# ***Synthetic Camphor***

**Industry.**

**Most Profitable  
Manufacturing Business to  
Start.**

# Introduction

Camphor, popularly referred to as 'kapur' in Hindi, could be a common product on the market in Indian household. From puja to skin care, from an area freshener to an essential oil, kapur is used in different forms. The strong fragrance of camphor is loaded with healing properties, whereas additionally being best-known for spreading positivity.

Synthetic camphor is conventionally prepared from the extracts of the camphor tree. Whereas the one produced using chemical synthesis is understood as synthetic camphor. One among the foremost necessary raw material utilized within the manufacturing of synthetic camphor is turpentine oil.

The increasing awareness on the subject of the air purifying attributes, the requirement for synthetic camphor powder has witnessed an increase from the downstream manufacturers of synthetic camphor tablets. Variety of producers are additionally noted to produce tablets over and higher than of powder on top of extending the 2 antecedently mentioned grades of synthetic camphor.

The growing extent of uses of plastics has likewise established to act within the backing of synthetic camphor since it's utilized a similar as a plasticiser in the manufacturing of PVC plastics and celluloid. The formulations are additionally noted to be helpful during a few health diseases. In spite of the very fact that it isn't endorsed for the oral course of administration on account of its toxicity, it's generally utilized within the creating of topical drug additionally as inhalant formulations. Being delegated over-the-counter (Over the Counter) furthermore as non-pharmaceuticals sales expand the development of such products as well as have an aberrant however important effect on the worldwide market, observing its worldwide demand.

## Uses/ Benefits:-

Synthetic camphor is used within the manufacture of cellulose nitrate, polyvinyl chloride and plastics. It also can function medication, antiseptic, insecticide, etc. It may be used as an ingredient in explosive, as a stabilizer and a moderator to enhance ballistic properties.

Camphor (Cinnamomum camphora) could be a hydrocarbon (organic compound) that's ordinarily utilized in creams, ointments, and lotions. Camphor oil is that the oil extracted from the wood of camphor trees and processed by steam distillation. It may be used locally to alleviate pain, irritation, and skin sensation.

**Related Projects: - [Chemicals \(Organic, Inorganic, Industrial\) Projects](#)**

There are two kinds of camphor – the edible camphor and therefore the synthetically created camphor. Camphor is used to be created by distilling the bark and wood of the camphor (kapur) tree. Today, camphor is with chemicals factory-made from turpentine oil.

Camphor is extremely a lot of an area of the daily prayer time wherever lighting a wee little bit of camphor and breathing its lingering aroma marks the culmination of a prayer session.

Relieves Pain and Swelling

Alleviates Skin Rashes

Treatment of Nail Fungus

Used to Treat Eczema

Helps Induce Sleep

Treats Cold and Cough

Promotes Hair Growth

Home Remedy for Head Lice

## Application:-

Pharmaceuticals

Agriculture

Chemicals Industry

Food industry

## Production:-

Made from the wood of camphor tree, largely found in Japan, Taiwan, and Vietnam. With the growing best-known uses of camphor in chemical industries, Japan raised the costs within the late nineteenth century. This eventually led to the event of synthetic camphor. Camphor created through camphor wood provides a paltry yield. Was developed within the early 20th century. Less expensive and scalable. Produced from pine tree that is profusely on the market. Provides a yield of about 90%.

Although Asian nation has teeming pine tree however the output from India variety is simply 17% compared to 80% from the imported variety. This explains the import of turpentine for these camphor corporations. Production through synthetic route is at a fraction of cost and available abundantly.

- Natural camphor price is at least 3x of Synthetic camphor.
- Technical grade (93-94% purity) - Used in Puja
- Pharmaceutical grade (98% purity) - Used in pharma

The industry is asset light, without the use of any technology implying very little barriers of entry. Because of not having the requirement of technology know how there exists a number of smaller players rendering the market highly fragmented.

**Related Books:** - [Chemical Technology \(Organic, Inorganic, Industrial\), Fine Chemicals](#)

## Market Outlook

Camphor could be a cyclic monoterpene organic compound found wide in plants, particularly cinnamomum camphora. Topically, camphor is used to alleviate pain. It has been wont to treat warts, cold sores, hemorrhoids, and degenerative arthritis. It's additionally been applied locally as an analgesic and a local anesthetic. It's been used as a medicinal [drug](#), and to increase native blood flow. Camphor has frequently been used topically to treat tract diseases involving mucous membrane inflammation. It's sometimes used topically to treat viscous symptoms. Camphor is additionally used topically as an earring, and for treating minor burns. In inhalation medical aid, camphor is used as a medication. Orally, camphor is used as a medication, hymenopter us insect flatulent, and for treating tract diseases. Today, most camphor is synthetic.

