**Absorbent Cotton Wool Manufacturing  
Project.**

**Medical Cotton.**

**Surgical Cotton**

# **Introduction**

**Absorbent Cotton is also known as Surgical Cotton or Cotton Wool and mainly used for medical purposes in hospitals, nursing homes, dispensaries and at home (for first aid) etc. because of its property of high fluid absorbency, it is better known among masses as absorbent cotton. The raw cotton is processed by series of steps which render the cotton hydrophilic in character and free from external impurities needed to be fit for use in surgical dressings and personal hygiene. Apart from medical purposes absorbent cotton is also used for making conventional type of sanitary napkins or pads.**

**Fairly good quality of absorbent cotton is also used for removing make-up and dirt at beauty parlours.**

**The absorbent cotton should be chemically inert and soft to give maximum protection and should not cause irritation. These properties can be achieved by manufacturing the product as per standard method of manufacture. The raw cotton is processed by series of steps which render the Cotton hydro-phallic in character and free from external Impurities needed to be fit for use in surgical dressings and Personal hygiene.**

## **Uses:**

- **Surgical/Absorbent cotton is widely used in hospitals, clinics, health centers and pharmacies for medical purposes. It is also used in beauty salons, business organizations and households for various purposes.**
- **Surgical/Absorbent cotton is mainly used for sanitary purposes and surgical operations as well as for ordinary daily use. It is also usually needed by women during their menstruation period that reoccurs at least once a month.**
- **Apart from used as a dressing material, it is also used for padding for items of clothing, quilts etc.**

## **Market Outlook**

**Indian surgical cotton industry is expecting a boost in sales in the domestic and international market mainly due to the rise in demand. The demand for surgical cotton is growing at the rate of 10 percent per annum across the world. The demand for it in India is estimated to be about 2 million bales (of 170 kg each) per year.**

**The demand for surgical cotton is rapidly increasing in India as more people are getting access to basic health care and the number of people who can afford more complex medical facilities, like surgeries, transplants, etc. has increased in the country.**

**The demand for absorbent cotton is also met through import. The demand of Surgical Absorbent Cotton is directly related with the increase in population and expansion of public health services. The demand for Surgical Absorbent Cotton increases with the increase in population and number of hospitals, dispensaries, nursing homes, health care centers etc. Progressive increase in health amenities offered by Government and coming up of new hospitals and health care centers in private sector even at small towns are contributing to the growth of absorbent cotton industry. Government hospitals and large nursing homes are the largest consumer for cotton wool.**

**The demand for surgical cotton is rapidly increasing in India as more people are getting access to basic health care and the number of people who can afford more complex medical facilities, like surgeries, transplants, etc. has increased in the country. Within the next 5 years, 3-3.5 million bales will be required to fulfill the domestic demand and more would be needed for the export market. Besides the Indian market, there is enormous export potential for surgical cotton in countries such as the US, EU and Japan, There is also a rise in demand for Indian surgical cotton in Middle East and African region.**

# Reasons for Buying our Report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

# Our Approach:

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

## **Scope of the Report**

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Surgical Cotton ” provides an insight into the Surgical Cotton market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Surgical Cotton project. The report assesses the market sizing and growth of the Indian Surgical Cotton Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

**We at NPCCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Surgical Cotton sector in India along with its business prospects. Through this report we have identified Surgical Cotton project as a lucrative investment avenue.**
