Introduction

Are you searching for manufacturing business ideas? If you have sizeable money to invest and a more risk-taking ability, starting a business is a good decision. Product manufacturers can generate new value, minimize costs, and increase operational stability by focusing and prioritizing on four broad areas: production, product design, value recovery, and supply-chain management. Thinking about stepping into manufacturing industry business, you need to consider the option of starting on a limited size production. Starting with the making of essential components of the various industries. Once you set up things well, you could choose to start an industry and gradually become the giant of the industry.

Related Projects:- [Project Reports & Profiles](#)

Get ready and quickly go through these top business ideas that are the best options available with high return on investment. Choose any of these high net profit margin ideas if you want to start a venture in the manufacturing industry: Becoming an entrepreneur easier than ever before—technology is shrinking the world, opening markets, and making it possible for many people to strike out on their own in the field of their dreams. An entrepreneur who starts his own business can break free from this actuarial perspective and redefine the value he brings to the market.

Disposable Nitrile Gloves

Nitrile gloves are a type of disposable gloves made from synthetic rubber, this means there's no risk of latex allergies. They are the most popular gloves type in our range and provide superior strength, dexterity and resistance to oils and aqueous chemicals in comparison to vinyl or latex. For these reasons, they are often utilized in the medical, laboratory and manufacturing industries.

Related Projects:- [Business Ideas after the Covid Breakdown](#)

Nitrile gloves are a good compromise between latex and vinyl. Our Blue nitrile gloves offer protection from bodily fluids providing a barrier that prevents infection, cross-infection or cross-contamination. Tests revealed that nitrile gloves are three times a lot of puncture-resistant than rubber gloves.

Related Projects:- [Project Reports & Profiles](#)

Nitrile gloves protect the wear from a variety of chemicals and blood borne pathogens. Our nitrile Gloves go through an additional process of chlorinating that ease donning. Made of allergy safe compound that seems like latex, but stronger, cheaper and more comfortable. Nitrile exam gloves are the material of choice for many professional users because of its cut resistance, chemical resistance, cost, allergy safe and cleanliness.

Impact of COVID-19 on the Worldwide Disposable Gloves Industry to 2025

The global disposable gloves market is highly competitive. Innovations, sustainability, and regulatory adherence constitute three pillars for the disposable gloves market success. Factors such as the growth in the aging population, awareness of infection prevention standards, and expansion of healthcare infrastructure are the major factors contributing to market growth. However, growth in medical tourism, advancement in surgical techniques and medical equipment, increase in public and private investments and government initiatives, the onset of pandemic diseases, and the rise in chronic diseases are other drivers stimulating the demand for disposable gloves.

Related Projects:- [Project Reports & Profiles](#)

The demand for medical gloves has surged up rapidly in countries such as the UK, China, the US, India, Iran, and Italy due to the outbreak of the COVID-19 pandemic. The disease has increased the importance of hygiene among individuals. The market landscape of disposable gloves, which are fast turning into retail commodities, is expected to be accelerated.

Related Books:- [BOOKS & DATABASES](#)

When a person touches an object/surface contaminated by COVID-19 infected person, and then touches his own eyes, nose, or mouth, he may get exposed to the virus. Although this is not thought to be a predominant mode of transmission, care should be exercised while handling objects/surface potentially contaminated by suspect/confirmed cases of COVID-19.

India disposable gloves market generated \$303 million in 2017, and is projected to reach \$760 million by 2025, growing at a CAGR of 12.4% from 2018 to 2025. In terms of volume, the market is growing at a CAGR of 8.3% from 2018 to 2025.

Indian Kitchen Spices (Masala Powder)

Spices Powder and Blended Spices, Readymade mixes (Red Chilli Powder, Sambhar Masala, Biryani Masala, Chicken Fry Masala, and Garam Masala)

A spice could be a seed, fruit, root, bark, berry, bud or different vegetable substance primarily used for flavoring, coloring or preserving food. Spices are distinguished from herbs that are components of leafy green plants used for flavoring or as a garnish. Many spices have antimicrobial properties. Spices produce a colossal and diverse assortment of organic compounds, the great majority of that don't appear to participate directly in growth and development.

