

A vertical strip of fresh green tea leaves is positioned on the left side of the image. The leaves are vibrant green with visible veins and are slightly overlapping each other.

How to Start Tea Cultivation and Processing Business

Introduction

Tea is one of the most popular beverages that are being consumed all over the world. Tea is known as a soothing drink and a way of life. Tea offers tremendous scope of emerging as practical chemopreventive included in a healthy diet for protection of the general consumers by lowering the risk of different types of cancer. Growing tea requires sufficient amount of work and there is additional level of work that must be incorporated to harvest it.

Tea is cultivated in tropical and sub tropical regions. There are various kinds of tea such as black tea, green, oolong tea that can be obtained from real tea plant, *Camellia sinensis*. The making of different varieties of tea mainly depends upon plucking and rolling, spreading, storing process. Quality of the end product in any process industry depends mainly on the raw material and tea is no exception.

A close-up photograph of several vibrant green tea leaves, showing their characteristic shape and vein structure. The leaves are layered, with some in sharp focus and others slightly blurred in the background.

Apart from plucking standard, age of bush, stage from previous pruning, plucking round etc. are some of the important factors that contribute to the quality of the tea shoots. The process of manufacturing tea is extremely simple. Every step in tea processing aims at optimizing and improving the quality of the finished product and yet a mundane quality is difficult to offer. Tea is very beneficial for health and is also known as anticancerinogenic properties.

A close-up photograph of several green tea leaves, showing their characteristic shape and vein structure. The leaves are vibrant green and appear fresh.

Green tea acts as an antiviral agent. This beverage contains a mineral called fluoride that prevents cavities as well as strengthens tooth enamel.

Some of the fundamentals of the book are growth of tea in other countries, tea in Indian economy, antioxidant activity of tea flavonoids, variations in specific compounds, biochemical constituents,

A close-up photograph of several vibrant green tea leaves, showing their characteristic shape and vein structure. The leaves are layered, with some in sharp focus and others slightly blurred in the background.

biochemical changes during leaf processing, pharmacological aspects associated with tea consumption, tea and iron absorption, prevention of coronary heart disease, tea flowers and reproductive phase, techniques of vegetative propagation and clonal selection, technique of the seed bari and grafting etc.

This book deals completely on tea cultivation and manufacturing process.

A vertical strip on the left side of the image shows several green tea leaves, some showing signs of oxidation or aging, with visible veins and stems.

This is a sincere attempt to open up the world of this wonderful beverage, its cultivation methods, types of tea available worldwide, manufacturing process, to the common man. It is hoped that this book will be very helpful to all its readers, entrepreneurs, existing industries, tea broker, tea scientist and tea research establishment.

Table of Contents

1. HISTORICAL EVIDENCES

Tea in India

Growth of Tea in Other Countries

Tea in Indian Economy

2. RELATION WITH HEALTH

The Core Compounds

Flavonoids in Tea Infusion

Antioxidant Activity of Tea Flavonoids

Tea Flavonoids and Cancer

Caveats

3. IMPORTANCE OF THERAPEUTIC COMPOUNDS

Polyphenols

Caffeine
Vitamins
Carbohydrates
Lipids
Triterpenoids
Carotenoids and Pigments
Minerals
Overall Distribution of Compounds

4. PRODUCTION OF THERAPEUTIC COMPOUNDS

Polyphenols
Variations in Specific Compounds
Changes During Processing
Theaflavins and Thearubigins
Discussion

A vertical strip on the left side of the slide shows a close-up of several green tea leaves, some showing signs of oxidation or aging, with visible veins and a slightly textured surface.

5. BIOCHEMICAL CONSTITUENTS

Biochemical Constituents

Enzymes

Polyphenolic Compounds

Amino-acids

Phosphate Esters, Nucleotides and Caffeine

Carbohydrates

Lipids

Chlorophyll and Carotenoids

Volatile Compounds

Biochemical Changes during Leaf Processing

Withering

Rolling

Fermentation

Development of Aroma

Changes in Carotenes and Fatty Acid

Firing

Biochemical Basis of Tea Quality

A vertical strip on the left side of the slide shows several green tea leaves, some with yellowing edges, against a dark green background.

