Introduction

The only thing stopping you from coming up with a company idea is your own imagination. Either you can enhance what is already in place or you can utilize your creativity to come up with something that has never been done before. See our list of businesses below to learn how to start a business with little money, time, or experience.

MANUFACTURING BUSINESS PLAN OF

AUTO PISTON

Engines' pistons are a crucial component. In order to generate energy, they compress the air and push it into a combustion chamber with fuel. The air is heated by compression, which makes it simpler to ignite the fuel-air mixture. A cylindrical plug that moves up and down the engine cylinder is the piston in an automobile engine. It aids in moving a vehicle by converting the force of gases expanding in the cylinder into rotation. In a car, the crankshaft is connected to the pistons. The major moving components of an engine are the piston and crankshaft together.

Visit this Page for More Information: [Start a Business in Automotive Industry](#)

Benefits of Starting a Business of Auto Piston

Automotive pistons are one of those invisible components of an engine, but without them, the engine in your automobile would just be a trash heap of metal. Your car wouldn't move at all without pistons, which are essential to its motion. Because more precise, higher-quality pistons are needed as cars become more technologically advanced, the automotive piston industry has been seeing rapid growth in recent years.

Related Business Plan: [Manufacturing Business plan of Auto Piston](#)

India Market Outlook

The desire for higher powerful engines in the automotive industry and the Indian piston and piston ring market have been the two factors most responsible for the market's rapid growth. Major investments will be attracted domestically and globally due to the expanding infrastructure, expanding domestic car market supported by new model launches, rising purchasing power, and stabilising political environment.

Watch Video: [Automotive Parts Auto Piston Manufacturing Business](#)

Global Market Outlook

In 2020, the demand for automotive pistons increased to a value of USD 4.6 billion, primarily due to the growing automotive sector. The market is anticipated to continue to develop in the forecast period of 2022–2027, growing at a CAGR of 4%, helped by the increasing R&D efforts. In addition to having more pistons than conventional engines, new engines created with fuel-saving technologies like turbochargers and dual-clutch gears also frequently have greater piston counts.

SETTING UP

ALUMINIUM CANS FOR BEVERAGES (TWO PIECES)

BUSINESS

One of the most widely used materials for beverage packaging is aluminium cans. They are really among the few types that may be completely recycled to make new cans. That serves as a can for soft drinks, beer, and other canned drinks in the beverage sector. Often, thin metal is rolled or pulled into the shape of the aluminium cans. Although aluminium cans have long been used as beverage containers, they have recently gained popularity because of their eco-friendly features.

Visit this Page for More Information: [Start a Business in Aluminium Downstream Sector](#)

Uses and Application of Aluminium Cans For Beverages

One of the most popular metals used in beverage cans is aluminium. Due to its lower melting point, aluminium is easier and less expensive to produce. Additionally, because aluminium doesn't rust or corrode in water, no internal coatings are required. Since aluminium can be recycled indefinitely, it may be used to create a wide range of new products, including automobiles, kitchenware, and beverage containers. Recycling aluminium consumes 95% less energy than mining and refining new aluminium. Aluminum must first be melted and then cast into new forms in order to be recycled. In addition to saving energy, this procedure lowers greenhouse gas emissions.

Related Business Plan: [Setting up Aluminium](#)

[Cans for Beverages \(Two Pieces\) Business](#)

Indian Market Outlook

The demand for aluminium cans was predicted to increase by 3.7 to 4%, and by 4 to 3.6% CAGR over the following five years. Along with the growth in demand, the market's value increased from US\$52.21 billion in 2018 to US\$60.63 billion in 2024, showing a CAGR of 2.23% during the forecast period. In India, aluminium cans are the most often used type of packaging. Over the next five years, demand is anticipated to increase at a 5% annual rate, with a substantial portion of that growth coming from the fast-moving consumer goods sector.