Today, Indian spices are the most sought-after globally, given their exquisite aroma, texture, style and medicinal worth. India has the largest domestic marketplace for spices within the world. Traditionally, spices in India are grown in small land holdings, with organic farming gaining prominence in recent times.

Related Projects:- [Project Reports & Profiles](#)

India is the world's largest producer, consumer and businessperson of spices. Demand for Indian spices is high because they are clean and hygienic as compared to that of different countries.

Related Projects:- [Spices and condiments, Indian Kitchen Spices, Masala Powder](#)

The total market size of branded spices is estimated at 6,600 crore, and is growing at 14 per cent annually. Whereas the “us” is the main importer of Indian spices, conducive sixteen per cent of the whole export value, it's followed by China at 9 per cent. The UAE and Malaysia are at six per cent, whereas Saudi Arabia, Germany, Sri Lanka, Singapore and therefore the UK at four per cent every.

India produces almost all the better-known spices and therefore the country takes pride in being one of the biggest exporters of this commodity. As the spice could be a mass consumption item that's mostly utilized in culinary preparation or seasoning of food merchandise, its internal demand is intensifying progressively. Moreover, the Indian Spices Manufacturer in India uses matured technology-based machinery and quality-conscious resources or stuff to deliver customer-satiating product.

By 2020, the Indian spice market is anticipated to reach USD 18 billion approximately. Looking at the potential in the sector the manufacture of branded spices and spice mixes are expected to get a surge. The Indian government is also aggressively promoting spice exports through various initiatives such as setting up of “spice parks” that offer common processing facilities to both producers and exporters.

Related Books:- [Spices And Condiments Cultivation, Processing And Extraction With Formulation, Ground And Processed Spices, Grinding Of Whole Spices](#)

Food and beverage business is that the most important end user of spices within the world. With an increase in income, the operating class and urban population generally is willing to eat restaurants and experience totally different cuisines. Packaged and frozen food also are utilizing spices to create the food seem a lot of edible while preserving it for an extended time simultaneously. This has been contributing to the market growth of spices and can define its direction within the future years.

The Indian spices market is worth INR 40,000 crore annually. Key spices produced in the country include pepper, cardamom, chilli, ginger, turmeric, coriander, cumin, celery, fennel, fenugreek, ajwain, dill seed, garlic, tamarind, clove, and nutmeg among others. The market is largely unorganized and the branded segment makes up about 15%.

The population in India is surging and the increasing consumer expenditure on food explains the swelling demand for food in India. Accordingly, the demand for spices is expected to grow in the future which will lead to a prominent growth in the revenues from the sales of spices in India. The revenues from India market are expected to expand to around USD 18 billion in FY'2020, growing with a CAGR of ~% from FY'2016 to FY'2020. The highest contribution to this growth is expected to come from the spice mixes and blended spices.

Calcium & Zinc Stabilizer for Pipe and Foam board Application

Stabilisers are added to PVC to allow its processing and to boost its resistance particularly in outdoor applications, weathering and warmth ageing and have an important influence on the physical properties of PVC finished articles. Factors similar to process technology involved, technical requirements of PVC end product, regulatory requirements and cost, influence the choice of the stabilizer used.

Calcium-based stabilisers have additionally been introduced in PVC rigid calendering film production once improved organoleptic characteristics are required, for instance as alternative to tin mercaptides in transparent food packaging application or as alternative to tin carboxylates in PVC blown films shrinkable and for candy wrap. Similarly, calcium-based stabilisers are currently an alternative to Liquid Mixed Metals (LMM) for several flexible applications, particularly for the indoor ones, once stringent air quality requirements are in place (see “VOC improvement” under the liquid stabilisers).

Related projects:- [Chemicals \(Organic, Inorganic, Industrial\) Projects](#)

The use of calcium/zinc stabilizer systems has been common in PVC. Due to the characteristics of calcium/zinc stabilized materials they are wide utilized in several flexible and rigid PVC applications. This type of stabilizing system will provide products that have a high degree of clarity, good mechanical and electrical properties, excellent organoleptic properties and good outdoor weather ability.

