials

Equipment for Fruit Juices

Extraction Equipment

Halving and Burning Machines

Plunger Type Press

Pressing

Fruit Beverages

Preparation and Preservation

Juice Extraction

17. Honey

Honey Product in Water Form
Method for Preserving

18. Hygienic Conditions in Bakery Plant

Equipment and Machinery
Hygiene During Processing

19. Ice Cream

Manufacturing Process

Common Formulations

Machinery & Equipment

Soft Ice Cream Freezer (With Pump)
Fig.

20. Jam, Jellies & Marmalades

Jams

Plant Requirements

Manufacture

Analytical Control
Faults in Jam Making

Jellies

Cooking of Jelly

Some Typical Jams & Jellies

Marmalades

Jam Marmalade

21. Pickles, Chutneys & Sauces

Pickles

Raw Material for Pickle

Causes of Pickles Spoilage & Its Remedies

Chutneys

Various Recipes for Chutneys

Sauces

Recipes for Sauces

Miscellaneous Formulations for Pickles and Chutneys

22. Preservation Fruits and Vegetables

Manufacturing Process for Preserved egetables

Fruit for Bottling or Canning

Precautions for Bottling Fruits

Fruit Preservation with Chemical

Jams

Various Recipes for Jams

Method of Testing for Setting Point in Jams

Jellies

Marmalades

23. Products of Bakery Industries

Bread

Market Potential

Bread Manufacture

Automatic Process to Manufacture

Bread

Recipes for Bread

Special Breads

Biscuits

Biscuit Raw Materials

Market Potential

Manufacturing Process

Few Points for Making Good Biscuits

Cookies

Equipment's for the Manufacture of Cookies

Fruit Fillings

Pie Crusts

Formulations & Procedures for Pie Crusts

Soda Crackers

Cakes

Common Faults in Cakes

Hard Rolls

Buns

Icings

24. Sugar Candy & Confectionery

Raw Materials for Confectionery

Flavour (For Confectionery)

Examining an Essence

Colours for Confectionery

Manufacture of Hard Candy

Lollypops Manufacture

Toffee and Caramel

Plant and Machinery Details

25. Project Profiles

Automatic Biscuit Making Plant

Bread Plant

Confectionery Industry (Toffee & Candy)

Dairy Products and Milk Packaging

Mineral Water

Processed Food

Roller Flour Mill