Watch Video: [Aluminum Cans Production | Profitable Manufacturing Business of Aluminum Beverage Cans](#)

Global Market Outlook

The market for beverage cans was valued at USD 25.31 billion in 2019 and is anticipated to grow to USD 36.59 billion by 2027, at a CAGR of 4.7%. Metal containers called beverage cans are made to carry predetermined amounts of liquid beverages like energy drinks, alcoholic beverages, carbonated drinks, tea, and others. The cans are made of either steel or aluminium and are extremely recyclable. Due to its sustainability, beverage makers are placing a growing amount of demand on the cans.

START PRODUCTION OF

Wire Nails

Fasteners known as wire nails are created by drawing wire, usually copper wire, through a die. Because they can be pounded into the nailing strip more readily than other fasteners, they are frequently used in roofing to attach roofing shingles. Additionally, because wire nails have a higher tensile strength than other materials like screws or tacks, they do not bend as easily. When building components like furniture or cabinetry that have limited clearance requirements, wire nails are particularly helpful.

Watch Video: [Wire Nails Manufacturing Business | How to Start Nail Factory?](#)

Benefits and Application of Wire Nail

Wire nails are robust, adaptable, and powerful. They can be applied to a wide range of industries, including building and cosmetics. Wire rods that have been heated until they are bendable are used to make the nails. They are then cut into precise lengths that may be bent into the desired shapes. Wire nails are among the most widely used forms of nails in use today because of these characteristics. Alternatives to conventional metal fasteners include wire nails.

Related Business Plan: [Start Production of Wire Nails](#)

Global Market Outlook

The market for wire nails was estimated to be worth more than USD 10 billion in 2016 and is projected to increase to USD 13.6 billion by 2023, with a CAGR of 4.4% between 2018 and 2023. The market for wire nails is expanding globally. Global production of wire nails is anticipated to be between 1.5 and 2 billion pounds! Because they may be used in a number of scenarios and are stronger than other types of fasteners like screws and nails, there is a high demand for this product. As a result, a large number of production businesses have emerged to satisfy the rising need for wire nails.

Read Similar Articles: [Why Manufacturing of Wire Nails is a Lucrative Business Opportunity](#)

Start Manufacturing Business of

Chocolate

Cocoa beans are used to make the wonderful food known as chocolate. The plant that produces cocoa beans develops on trees as pods. The seeds found inside cocoa pods are removed, fermented, dried, and roasted before being processed into a paste known as chocolate liquor or cocoa mass. Different kinds of chocolate products are made by combining the liquid left behind from these procedures with sugar and other components. Dark chocolate often has less sugar than milk or white chocolate. White chocolate contains between 10% and 20% cacao solids, milk chocolate between 20% and 32%, and dark chocolate normally has at least 45% cacao solids.

Visit this Page for More Information: [Start a Business of Bakery and Confectionery Products](#)

Benefits and Uses of Chocolate

For millennia, chocolate has been a crucial component of many societies. A healthy dosage of antioxidants, better mood, higher cognitive function, lower stress, increased creativity, and even acting as an aphrodisiac are just a few advantages of chocolate. These advantages have led to a rise in the popularity of chocolate in recent years. However, it has proven difficult to meet demand as we now produce more cocoa than ever before.

Related Business Plan: [Start manufacturing business of Chocolate](#)

Indian Market Outlook

Given the expanding population and changing customer preferences, the India chocolate market, which was valued at USD1687.23 million in 2022, is predicted to increase at a CAGR of around 6.69% to reach USD2457.48 million by 2028. As the market expands and the variety of chocolate increases, such as sugar-free, organic, vegan, and gluten-free chocolates, more significant enterprises try employing cutting-edge techniques to win market dominance. Additionally, middle-class disposable income is increasing, and people are becoming increasingly aware of the health advantages of chocolate.

Watch Video: [Chocolate, Toffee, and Candy Manufacturing Industry | Start your own Confectionery Business](#)

Global Market Outlook

In 2021, the value of the world chocolate market was US\$ 151.9 billion. IMARC Group projects that the market would grow at a 2.6% CAGR between 2022 and 2027 to reach US\$ 177.8 billion. In the next ten years, the demand for chocolate is anticipated to rise by approximately 50% worldwide. Because it takes around 3.5 pounds of raw cocoa beans to generate one pound of cocoa powder, there will be a boom in the production of cocoa beans, which are used to manufacture chocolate.