6. PHARMACOLOGICAL PROPERTIES

Pharmacological Actions

Pharmacological Aspects Associated with Tea Consumption

Cardiovascular System

Cancer

Tea and Dental Health

Tea and Fluid Replenishment

Gastrointestinal System

Skin and Topical wound Healing Activity

Antimicrobial Action

Angiogenesis Inhibition

Absorption of Tea Flavonoids

Potential Health Concerns Associated with Tea Consumption

Tea and Iron Absorption

Conclusion

A vertical strip on the left side of the slide shows several green tea leaves, some with yellowish edges, against a dark green background.

7. IMPORTANCE OF BLACK TEA

Composition and Chemistry of Tea

Pharmacological Properties of Tea

Antioxidative Effects of Tea

Modulation of Metabolizing/Detoxifying Enzymes

Modulation of Immune Function

Antimutagenic Activity

Anticarcinogenic Activity

Prevention of Coronary Heart Disease

Germicidal and Antiviral Activity

Regulation of Intestinal Microflora

Prevention of Dental Caries

Conclusion

8. TAXONOMICAL PROPERTIES

Tea Varieties

A vertical strip on the left side of the slide shows a close-up of several green tea leaves with prominent veins.

(1) The China variety
(2) The Assam Variety
(3) The Cambod Variety
Biology of the Plant
Phasic and Vegetative Growth
Tea Flowers and Reproductive Phase
Dormancy
Longevity
Tea Gene Pool
Cytotaxonomy and Chromosome Numbers
Wild Populations of Tea
Germplasm Collection

9. SELECTION, POLLINATION AND PROPAGATION

Development of Seed Varieties
Vegetative Propagation and Development of Clones

Selection for Yield and Quality
Hybridisation
Interspecific Hybridisation
Polyploid Breeding
Mutation Breeding
Tissue Culture and Genetic Engineering
Breeding Strategies
Seed and Clone
Techniques of Vegetative Propagation and Clonal Selection
The Nucleus Plot
Manuring of Mother Bushes
Type of Cuttings
Time of Taking Cuttings
Nursery Bed and Shade
Use of Hormone in V.P.
Clonal Selection Procedure
Mother Bush Selection
Technique of the Seed Bari and Grafting

A vertical strip on the left side of the slide shows a close-up of several green tea leaves with prominent veins.

Bringing into Bearing
Collection
Sorting
Storage and Transport
Upgrading a Seed Bari (Seed Nursery)
Vegetative Propagation (V.P.)
The Mother Bush
The Nucleus Plot
Taking Cuttings
Setting the Cutting

10. CHARACTERISTICS OF SOIL BIOLOGY

Origin and Characteristics of Tea Soils
Soil: Physical Properties
The Basis of Soil Nutrition

Soil Acidity
Soil Physical Properties
Soil Texture
Soil Aggregate
Soil Compactness
Soil Management for Tilt
(a) Drainage
(b) Land Levelling
(c) Cultivation
(d) Lime or Dolomite Applications
(e) Soil Improvement
Soil Biology
Physical Environment
Rainfall
Temperature
Humidity
Wind Speed
Day Length

11. NUTRITIONAL REQUIREMENTS

Nutrient Composition of the Tea Plant

Assimilation of Various nutrients by Parts of the Plant

Individual Nutrients

Nitrogen

Basis of Nitrogen Absorption and Uptake

Sources of Nitrogen

Determination of Quantity for N: K ratio

Phosphorus

Increasing Phosphate Efficiency

Phosphate Uptake and Mycorrhiza

Phosphate Solubilising Microorganisms

Rock Phosphate: Amendments

Interactions of Phosphorus with Other Nutrients

Fertiliser with Soluble Phosphorus

Potash

Potassium Reactions in the Soil

Potassium in Growth Stages of Tea

Factors Affecting Potassium Uptake
Potassium Interactions
Nitrogen: Potash interactions
Interaction with Other Nutrients
Collateral Effects of Potassium
Sulphur
Sulphur Containing Fertilisers
Zinc
Other Micronutrients
Organic Fertilizers
Nutrition and Crop Quality
Deficiency Symptoms

12. GROWTH, PHOTOSYNTHESIS AND RESPIRATION

Carbon Input; Sink Source Ratio
Limitation of CO₂ Assimilation
CO₂ Assimilation and Light Limitation

A vertical strip on the left side of the slide shows a close-up of several green tea leaves, some showing signs of aging or damage.

