Hot Melt Adhesives (HMA) Manufacturing for Book Binding, Packaging and Courier Bag Profitable Adhesives Production Business Ideas for Entrepreneurs
Hot melt adhesive (HMA), also referred to as hot glue, may be a variety of thermoplastic adhesive that's commonly sold as solid cylindrical sticks of varied diameters designed to be applied using a hot glue gun. The gun uses a continuous-duty component to melt the plastic glue, which the user pushes through the gun either with a mechanical trigger mechanism on the gun, or with direct finger pressure. The glue squeezed out of the heated nozzle is initially hot enough to burn and even blister skin. The glue is tacky when hot, and solidifies during a few seconds to at least one minute. Hot melt adhesives also can be applied by dipping or spraying, and are popular with hobbyists and crafters both for affixing and as an inexpensive alternative to resin casting.

Related Projects: - Adhesives and Sealants, Industrial Adhesives, Glues, Gums and Binders, Synthetic Resin, Resins
In industrial use, hot melt adhesives provide several advantages over solvent-based adhesives. Volatile organic compounds are reduced or eliminated, and therefore the drying or curing step is eliminated. **Hot melt adhesives** have long time period and usually are often disposed of without special precautions. a number of the disadvantages involve thermal load of the substrate, limiting use to substrates not sensitive to higher temperatures, and loss of bond strength at higher temperatures, up to complete melting of the adhesive. This will be reduced by using a reactive adhesive that after solidifying undergoes further curing e.g., by moisture (e.g., reactive urethanes and silicones), or is cured by ultraviolet radiation. Some HMAs might not be resistant to chemical attacks and weathering. HMAs don't lose thickness during solidifying; solvent-based adhesives may lose up to 50–70% of layer thickness during drying.

Types of Hot Melt Adhesives

The two most popular types of hot melt adhesives are ethylene-vinyl acetate (EVA) and polyolefin, or metalloocene.

1. Ethylene-vinyl acetate (EVA) – this type of hot melt adhesive works well with paper and cellulosic materials and features a wide range of formulation. These adhesives set quickly and offer strong resistance properties and operate during a moderate range of temperatures. They’re utilized in the packaging, converting, paper, automotive, and assembly industries, and are a generally cheaper quite hot melt adhesive.

Related Projects: - Hot Melt Adhesives (for Book Binding, Packaging and Courier Bag)
2. Polyolefin – these *hot melt adhesives* are made with a catalyzed metallocene base, and has excellent adhesive qualities and a good faster set speed. It also extremely resistant and services a huge range of temperatures. These adhesives also are utilized in the packaging, converting, and assembly industries, but are limited in their range of available formulations; they're also generally more expensive, but definitely more economical on a per-use basis.
Some Common Examples of Industries Where Hot-Melt Is Used Include:

Closing the flaps of corrugated boxes and paperboard cartons in the packaging industry

Spine gluing in the bookbinding industry

Profile-wrapping, product assembly and laminating applications in the woodworking industry

Disposable diapers are constructed through the use of HMA, bonding the non-woven material to both the back-sheet and the elastics

Many electronic device manufacturers may also use an HMA to affix parts and wires. Or to secure, insulate, and protect the device’s components

Projects: - Project Reports & Profiles
**Uses**

At Present, the Most Common Uses Are the Following:

1. Protective coating of paper, cloth, foil and plastic film.
2. Lamination of the same materials.
3. Structural bonding of paper, wood and other material.
4. Pick up gums and spot labeling.
5. Bonding of ceramics, cork and metal.
6. Production of articles made from paper, foil or film webs including several forms of containers and packages.
7. Sealing of packages and spot joining of small articles.

**Market Research:** - [Market Research Reports, India and Global Industry Analysis](www.niir.org)
With modern application equipment using “progressive feed” and especially with the wide range of adhesive formulations available in cordlike form, a number of varied bond properties have been made possible. Some of these are:

1. Effective bonding of flexible package at - 40°F.
2. Oil-resistive bonds retaining strength on papers with 4 to 6 percent mineral oil.
3. Effective bonding of lightly waxed surfaces.
4. Strong uniform bonding and sealing of polyethylene films and coatings.
5. Strong foil bonding.

**Market Research:** - [Market Research Report](www.entrepreneurindia.co)
The global hot melt adhesives market is probably going to experience significant growth over the upcoming years, due to the growing demand for innovative and improved products by various industrial sectors, such as automotive, construction, packaging, furniture, and non-T woven/hygiene. The rising awareness regarding non-woven/hygiene among the consumers, supportive government policies, growing investments in developing innovative hot melt adhesives are another key factors that are likely to fuel the worldwide hot melt adhesives market within the future.

**Market Research:** - [Market Research Reports, India and Global Industry Analysis](www.niir.org)
Robust industrialization and straightforward availability of raw materials also are expected to drive the demand for decent melt adhesives within the years to return. However, the low thermal resistance of hot melt adhesives may hamper the worldwide hot melt adhesives market growth. Alternatively, the growing number of non-woven and packaging applications within the Asia Pacific and Latin America regions is likely to open new growth avenues for the most important players of the market. The global hot melt adhesives market size was valued at USD 6.7 billion in 2019 and is expected to grow at a compound annual growth rate (CAGR) of 5.2% from 2020 to 2027.