Related Books:- [Chemical Technology \(Organic, Inorganic, Industrial\), Fine Chemicals](#)

The global metallic stearate market size was valued at USD 3,017.7 million in 2016. The U.S. metallic stearate market size was recorded at USD 263.9 million in 2016 and is anticipated to grow at a CAGR of over 3% from 2017 to 2025. There are various product types in the industry, including ones based on zinc, calcium, aluminum, and magnesium. The others segment includes, sodium and lithium stearates. The demand for the product in various applications, such as plastics, rubber, pharmaceutical, cosmetics, building & construction, and paints & coatings has increased over the years, and is expected to expand in major markets such as China and India.

Herbal/Ayurvedic Hand Sanitizer

Ayurvedic Herbal Hand Sanitizers provides an effective and convenient way to clean your hands once soaps and water aren't available. The main ingredient within the hand sanitizers are its extracts (Vanilla, Basil and sandalwood, Lemon), Vitamin E, and Tea Tree oil. Vitamin E softens rough and dry hands and it's tested to be treating skin infections and Tea Tree Oil softens dry cuticles and provides relief from itch. This alcohol-based sanitizers kill 99.99% cteria, fungi and prevents from infections. It absorbs in seconds, leaving sweet fragrance and everlasting essence with a sense upon its repetitive usage.

Related Projects:- [Herbs and Herbal Based Products, Ayurvedic Medicines, Cosmetics, Herbs](#)

Hand sanitizer is a gel or foam that kills germs and infectious bacteria. It is used as an alternative to hand-washing, and comes in two main varieties, those that are alcohol-based and those which are not. Hand sanitizer is listed on the WHO's List of Essential Medicines.

Hand sanitizer could be a liquid or gel generally used to decrease infectious agents on the hands. They're on the market as liquids, gels, and foams. Formulations of alcohol-based versions are preferable at hand washing with soap and water in most situations within the healthcare setting. Generally, it's more effective at killing microorganisms than soap and water, with some exceptions similar to nor virus and clostridium difficult. The general use of non-alcohol based mostly versions has no recommendations. Outside the healthcare setting, hand washing with soap and water is generally preferred. Hand laundry should still be carried out if contamination can be seen or following the use of the toilet.

Related Books:- [Herbal Products, Aromatic Plant Cultivation, Processing](#)

India hand sanitizer market is projected to surpass \$ 43 million by 2025. Growth of hand sanitizer market in India can be attributed to rising awareness about healthy lifestyle & wellness, shifting consumer preference towards convenient hygiene products and rising disposable income. Moreover, the strong marketing activities by leading brands, in addition to huge endorsements, are some other drivers of hand sanitizer market in India. Moreover, the COVID-19 outbreak has boosted demand for sanitizers like never before across the diverse end user segments.

Moreover, the strong marketing activities by leading brands, in addition to huge endorsements, are some other drivers of hand sanitizer market in India. Moreover, the COVID-19 outbreak has boosted demand for sanitizers like never before across the diverse end user segments.

Active Pharma Ingredients (API)

Amoxicillin Trihydrate, Azithromycin & Paracetamol

Active pharmaceutical ingredients are the active substances that are utilized in the manufacture of a drug and have a pharmacological impact. They provide health advantages and play an important role in disease diagnosis, prevention, and treatment. Active pharmaceutical ingredients may be synthesized either with chemicals or through biotechnological methods.

The Active Pharmaceutical Ingredient (API) is that the part of any drug that produces the intended effects. Some drugs, such as combination therapies, have multiple active ingredients to treat totally different symptoms or act in different ways that.

