**Learn More About This New Industry**

**Opportunities in Women Hygiene Products**

# Introduction

**A sanitary napkin, sanitary towel, sanitary pad, menstrual pad, or pad is an absorbent item worn by women in their underwear when menstruating, bleeding after giving birth, recovering from gynecologic surgery, having a miscarriage or abortion, or in any other situation where a flow of blood from the vagina is required to be absorbed.**

**A menstrual pad is a form of period hygiene product that is worn on the outside of the vaginal canal, as opposed to tampons and menstrual cups, which are worn within. Pads are often replaced by removing the pants and panties, removing the old pad, placing the new pad on the inside of the underwear, and drawing the panties back on. To avoid specific bacteria that might fester in blood, pads should be changed every 3–4 hours.**

**however, this period may vary according on the type worn, the flow, and the time it is worn. The majority of sanitary pads on the market are disposable. The majority of reusable sanitary pads are cotton pads that may be washed, dried, and reused multiple times. Sanitary napkins are classified as nonwoven fabrics, which are classified as technical textiles as a whole.**

**Sanitary napkins absorb and retain menstrual fluid while also isolating menstrual fluids from the body. No leaking, no unattractive appearance or colour, no odour, no noise, stay in place, pleasant to wear (thin body form), and a high level of hygiene are important and desired features.**

# Different Types of Sanitary Napkins

**Disposable Sanitary Napkins come in a variety of styles:**

**1. Panty liner:** For everyday vaginal discharge, light menstrual flow, "spotting," slight urinary incontinence, or as a backup for tampon or menstrual cup use.

**2. Ultra-thin:** A very small (thin) pad that may be as absorbent as a Regular, Maxi/Super, or Super-thin pad but with less volume.

- 3. Regular:** A pad with a medium level of absorbency.
- 4. Maxi/Super:** A bigger absorbency pad that is especially useful at the beginning of the menstrual cycle, when menstruation is frequently the heaviest.
- 5. Overnight:** A lengthier pad with an absorbency ideal for overnight usage to provide greater protection while the wearer is lying down.
- 6. Maternity:** These are slightly longer than a maxi/Super pad and are designed to absorb lochia (bleeding after childbirth) as well as pee.

**Sanitary napkins absorb and retain menstrual fluid while also isolating menstrual fluids from the body. No leaking, no unattractive appearance or colour, no odour, no noise, stay in place, pleasant to wear (thin body form), and a high level of hygiene are important and desired features. Women use menstrual pads to absorb period flow and protect their clothing and belongings. They are usually individually wrapped to make carrying them in a handbag or bag easier and more unobtrusive.**

**This wrapper can be used to wrap dirty pads before throwing them away in the proper containers. Some women prefer to use toilet paper to wrap the pads instead of (or in addition to) the wrapper, which is often composed of slick plastic with a little tape tab and may not adhere well. Menstrual pads of any kind should not be flushed since they can clog the toilet. Soiled pads are nearly always placed in a receptacle in public bathrooms in developed countries.**

**If gauze is unavailable or insufficient, they make good first-aid dressings for excessive bleeding due to their high absorbency. Menstrual pads are used by many women who have urine incontinence to control bladder leaks. Menstrual pads, on the other hand, are meant to absorb menstrual flow and are not as successful at absorbing urinary leakage; incontinence pads are. If a woman is menstruation and does not have sanitary napkins on hand, she may use toilet paper as a temporary substitute.**

# Market Outlook

**In the year 2020, the sanitary napkin industry will be worth almost USD 521.5 million. Between 2021 and 2026, the market is predicted to increase at an annual rate of 11%, reaching a value of around USD 975.4 million. Hygiene and health of women are key problems all around the world. A sanitary napkin is an absorbent material that a woman uses during her menstrual period. The materials used to make sanitary napkins are cellulose, polyethylene, and cotton.**

