

# Flat Glass Manufacturing Business

Right time to start Industry of Flat Glass

<https://www.niir.org>  
<https://www.entrepreneurindia.co>

AN ISO 9001 : 2015 CERTIFIED COMPANY

# Introduction

Flat glass is float glass. Float glass, commonly known as flat glass, is made by floating molten glass on a bed of molten tin. The molten glass spreads onto the surface of the metal and produces a high quality, consistently level sheet of glass that is later cut into required sizes. Flat glass refers to one of two types of glass, depending on how it's manufactured. A flat glass are used in a variety of industries, including construction, automotive, and consumer electronics.

***Visit this Page for More Information: [Start a Business in Glass Manufacturing Industry.](#)***

# Uses/Applications

Flat glass is used in a variety of applications, from windows and doors to automotive windshields and more. Use in residential and commercial construction. A flat glass for both commercial and residential use. Flat glass use for commercial purposes may include tempered or laminated glass, decorative or etched glass, insulated glass units (IGUs), solar control glazing (or low-e-coating), reflective coated IGUs (or mirrored coatings).

**Related Business Plan:** [Flat Glass Manufacturing Business](#)

# ➤ Manufacturing Process

Float glass is made by pouring the molten glass from a furnace into a chamber that contains a bed of molten tin. The process is sometimes called the Pilkington Process. The atmosphere inside the chamber is carefully controlled. The glass floats on the tin and forms itself in the shape of the container. It spreads 90 to 140 inches wide at a thickness determined at the time of manufacture. The upper surface of the glass is called the air side or score side. It is polished with fire. The lower surface is called the tin side. It is not fire-polished. From the chamber, the glass enters an oven, called a lehr. There it is slowly cooled at a specific rate. This process, called annealing, relieves the glass of internal stresses. The rate of cooling is crucial to the success of the final product.

# Benefits of Starting Flat Glass Manufacturing Business

- 1) Flexibility.
- 2) Low start-up costs- Flat glass manufacturing businesses have low start-up costs when compared to other types of businesses. There are relatively low start-up costs involved in setting up a flat glass manufacturing business.
- 3) The growth potential is unlimited and long.

# Market Size in India

The Indian flat glass market valued at over USD 3 billion in 2021. The market is projected to register a more than 7.9% CAGR during the forecast period (2022-2027). The market size provides opportunities for both new and existing businesses to grow and succeed. The growing construction industry and rising demand for automobiles are the major factors driving the growth of the flat glass manufacturing market in India.

# Global Market Outlook

The global flat glass market is expected to grow at a CAGR of around 5% during the forecast period. The rising demand for construction and automotive applications is expected to drive the market growth.