A key factor proscribing adoption is laws on the utilization of synthetic camphor in pharmaceutical product, the classification of bound camphorated oil products would require patients to carry doctor's prescription for consumption. Moreover, rising costs of raw materials like turpentine oil is rising as a key concern for manufacturers producing pharma-grade synthetic camphor. Camphor is traditionally prepared by distilling the bark and wood of the camphor tree natural camphor. However, today camphor is prepared synthetically from turpentine oil. Synthetic camphor generally contains racemic mixtures of d & l isoforms of camphor DL-camphor. There are two varieties of synthetic camphor viz. Technical grade camphor 93-94% purity and Pharmaceutical grade camphor 98% purity.

The market value for pharmaceutical grade synthetic camphor. Pharma-grade Synthetic Camphor manufacture is mainly concentrated in Asia Pacific regions mainly in India and China and they export their raw material to Europe or U.S.

The global market for synthetic camphor is estimated to be valued at US\$ 322.3 MN by the end of 2018 and is expected to reach a market value of US\$ 571.6 MN by the end of 2028, expanding at a CAGR of 5.9% over the forecast period. The global market is anticipated to represent incremental opportunity worth US\$ 249.3 MN between 2018 and 2028.

The abrupt rise in the prices of synthetic camphor while the cost of its raw material has remained stable is due to the supply shortage of synthetic camphor in the market. As a counteraction to this, several market participants are focused towards ramping up their production capacities. These manufacturers are involved in exporting their products and are channelizing their efforts towards establishing channel partners in their respective target markets.

## Key Players:-

- Merck KGaA
- Saptagir Camphor Limited
- Mangalam Organics Limited
- Nippon Fine Chemical
- Rochem International
- Spectrum Chemical Mfg.
- Aldon Corporation
- Prinova Group

- Fengchen Group
- Camphor & Allied Products Ltd.
- KanchiKarpooram Ltd.
- Oriental Aromatics Ltd.
- Vinayak Ingredients (India) Pvt. Ltd.

# Major Queries/Questions Answered in the Report?

1. What is Synthetic camphor Manufacturing industry ?
2. How has the Synthetic camphor Manufacturing industry performed so far and how will it perform in the coming years ?
3. What is the Project Feasibility of Synthetic camphor Manufacturing Plant ?
4. What are the requirements of Working Capital for setting up Synthetic camphor Manufacturing plant ?

**5. What is the structure of the Synthetic camphor Manufacturing Business and who are the key/major players ?**

**6. What is the total project cost for setting up Synthetic camphor Manufacturing Business?**

**7. What are the operating costs for setting up Synthetic camphor Manufacturing plant ?**

**8. What are the machinery and equipment requirements for setting up Synthetic camphor Manufacturing plant ?**

**9. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up Synthetic camphor Manufacturing plant ?**

**10. What are the requirements of raw material for setting up Synthetic camphor Manufacturing plant ?**

**11. Who are the Suppliers and Manufacturers of Raw materials for setting up Synthetic camphor Manufacturing Business?**

**12. What is the Manufacturing Process of Synthetic camphor ?**

- 13. What is the total size of land required for setting up Cement Manufacturing plant ?**
- 14. What will be the income and expenditures for Cement Manufacturing Business?**
- 15. What are the Projected Balance Sheets of Cement Manufacturing plant ?**
- 16. What are the requirement of utilities and overheads for setting up Cement Manufacturing plant?**
- 17. What is the Built up Area Requirement and cost for setting up Cement Manufacturing Business?**

**18. What are the Personnel (Manpower) Requirements for setting up Synthetic camphor Manufacturing Business?**

**19. What are Statistics of Import & Export for Synthetic camphor ?**

**20. What is the time required to break-even of Synthetic camphor Manufacturing Business?**

**21. What is the Break-Even Analysis of Synthetic camphor Manufacturing plant?**

**22. What are the Project financials of Synthetic camphor Manufacturing Business?**

- 23. What are the Profitability Ratios of Synthetic camphor Manufacturing Project?**
- 24. What is the Sensitivity Analysis-Price/Volume of Synthetic camphor Manufacturing plant?**
- 25. What are the Projected Pay-Back Period and IRR of Synthetic camphor Manufacturing plant?**
- 26. What is the Process Flow Sheet Diagram of Synthetic camphor Manufacturing project?**

- 27. What are the Market Opportunities for setting up Synthetic camphor Manufacturing plant?**
- 28. What is the Market Study and Assessment for setting up Synthetic camphor Manufacturing Business?**
- 29. What is the Plant Layout for setting up Synthetic camphor Manufacturing Business?**

# Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# **Scope of the Report**

**The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Synthetic camphor .” provides an insight into Synthetic camphor market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Synthetic camphor project. The report assesses the market sizing and growth of the Indian Synthetic camphor Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Synthetic camphor sector in India along with its business prospects. Through this report we have identified Synthetic camphor project as a lucrative investment avenue.**

### ▪ Detailed Project Reports

**NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.**

**Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.**

**And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:**

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,**

**Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.**

**We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)**

## Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

*We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.*

*We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.*