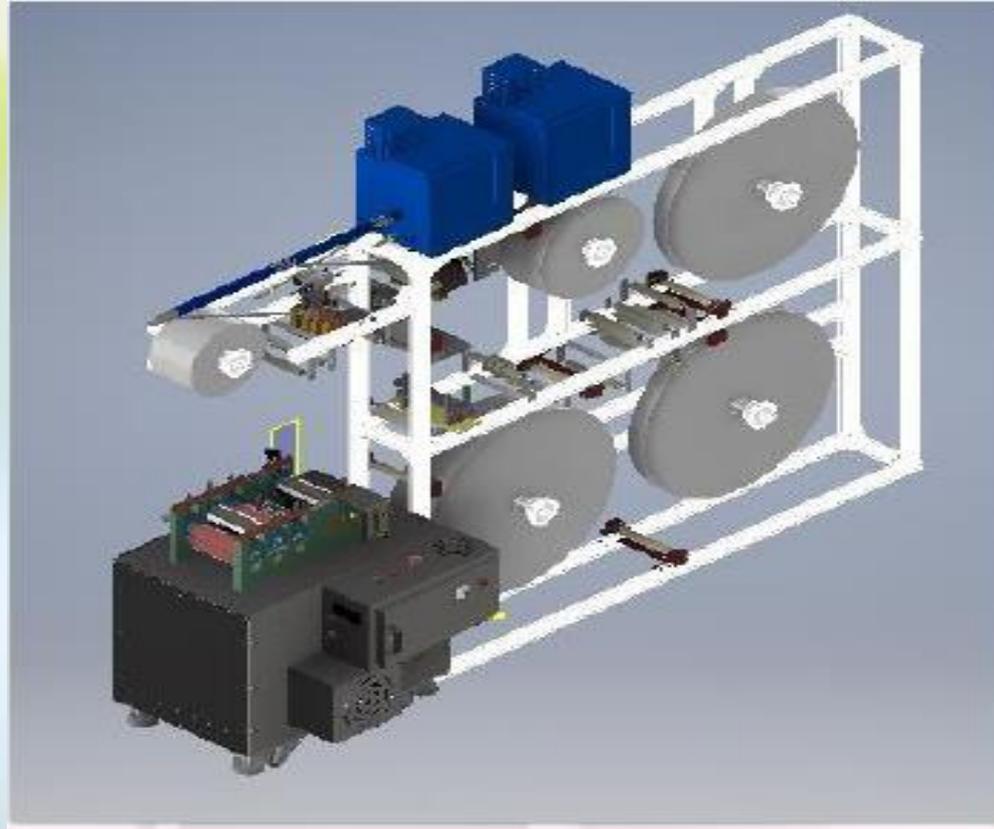

**Manufacturers are expected to boost their CSR (corporate social responsibility) initiatives relating to women's hygiene and focus on unexplored rural markets. Wings napkins, aromatic napkins, quilted linings, panty liners, and pad thickness reduction are only a few of the key advances in the sanitary napkin business. Traditionally, sanitary napkins have been constructed of rayon and hydrophilic wood pulp.**

**Fluids soak slowly through these materials. Manufacturers are currently adopting ultra-absorbent polymers and non-woven materials that absorb fluid faster than standard sanitary napkins. Furthermore, these materials reduce the sanitary napkin's thickness. During the forecast period, all of these factors are projected to boost the sanitary napkin market.**

**Various factors such as changing sanitary napkin buying habits, an increase in the number of working women, more awareness about female hygiene, and rising health concerns are all contributing to the global market's rise. Governments are also encouraging enterprises to run hygiene campaigns and develop marketing strategies in order to modify women's opinions and build their self-confidence and self-esteem, propelling the global sanitary napkin industry.**

# Reasons for Buying Our Report

- ✓ **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ✓ **This report provides vital information on the product like it's characteristics and segmentation**
- ✓ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ✓ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ✓ **The report provides a glimpse of government regulations applicable on the industry**
- ✓ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

# Our Approach

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

# Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Sanitary Napkins.” provides an insight into Sanitary Napkins market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Sanitary Napkins project. The report assesses the market sizing and growth of the Indian Sanitary Napkins Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Sanitary Napkins sector in India along with its business prospects. Through this report we have identified Sanitary Napkins project as a lucrative investment avenue.

The main title 'Market Research Report' is centered on the page. It is written in a large, bold, blue sans-serif font with a prominent yellow outline. The text is arranged in three lines: 'Market' on the top line, 'Research' on the middle line, and 'Report' on the bottom line. The background of the entire page is a low-angle photograph of a modern city skyline with glass skyscrapers reaching towards a clear blue sky. A person in a white shirt and dark tie is visible in the lower right, looking up at the buildings.