Related Videos:- [Pharmaceutical, Drugs, Fine Chemicals, Bulk Drug Intermediates, Pharmaceutical Drugs, Pharma Drug Ingredients Intermediates, Pharmaceutical Bulk Drugs](#)

Active Pharmaceutical Ingredient (API), is the term used to visit the biologically active component of a drug product (e.g. tablet, capsule). Drug product are usually composed of many components. The aforementioned API is that the primary ingredient. Alternative ingredients are usually known as "excipients" and these substances are always required to be biologically safe, usually creating up a variable fraction of the drug product. The procedure for optimizing and compositing this mixture of components utilized in the drug is known as "formulation."

India is the seventh largest country in the world and has the second highest population. It has a parliamentary democratic form of government and has abundant natural resources and sufficient oil reserves. The country has a huge skilled, English-speaking, and inexpensive labor force. Its young population and current economic policies have made it one of the largest recipients of FDI in the world.

Related Books:- [Pharmaceutical, Drugs, Proteins Technology Handbooks](#)

The global active pharmaceutical ingredient market size is expected to reach a value of USD 286.6 billion by 2027, registering a CAGR of 6.7% over the forecast period. Factors, such as increasing preference for outsourcing APIs and growing prevalence of various target diseases such as cancer and Cardiovascular Diseases (CVDs) are expected to drive the market growth.

Majority of specialty API companies are increasing their manufacturing facilities for specialty active pharmaceutical ingredients (API) to take care of or gain market share. Substantial investments within the growth of approved specialty active pharmaceutical ingredients (API) is one in all the most important factors among key players in the specialty active pharmaceutical ingredients (API) market.

The emergence of COVID-19 has brought the world to a standstill. We perceive that this health crisis has brought an unprecedented impact on businesses across industries. However, this too shall pass. Rising support from governments and several companies will help within the fight against this highly contagious disease. There are some industries that are struggling and some are thriving. Overall, almost each sector is anticipated to be impacted by the pandemic.

Related Projects:- [Pharmaceutical, Drugs, Fine Chemicals, Bulk Drug Intermediates](#)

Surgical & N95 Masks

A surgical mask, additionally referred to as a procedure mask, medical mask or just as a face mask, is meant to be worn by health professionals during surgery and through nursing to catch the bacteria shed in liquid droplets and aerosols from the wearer's mouth and nose. They not designed to protect the user from breathing airborne bacteria or virus particles and are less effective than respirators, similar to N95 or FFP masks, which provide better protection thanks to their material, shape and tight seal.

Related Projects:- [Surgical, Medical Plastics, Medical Disposables, Disposable Medical Products used in Hospitals](#)

Surgical masks are designed to stay operating rooms sterile, preventing germs from the mouth and nose of a user from contaminating a patient throughout surgery. Though they need seen an increase in popularity among consumers throughout outbreaks similar to the coronavirus, surgical masks don't seem to be designed to filter out viruses, that are smaller than germs.

The India surgical mask market accounted for \$58 million in 2017, and is projected to reach \$95 million by 2025, registering a CAGR of 6.1% from 2018 to 2025. Surgical masks are made of natural fiber, such as cotton or disposable linen or synthetic materials, such as polypropylene. They are made of different layers including a hydrophobic outer layer, a middle filtering layer, and an inner hydrophilic layer to absorb the fluid and moisture. They are used as a barrier to avoid cross contamination by microorganisms and are used during surgical procedures. The surgical mask is used by surgeons during procedures and other medical professionals while interacting with the patients to avoid cross contamination of microorganisms.

Related Books:- [Disposable Products \(Medical, Surgical, Thermocol, Plastic, Paper, Domestic And General Products\)](#)

The world is currently experiencing the pandemic of an infectious disease called COVID-19. This infection leads to multiple organ failure, acute & severe respiratory disorders, pneumonia, and even death in severe cases. Hence, surge in number of people with coronavirus infections is anticipated to drive the global surgical face masks market.

Related Videos:- [Industrial, Medical and Specialty Gases Manufacturing Project Ideas](#)

The effectiveness of surgical face mask in blocking the transmission of SARS is 68%. Therefore, it is widely used by medical workers as part of droplet transmission precaution when caring for patients with respiratory infections. Hence, increase in use of surgical face masks is projected to fuel the growth of the global surgical face masks market. Furthermore, vulnerable populations, such as older adults with chronic conditions, are at high risk of infectious diseases, including COVID-19. Hence, the use of face mask to prevent infections by the geriatric population is anticipated to drive the global market.