Regulation of Photosynthesis

Regulation of Photosynthesis by Transport and Partitioning

Effect of Leaf Age on Photosynthesis

Photorespiration and Dark Respiration

Dry Matter Partitioning and Productivity

13. NURSERY MANAGEMENT

Nursery Management

Planting

Land Preparation

Planting Density

Field Planting

Planting Operations

Bringing up of Young Tea and Bush Formation

14. THEORY OF PRUNING, PLUCKING AND MAINTENANCE FOLIAGE

Theory of Pruning

Types of Pruning
Collar Pruning
Medium Pruning
Top or Light Pruning
Lung Pruning
Skiffing
Choice of Pruning System
Tipping
Shoot Growth
Leaf and Bud Dynamics
Plucking
Plucking System
Plucking Standard
Plucking Interval
Plucking and Maintenance Foliage
(1) Pruning: definitions
(2) Requirements before Pruning

- 
- A vertical strip on the left side of the slide shows a close-up of several green tea leaves with prominent veins.
- (3) Pruning Administration
 - (4) Factors Affecting Pruning Time
 - (5) Crop Distribution
 - (6) Pruning Cycles

15. HISTORICAL PERSPECTIVE OF SHADE TREES

Historical Perspective of Shade Problem

The Genesis of Shade Problem

Effect of Shade per se

Shade and Light Intensity

Shade and Tea Leaf Temperature

Effect of Shade Trees on Light Climate

Shade and Partition of Growth

Shade Effect on Quality of Made Tea

Current Perspective

Sylviculture of Shade Trees

Mixture of Shade Tree Species

A vertical strip on the left side of the slide showing a close-up of green tea leaves with prominent veins.

Intimate Mixtures

(a) Square Planting

(b) Triangular Planting

Non-Intimate Mixtures

(1) Tea and Shade Square Planted

Spacing of Shade

(i) Suggested Spacings

(ii) Planting of Shade Trees

Propagation of Shade Trees

16. WATER THEORY

Theory of Drainage

Approach to Drainage Problem

Problems in Tea Areas

Models of Drainage Systems and Water-table

Objective of Drainage

Diagnosis of Drainage Problems

A. Growth Pattern

B. Physical Indicators of Waterlogging
Outline of the Drainage
Designing the Main Drain
The Field Drains and Removal of Surface Water
The Drainage System
Construction of Drains
Pipe Drainage
Rationale of Irrigation
Parameters of Irrigation
Irrigation Requirement: Net and Gross Irrigation
Requirements
Irrigation Frequency
Scheduling of Irrigation
Rainfall Deficit
Types of Irrigation
Irrigation Efficiency
Significance of Irrigation in Total Water Management

A vertical strip on the left side of the slide shows a close-up of several bright green tea leaves with visible veins.

Soil Conservation

Criteria for Water Relation Between Soil and Tea Plants

Moisture

Soil Water

Moisture Extraction Pattern by Tea Roots

Effect of Drainage and Irrigation

Weed Effect

Effects of Weeds on Tea

Biology of Weeds

Weed Reproduction

Weed Density

Growth

Dispersal of Weeds

Weed Dispersal

Methods of Weed Control: The Manual Aspect

Chemical Weed Control

Herbicides in Tea

A vertical strip on the left side of the slide shows a close-up of several green tea leaves with prominent veins.