Related Videos: - Adhesives and Sealants, Industrial Adhesives, Glues, Gums and Binders, Synthetic Resin, Resins (Guar Gum, Adhesive [Fevicol Type], Hot Melt Adhesives)
Increasing demand from the packaging and non-woven products application is a significant factor in driving the market growth. Unlike their solvent- or water-based counterparts, hot melt adhesives (HMAs) do not require drying or curing. They can be applied in their molten state and, therefore, can be bonded immediately after the application; this gives them the distinct advantage of faster processing times in various applications including packaging, nonwovens (diapers, and female hygiene products), furniture, industrial assembly, and others.

**Related Books: - Adhesives, Chemical, Drugs, Gums, Insecticides, Jute, Pesticides, Petro Chemicals**
Based on application, it's segmented into packaging, disposables, PS products, bookbinding, furniture, footwear, automobile, textiles and electronics. Demand for superior performance hygiene adhesives is on rise due to the growing need for adult incontinence products, baby diapers and female protection products globally. Hot melts offer high cohesive strength, hold up well against wetness, provide superior adhesion and allow high-speed production lines. Strong demand for decent melt adhesives in construction and packaging industry is major factor driving growth of the worldwide hot melt adhesives market. Additionally, use of hot melt adhesives in automotive industry for endpoint fixing, and increasing demand for hot melt adhesives in pressure sensitive industries are other factors expected to fuel growth of the worldwide hot melt adhesives market over the forecast period.

Projects: - Project Reports & Profiles

www.entrepreneurindia.co
Also, hot melt adhesives can bond with non-porous materials such as glass, metal, and plastics which has increased its demand in market, and increasing adoption of hot melt adhesives in end use application such as leather, labelling bottle, and woodworking, which is another factor expected to drive growth of the worldwide hot melt adhesives market over the forecast period. However, hot melt adhesives are sensitive to higher temperature which loses bond strength at higher temperature may be a key factor restraining growth of the worldwide hot melt adhesives market. Furthermore, compliance with strict regulations in developed countries is expected to hamper growth of the worldwide hot melt adhesives market.

**Related Projects:** - [Hot Melt Adhesives (for Book Binding, Packaging and Courier Bag)](https://www.entrepreneurindia.co)
Tremendous growth within the packaging industry has played an eminent role within the growth of the hot melt adhesives market. Additionally, rapid growth within the non-woven disposables industry too has kept the prospects of the sector high. On the opposite hand, rise within the consumption volume of food products is probably going to make greater opportunities in years to return. Moreover, an increase within the consumption of the healthcare products also are anticipated to open new avenues of growth. Hence, it’s definite that rising consumption of packaged food items and changing lifestyles would keep the future of the market robust.

Books: - [BOOKS & DATABASES](#)
The major trend witnessed within the hot melt adhesives market is that the switch from traditional techniques to new assembly methods by automobile manufacturers are switching. Generally, traditional ways are used to bond the various parts in automobiles, using mechanical fasteners or welds that provide high performance and strength. However, the preferences of consumers for vehicle designs are changing, leading to the event of latest and more sophisticated vehicle designs using lighter gauge metals, plastics, nonferrous metals, and coated steels; thereby creating the need for brand spanking new assembly methods. This is leading to the increasing use of hot melts for joining automobile parts.

**Related Video:** - [Hot Melt Adhesives Production for Corrugated Board](#)
Popularity and demand for decent melt adhesives will still grow over subsequent five years. Demand within the sector adhesives is growing at a rapid rate in the Asia-Pacific region and across global industries that favor hot melt adhesives for his or her long time period and eco-friendliness. These factors save manufacturers and companies thousands, perhaps millions of dollars in production costs every year, and can continue to gain popularity as businesses round the globe continue to cater to an ever-growing environmentally conscience market.

**Related Projects: -** [Hot Melt Adhesives (for Book Binding, Packaging and Courier Bag)](www.entrepreneurindia.co)
India Hot Melt Adhesives Market size is expected to grow during 2020-2026. During the first quarter of 2020, the Indian market is anticipated to witness negative growth in the economy on account of the coronavirus pandemic which has a worse impact on worldwide business. However, during the second half of 2020-2026, the market in India is anticipated to witness recovery and healthy growth in the economic scenario. In terms of types, the Ethylene Vinyl Acetate segment is expected to dominate the hot melt adhesives market in India owing to increasing penetration of the products in a wide range of industries and growing.

Related Video: - Top Business Ideas of Profitable Manufacturing of Adhesives, Glues and Resins
India hot melt adhesive market is expected to register sound revenues within the coming years backed by the rising packaging industry. Increased manufacturing of products required a correct packaging of products in huge cartons by using a hot melt adhesive gun which ensures tightly packed cartons and ensures smooth supply is expected to proliferate the deployment of hot melt adhesive instrument within the country. Further, an increase within the need for manufacturers within the fast packaging process instigates the rapid use of hot melt adhesive products and would instigate the prominent growth of India hot melt adhesive market within the coming years.

