Manufacturing of Needles for Sewing and Embroidery Machine

Opportunities for Entrepreneurs to Start Own Industry

www.entrepreneurindia.co

www.niir.org
Introduction

A sewing needle, used for hand-sewing, may be a long slender tool with a pointed tip at one end and a hole (or eye) at the other. The earliest needles were manufactured from bone or wood; modern needles are manufactured from high steel wire and are nickel- or 18K gold-plated for corrosion resistance. Top quality embroidery needles are plated with two-thirds platinum and one-third titanium alloy. Traditionally, needles are kept in needle books or needle cases which became objects of decoration. Sewing needles can also be kept in an étui, little box that held needles and other items like scissors, pencils and tweezers. There are only two varieties of sewing needles for sewing by hand and needle for sewing on a machine.

Related Project: - Needles For Sewing and Embroidery Machine
Needle size

Needle size is denoted by one or more numbers on the manufacturer's packet. The general convention for sizing of needles, like that of wire gauges, is that within any given class of needle the length and thickness of a needle increases as the size number decreases. For example, a size 9 needle will be thicker and longer than a size 12 needle. However, the needle sizes are not standardized and so a size 10 of one class may be (and in some cases actually is) either thinner or finer than a size 12 of another type. Where a packet contains a needle count followed by two size numbers such as "20 Sharps 5/10" the second set of numbers correspond to the range of sizes of needle within the packet, in this case typically ten sharps needles of size 5 and ten of size 10 (for a total of 20 needles). As another example, a packet labeled "16 Milliners 3/9" would contain 16 milliners’ needles ranging in sizes from 3 to 9.

**Industrial Sewing Machine**

Industrial sewing machine segment accounts for a few 8% of the entire market size in terms of number of machines, but about two thirds in terms useful. The estimated rate of growth within the overall garments sector is placed at over 10% which is able to increase the demand of sewing needles too. Being the fourth largest economy within the world by GDP in terms of buying power parity (PPP) and donning second largest human conglomerate exceeding one billion by number, India certainly offers the potential of a huge potential market.

**Related Project:** - [Needles For Sewing and Embroidery Machine](http://www.niir.org)
A sewing machine needle is a specialized needle for use in a sewing machine. A sewing machine needle consists of:

- **Shank** - clamped by the sewing machine's needle holder
- **Shoulder** - where the thick shank tapers down to the shaft
- **Shaft** - a length suitable for driving the eye and thread through the material and down to the bobbin
- **Groove** - cut in the front of the shaft to allow the thread to lie more closely to the needle as it passes through the fabric
- **Scarf** - provides extra room for the hook or shuttle to pass close by
- **Eye** - carries the thread
- **Point** - penetrates the material by either parting the threads or cutting a hole in the fabric

**Market Research:** - [Market Research Report](https://www.niir.org)
Household sewing machines are available within the market in various formats. The most classification of household sewing machines is on the idea of drive mechanism. The two prominent drive mechanisms involved in household sewing machines are mechanical and electrical. The mechanical drive uses human efforts to spin the wheel while it's motor within the latter's case. Because the name suggests, the household sewing machines are used to stitch basic household clothes in various cases. As most of the housewives use these machines for embroidery work, they show promising marketplace for a similar.

Projects: - Project Reports & Profiles
Sewing Machine Components Market: Market Dynamics

There is rise in demand of consumer appliances within the developing economies, sewing machine is taken into account to be one in every of the most important growing segment among them. Improvement in work organization and dealing conditions is expected to end in increased productivity and competitiveness in home appliance components market. Small entrepreneurs within the clothing industry of developing economies used great number of sewing machine, which create high demand growth for sewing machine components market.

Related Project: - Needles For Sewing and Embroidery Machine
There’s tons of technological advancements has been witnessed within the sewing industry because the use of technologies in sewing machines are sought to mollify the increasing need for productivity and efficiency within the clothing industry. These factors are further expected to deliver significant growth for sewing machine components market. The global embroidery machine market is estimated to realize huge traction within the forthcoming years. “Embroidery machines aren't only advanced technologically but are built with minimum maintenance requirement, thus, increasing the precision and quality of products.

Books: - BOOKS & DATABASES
Sewing Machines are used to stitch various kinds of fabrics and are worked by treadle, power, or electricity. With improvements in technology sewing machines are becoming advanced and faster than in the past. Sewing machines are extensively used to stitch together fabrics and textiles and create unique products. The global Sewing and Embroidery Machine market size was USD 5463.4 million and it is expected to reach USD 7114 million by the end of 2026, with a CAGR of 3.8% during 2021-2026. Factors leading to the growth of the sewing market globally are high demand by end-use industries such as apparel and garments.

Related Video: - Industrial & Engineering Products, Manufactured Goods, Mechanical, Automobile, Metal, Metallurgical, Wire, Aluminum, Copper Products, LPG Cylinder
The rising population is also driving the demand for sewing machines and the market is expected to grow significantly. These devices are experiencing soaring demand in diverse industries, particularly in automotive and construction. In automobiles, textiles are widely utilized for vehicle interiors such as for making nylon tire cords, automotive carpets, and seatbelt webbings, among others. New technologies advancements such as pedal-less swing, automatic bobbin changer, real-time monitoring, digital feed, and modular sewing machines are leading to the demand for more advanced machines by various industries.

Market Research Reports: - Market Research Reports, India and Global Industry Analysis, Market Trends
Key Players:

- Groz Engineering Tools Pvt. Ltd.
- Needle Industries (India) Pvt. Ltd.
- Schmetz India Pvt. Ltd.
- Singer India Ltd.

Examples of some of the market participants in the global sewing machine components market identified across the value chain include:

- Bernina International AG
- Rieter Group
- Brother Industries Ltd.
- Janome Sewing Machine Co. Ltd.
- JUKI Corporation
- SEW-EURODRIVE
- Reliable Corporation
- Singer Corporation

Reasons for Buying our Report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product.

• This report provides vital information on the product like it’s characteristics and segmentation.

• This report helps you market and place the product correctly by identifying the target customer group of the product.
• This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials

• The report provides a glimpse of government regulations applicable on the industry

• The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.

• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.

• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.
Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Sewing Needle.” provides an insight into Sewing Needle market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Sewing Needle project. The report assesses the market sizing and growth of the Indian Sewing Needle Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
• Good Present/Future Demand
• Export-Import Market Potential
• Raw Material & Manpower Availability
• Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Sewing Needle sector in India along with its business prospects. Through this report we have identified Sewing Needle project as a lucrative investment avenue.

Select and Choose the Right Business Startup for You

(Instant Online Project Identification and Selection)

Finding the right startup business is one of the most popular subject today. Starting a business is no easy endeavor, but the time, effort, and challenges can be worth it if you succeed. To give yourself the best chance to be successful, take your time to carefully find the right business for you. We, at NPCS, endeavor to make business selection a simple and convenient step for any entrepreneur/startup. Our expert team, by capitalizing on its dexterity and decade's long experience in the field, has created a list of profitable ventures for entrepreneurs who wish to diversify or venture. The list so mentioned is updated regularly to give you a regular dose of new emerging opportunities.

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- Good Present/Future Demand
- Export-Import Market Potential
- Raw Material & Manpower Availability
- Project Costs and Payback Period

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,