Herbicide Mixtures
Application Technology
Perspectives on Weed Management
Common Weeds of Tea
A. Dicotyledonous or Broad Leaved Weeds
B. Monocotyledonous and Grass Weeds
Outline of Weed Control
Manual Control
Mechanical Control
Chemical Weed Control
Preplanting Control of Thatch
Additives for Herbicides
Herbicide Mixtures 'Cocktails'
Weed Control Outside the Tea Area
Equipment
Climatic Factors Affecting Weedicide Application
Safety Precautions
Herbicide Damage to Tea

A vertical strip on the left side of the slide shows a close-up of several green tea leaves. The leaves are vibrant green with visible veins and some minor blemishes.

17. DISEASES OF SEEDS AND CUTTINGS

Diseases of Tea Seeds and VP Nursery diseases

Leaf Diseases

Stem Diseases

Root Diseases

Strategies for Controlling Diseases

Outline of Disease Control

Leaf Diseases

Root Diseases

Secondary Stem Diseases

18. PESTICIDE MANAGEMENT

Crop Losses

Mite Phytophagy

Defoliators

Sap Feeding Insects

Root Damaging and Soil-borne Pests

A vertical strip on the left side of the slide shows a close-up of several green tea leaves. The leaves are vibrant green with visible veins and some slight yellowing at the edges.

Pests of Shade Tree and Ancillary Crops
Leaf and Petiole Eaters
Stem Borers
Seasonal Abundance of Pests
Pesticide Specifications for Tea
Pesticides: Applications and Management
Management of Pesticide Residues
Strategies in Pest Management
Outline of Pest Control
Mite Damage
Insect Attacks
Young Tea Sick or Dying
New Flush Stunted

19. BENEFICIAL IN CANCER

Lifestyle and Diet in Cancer
Effect of Tea in Animal Systems

A vertical strip on the left side of the slide shows a close-up of several green tea leaves, some showing signs of oxidation or aging, with visible veins and a slightly textured surface.

Prevention of Cancer in Man
Effects of Tea on the Incidence of Human Cancer
Interaction of Genetic Actions in Carcinogenesis in Humans

20. CANCER PREVENTION

Cancer-an Overview

Cancer and the Intrinsic Defense Machinery of the Host: A
Tug-of-War

Why Cancer Therapy Fails

Dietary Therapy

Why Tea?

Tea and Its Constituents - A Historic view

Hypothesis

(1) Direct Effect of Tea in Tumor Regression

(2) Indirect Effect of Tea in Cancer Prevention: Tea-induced
Tumor Regression by Rejuvenation of Host's Intrinsic Defense
Machineries

Conclusion

21. OXIDATIVE DEGRADATION OF PROTEIN

Materials and Methods

Results

Discussion

22. BIOLOGICAL EFFECT OF POLYPHENOLS

Biological Effects

Chemoprevention

An Overview

23. PREVENTING BONE LOSS

Inhibitors of Bone Resorption

Oestrogen

Calcitonin

Biphosphonates

New Approaches to Inhibition of Bone Resorption
Osteoporosis and Phyto-Oestrogens
Concluding Remarks

24. ANALYSIS OF TEA

Analysis of Green Tea Leaf

Sampling

Polyphenols

Determination of Total Polyphenols

Separation and Identification of the Individual Polyphenols

Determination of Flavonol Glycosides

Determination of Flavylogens

Determination of Phenolic Acids

Amino Acids

Carbohydrates

Chlorophyll

Carotenoids

A vertical strip on the left side of the slide shows a close-up of several green tea leaves, some showing signs of oxidation or aging, with visible veins and a slightly textured surface.

Minerals
Enzymes
Analysis of Manufactured Black Tea
Traditional Methods
Alkaloids
Polyphenols
Separation of the Polyphenols
Analysis of Theaflavins and Thearubigins
Determination of Total Tannin
Cream
The Aroma Complex
Analysis of Instant Tea

25. TEA PROCESSING

Types of Tea
Brief Outline of Tea Manufacturing Process
Withering
Rolling

A vertical strip on the left side of the slide shows a close-up of several green tea leaves. The leaves are vibrant green with visible veins and some slight yellowing at the edges.