Biodegradable Plastic Bags from Corn & Cassava Starch Granules

Biodegradable plastic is plastic that decomposes naturally within the environment. This is achieved when microorganisms within the environment metabolize and break down the structure of biodegradable plastic. The end result's one that is less harmful to the environment than traditional plastics.

Corn starch is blended with appropriate plasticizer, lubricants and different chemical additives and processed in a twin screw extruder to produce thermoplastic starch pellets or granules. These pellets are further processed to manufacture cast or blown films.

Related Projects:- [Biodegradable Products, Recyclable, Disposable, Eco-Friendly Plastics, Bioplastics](#)

If disposed of correctly, packaging material made from cornstarch can break down into carbon dioxide and water inside several months. However, if the material isn't disposed of correctly cornstarch-based material can take longer to decompose, especially if there's no oxygen or light on the market.

The global biodegradable plastic packaging market was valued at USD 4.65 billion in 2019, and is expected to reach a market value of USD 12.06 billion by 2025, registering a CAGR of 17.04% during the forecast period of 2020-2025. Growing environmental concerns regarding plastic usage that consists of toxic pollutants which are harming plants, animals, and people are driving the use of biodegradable plastic.

Related Books:- [Environmentally Friendly, Eco-Friendly Products, Natural Products, Biodegradable Plastics, Natural Dyes And Pigments, Jute Products, Natural Fibers](#)

Stringent regulations by various government and federal agencies with an objective to reduce plastic waste and promote biodegradable plastics usage in packaging is boosting the demand of this market. Regulations related to green packaging is increasing and various FMCG companies are required to adopt biodegradable packaging to comply with the standards which in turn is propelling the growth of this market.

Biodegradable plastic is plastic that decomposes naturally in the environment by the action of microorganisms in the environment that metabolize and break down the structure of biodegradable plastic. The end result is one which is relatively less harmful to the environment than the traditional plastics. Non-decomposable plastics are a global environmental problem. Governments around the world are dealing with this problem by banning single-use plastics and promoting biodegradable plastics. Moreover, consumers are willing to pay more for biodegradable plastics owing to their eco-friendly nature. Moreover increasing use of biodegradable plastics in packaging and agriculture sectors is projected to drive the global biodegradable plastics market.

Related Videos:- [biodegradable products](#)

Hydrated Lime Production from Limestone

The term “hydrated lime” is wide used to describe a fine calcium hydroxide product created by reacting quicklime with a controlled far more than water. The product is essentially dry and usually contains less than 1% of un-reacted water. The method is named “hydration” and should be differentiated from “slaking” that involves the production of a dispersion of calcium hydroxide in water. However, the expression “slaked lime” is used as a generic term for hydrated lime, milk of lime and lime putty. An estimated 10 to 15% of the lime produced in developed countries is converted in to hydrated lime and therefore the percentage may be higher in countries which don't have a large industry. Because hydrating plants are relatively complex and may be fed with surplus grades of quicklime, there are relatively few of them and they are commonly settled at a lime works. While the chemical reactions involved within the formation of hydrated lime are easy, the physical chemistry is complex.

Related Books:- [Chemical Technology \(Organic, Inorganic, Industrial\), Fine Chemicals](#)

Lime is second to petroleum as the world's most widely used chemicals. It's used for coagulation, hydroxylation and absorption. Lime could be a major component of fertilizer and soil conditioner in agriculture. Within the preparation of insecticides, medicines and stock feeds, lime is used. Within the chemical industries, leather industries use lime extensively for liming. Different industries that use lime include cement, soap, steel and paper industries.