Related Projects: - Hot Melt Adhesives (for Book Binding, Packaging and Courier Bag)
Hot Melt Adhesives Market Is Expected To Witness Fastest Growth in APAC

Asia-Pacific (APAC) is that the fastest growing hot melt adhesives market. The market revenue within the region is expected to witness a CAGR of 6.7% during the forecast period. This is often attributed to the increasing need of high-performance materials across various applications and industries such as automotive and electronics, within the region.

The growing environmental concerns within the region are pushing the manufacturers to use eco-friendly products to affect such issues. Hot melt adhesives are often easily disposed without special instructions or hazardous environmental effects. As hot melt adhesives provide eco-friendliness as well as long period of time, its gaining popularity within the region day by day, leading to the hot melt adhesives market growth.
**Hot melt adhesives** are considered ideal for various applications because of their superior properties of high speed manufacturing, large gap filling, bonding versatility, fast green strength (tensile strength), and minimal shrinkage. Along with that, they're very easy to store and don't require any special environment control and may also be applied in high humidity environments. Some of these factors are contributing to the growth of the APAC hot melt adhesives market.

Major Queries/Questions Answered in the Report?

1. What is Hot Melt Adhesives (HMA) Manufacturing industry?

2. How has the Hot Melt Adhesives (HMA) Manufacturing industry performed so far and how will it perform in the coming years?

3. What is the Project Feasibility of Hot Melt Adhesives (HMA) Manufacturing Plant?

4. What are the requirements of Working Capital for setting up Hot Melt Adhesives (HMA) Manufacturing plant?
5. What is the structure of the Hot Melt Adhesives (HMA) Manufacturing Business and who are the key/major players?

6. What is the total project cost for setting up Hot Melt Adhesives (HMA) Manufacturing Business?

7. What are the operating costs for setting up Hot Melt Adhesives (HMA) Manufacturing plant?

8. What are the machinery and equipment requirements for setting up Hot Melt Adhesives (HMA) Manufacturing plant?
9. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up Hot Melt Adhesives (HMA) Manufacturing plant?

10. What are the requirements of raw material for setting up Hot Melt Adhesives (HMA) Manufacturing plant?

11. Who are the Suppliers and Manufacturers of Raw materials for setting up Hot Melt Adhesives (HMA) Manufacturing Business?

12. What is the Manufacturing Process of Hot Melt Adhesives (HMA)?
13. What is the total size of land required for setting up Hot Melt Adhesives (HMA) Manufacturing plant?

14. What will be the income and expenditures for Hot Melt Adhesives (HMA) Manufacturing Business?

15. What are the Projected Balance Sheets of Hot Melt Adhesives (HMA) Manufacturing plant?

16. What are the requirement of utilities and overheads for setting up Hot Melt Adhesives (HMA) Manufacturing plant?

17. What is the Built up Area Requirement and cost for setting up Hot Melt Adhesives (HMA) Manufacturing Business?
18. What are the Personnel (Manpower) Requirements for setting up Hot Melt Adhesives (HMA) Manufacturing Business?

19. What are Statistics of Import & Export for Hot Melt Adhesives (HMA) ?

20. What is the time required to break-even of Hot Melt Adhesives (HMA) Manufacturing Business?

21. What is the Break-Even Analysis of Hot Melt Adhesives (HMA) Manufacturing plant?

22. What are the Project financials of Hot Melt Adhesives (HMA) Manufacturing Business?
23. What are the Profitability Ratios of Hot Melt Adhesives (HMA) Manufacturing Project?

24. What is the Sensitivity Analysis-Price/Volume of Hot Melt Adhesives (HMA) Manufacturing plant?

25. What are the Projected Pay-Back Period and IRR of Hot Melt Adhesives (HMA) Manufacturing plant?

26. What is the Process Flow Sheet Diagram of Hot Melt Adhesives (HMA) Manufacturing project?
27. What are the Market Opportunities for setting up Hot Melt Adhesives (HMA) Manufacturing plant?

28. What is the Market Study and Assessment for setting up Hot Melt Adhesives (HMA) Manufacturing Business?

29. What is the Plant Layout for setting up Hot Melt Adhesives (HMA) Manufacturing Business?

Reasons for Buying our Report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product

• This report provides vital information on the product like it’s characteristics and segmentation

• This report helps you market and place the product correctly by identifying the target customer group of the product
This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials.

The report provides a glimpse of government regulations applicable on the industry.

The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions.
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report
Scope of the Report

While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
• Good Present/Future Demand
• Export-Import Market Potential
• Raw Material & Manpower Availability
• Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Hot Melt Adhesives (HMA) sector in India along with its business prospects. Through this report we have identified Hot Melt Adhesives (HMA) project as a lucrative investment avenue.