Fermentation/Oxidation

Drying

Sorting and Grading

Storage and Packaging

Niir PROJECT CONSULTANCY SERVICES

An ISO 9001:2008 Company

Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Industry Trends*
- *Market Research Reports*
- *Technology Books and Directory*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we serve?

- *Public-sector Companies*
- *Corporates*
- *Government Undertakings*
- *Individual Entrepreneurs*
- *NRI's*
- *Foreign Investors*
- *Non-profit Organizations, NBFC's*
- *Educational Institutions*
- *Embassies & Consulates*
- *Consultancies*
- *Industry / trade associations*

Sectors We Cover

- *Ayurvedic And Herbal Medicines, Herbal Cosmetics*
- *Alcoholic And Non Alcoholic Beverages, Drinks*
- *Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin*
- *Activated Carbon & Activated Charcoal*
- *Aluminium And Aluminium Extrusion Profiles & Sections,*
- *Bio-fertilizers And Biotechnology*
- *Breakfast Snacks And Cereal Food*
- *Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling*

Sectors We Cover *Cont...*

- *Bamboo And Cane Based Projects*
- *Building Materials And Construction Projects*
- *Biodegradable & Bioplastic Based Projects*
- *Chemicals (Organic And Inorganic)*
- *Confectionery, Bakery/Baking And Other Food*
- *Cereal Processing*
- *Coconut And Coconut Based Products*
- *Cold Storage For Fruits & Vegetables*
- *Coal & Coal Byproduct*

- *Copper & Copper Based Projects*
- *Dairy/Milk Processing*
- *Disinfectants, Pesticides, Insecticides, Mosquito Repellents,*
- *Electrical, Electronic And Computer based Projects*
- *Essential Oils, Oils & Fats And Allied*
- *Engineering Goods*
- *Fibre Glass & Float Glass*
- *Fast Moving Consumer Goods*
- *Food, Bakery, Agro Processing*

Sectors We Cover *Cont...*

- *Fruits & Vegetables Processing*
- *Ferro Alloys Based Projects*
- *Fertilizers & Biofertilizers*
- *Ginger & Ginger Based Projects*
- *Herbs And Medicinal Cultivation And Jatropha (Biofuel)*
- *Hotel & Hospitability Projects*
- *Hospital Based Projects*
- *Herbal Based Projects*
- *Inks, Stationery And Export Industries*

Sectors We Cover *Cont...*

- *Infrastructure Projects*
- *Jute & Jute Based Products*
- *Leather And Leather Based Projects*
- *Leisure & Entertainment Based Projects*
- *Livestock Farming Of Birds & Animals*
- *Minerals And Minerals*
- *Maize Processing(Wet Milling) & Maize Based Projects*
- *Medical Plastics, Disposables Plastic Syringe, Blood Bags*
- *Organic Farming, Neem Products Etc.*

Sectors We Cover *Cont...*

- *Paints, Pigments, Varnish & Lacquer*
- *Paper And Paper Board, Paper Recycling Projects*
- *Printing Inks*
- *Packaging Based Projects*
- *Perfumes, Cosmetics And Flavours*
- *Power Generation Based Projects & Renewable Energy Based Projects*
- *Pharmaceuticals And Drugs*
- *Plantations, Farming And Cultivations*
- *Plastic Film, Plastic Waste And Plastic Compounds*
- *Plastic, PVC, PET, HDPE, LDPE Etc.*

Sectors We Cover *Cont...*

- *Potato And Potato Based Projects*
- *Printing And Packaging*
- *Real Estate, Leisure And Hospitality*
- *Rubber And Rubber Products*
- *Soaps And Detergents*
- *Stationary Products*
- *Spices And Snacks Food*
- *Steel & Steel Products*
- *Textile Auxiliary And Chemicals*

Sectors We Cover *Cont...*

- *Township & Residential Complex*
- *Textiles And Readymade Garments*
- *Waste Management & Recycling*
- *Wood & Wood Products*
- *Water Industry(Packaged Drinking Water & Mineral Water)*
- *Wire & Cable*