Related Projects:- [Chemicals \(Organic, Inorganic, Industrial\) Projects](#)

The global hydrated lime market size will grow by 31.24 MMT during 2018-2022. In terms of value, the global lime market is anticipated to expand at a CAGR of ~ 6% and reach a value of US\$ ~65.4 Bn by 2027. Hydrated Lime is a caustic solid substance, white when pure and is obtained by claiming limestone and others forms of calcium carbonates. Hydrated lime has become one of the most important industrial minerals because of its chemical and physical properties, as well as its commercial importance and the simplicity in its production. They are agriculture, water treatment, building, tannery, food processing, breweries, and soft drink, paint and chemical industries.

On the basis of geography, the worldwide hydrated lime market is segmented into nine key regions, namely, South East Asia Pacific, Latin America, Western Europe, middle east & Africa, China, Japan, Eastern Europe, and India. With growing investments within the Latin America region in the construction sector, the market within the region is projected to witness significant traction. Further, an increase of coal mining and therefore the production of coal in the Asian market are expected to subsequently drive the demand for hydrated lime at the regional level. Increasing demand for pesticides from the South East Asia Pacific region, the hydrated lime market is estimated to grow with a healthy growth rate. Also, China and India are major consumers of hydrated lime. In term of steel production, Europe dominates the market (the region has 168.7 million metric tons production of steel in 2017), owing to that, the demand for hydrated lime in Europe can increase in next few years.

Major Queries/Questions Answered in Our Report?

- 1. How has the industry performed so far and how will it perform in the coming years?**
- 2. What is the Project Feasibility of the Plant?**
- 3. What are the requirements of Working Capital for setting up the plant?**
- 4. What is the structure of the industry and who are the key/major players?**

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

- 10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?**
- 11. What is the Manufacturing Process of the plant?**
- 12. What is the total size of land required for setting up the plant?**
- 13. What will be the income and expenditures for the plant?**
- 14. What are the Projected Balance Sheets of the plant?**

- 15. What are the requirement of utilities and overheads for setting up the plant?**
- 16. What is the Built up Area Requirement and cost for setting up the plant?**
- 17. What are the Personnel (Manpower) Requirements for setting up the plant?**
- 18. What are Statistics of Import & Export for the Industry?**
- 19. What is the time required to break-even?**

- 20. What is the Break-Even Analysis of the plant?**
- 21. What are the Project financials of the plant?**
- 22. What are the Profitability Ratios of the plant?**
- 23. What is the Sensitivity Analysis-Price/Volume of the plant?**
- 24. What are the Projected Pay-Back Period and IRR of the plant?**
- 25. What is the Process Flow Sheet Diagram of the plant?**
- 26. What are the Market Opportunities for setting up the plant?**
- 27. What is the Market Study and Assessment for setting up the plant?**
- 28. What is the Plant Layout for setting up the plant?**

Reasons for Buying Our Report:

- **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **The report provides vital information on the product like it's characteristics and segmentation**
- **The report helps you market and place the product correctly by identifying the target customer group of the product**

- **The report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

NIIR PROJECT CONSULTANCY SERVICES

AN ISO 9001: 2015 CERTIFIED COMPANY

Who are We?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

What do We Offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Market Research Reports*
- *Technology Books and Directory*
- *Industry Trend*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are We Different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
- *We use authentic & reliable sources to ensure business precision*

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

Sectors We Cover *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

Sectors We Cover *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

Sectors We Cover *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

Sectors We Cover

Cont...

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

Sectors We Cover *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects

Data Sources

Scope & Coverage

Our Team

∞ Our research team comprises of experts from various financial fields:

∞ MBA's

∞ Industry Researchers

∞ Financial Planners

∞ Research veterans with decades of experience

Structure of the Report

- 1. Overview
- 2. Market Analysis
 - 2.1 Growth Drivers
 - 2.2 Emerging Trends in the Industry
 - 2.3 Regulatory Framework
 - 2.4 SWOT Analysis
 - 2.5 Herfindahl–Hirschman Index (HHI)
- 3. Market Forecasts
- 4. Key Players

Structure of the Report

Cont

⌘5. Key Financials and Analysis

⌘5.1 Contact Information

⌘5.2 Key Financials

⌘5.3 Financial comparison

⌘6. Industry Size & Outlook