Related Feasibility Study Reports: [Chocolate Manufacturing Business](#)

**BUSINESS PLAN FOR PRODUCTION OF
READY MIX PLASTER, BLOCK
JOINTER, TILE ADHESIVE
AND M 20 CONCRETE
(MICRO CONCRETE)**

Ready to Eat A concrete surface is commonly created using plaster, which is a blend of cement paste and particles. This combination is used by block jointers to create concrete blocks. It is a tool used to smooth off any uneven edges on natural stones, clay bricks, or concrete blocks. Adhesives for tiles secure them to a surface. M 20 A form of mortar called concrete can be applied to building projects like brick or stone walls. Sand, water, and white Portland cement are the main ingredients. Since it doesn't need to be mixed on-site, it is frequently used for minor repairs.

Visit this Page for More Information: [Start a Business in Construction Industry](#)

Uses and Applications of Mix Plaster, Block Jointer, Tile Adhesive and M 20 Concrete (Micro Concrete)

Sand and cement-based materials are combined with water to create ready-mix plaster. After that, the material is put into moulds to produce different shapes, including bricks and blocks. Both residential and commercial construction uses ready mix plaster as a foundation for tiles or other flooring materials. These goods are in high demand since they may be used for a variety of tasks. Road paving is just one of the numerous potential uses for these materials.

Related Business Plan: [Business Plan for Production of Ready Mix Plaster, Block Jointer, Tile Adhesive and M 20 Concrete \(Micro Concrete\)](#)

Global Market Outlook

The market for ready-mix concrete would increase from USD 792.2 billion in 2021 to USD 1,374.2 billion in 2028, with a CAGR of 8.2% during that time frame. One of the biggest industries in the world is construction. Additionally, during the past few decades, it has undergone numerous alterations. Utilizing ecologically friendly products and methods that lower carbon emissions is given much more importance today. Due to its minimal environmental effect and lack of water usage during manufacture, ready-mixed plaster, block jointers, tile adhesive, and micro concrete have all seen a surge in demand.

Read our book here: [The Complete Book on Construction Materials](#)

Auto Brake Pad and Auto Brake Shoe

Production Business

Auto brake shoes and pads are a crucial component of your car or truck's braking system. When the brake pedal is depressed, auto brake pads create friction with the auto brake shoes to stop the car. Auto brake pads come in two varieties: front and rear brakes, but some cars only have the latter. All kinds of vehicles, from small automobiles to big trucks, use auto brake pads. Owners should regularly check the condition of their brake shoes and pads to make sure they're in good shape. It's crucial to buy premium brake pads from a reputable manufacturer when you need to replace yours.

Visit this Page for More Information: [Start a Business in Automotive Industry](#)

Benefit and Uses of Auto Brake Pad and Auto Brake Shoe

Metal clips, shims, springs, a dust cover, and a rubber compound are the main components of brake pads. It is an essential component of any car's braking system since it generates the friction required to slow the vehicle down. Heavy equipment including trucks, trailers, cranes, tractors, and forklifts also utilise brake pads. To create more resistance while using the brakes, brake shoes are small pieces of metal that fit between the brake pad and the wheel. On the interior of the wheel, brake pads are placed, and on the outside, brake shoes. When you press down on your brake pedal, the brakes grind against these components, generating friction that either slows down or stops your automobile completely.

Related Business Plan: [Auto Brake Pad and Auto Brake Shoe Production Business](#)

India Market Outlook

The India Brake Pad Market is expected to grow from its current value of USD 4.75 billion in 2021 to USD 8.54 billion by the year 2028. (2022-2028). The rapidly increasing number of cars on the road and the growing size of fleets nationwide are the primary causes of the market's rapid growth. The rising popularity of electric and hybrid automobiles is another important factor boosting demand in the India brake pad market. Additionally, India's economy is projected to benefit from continuous technical advancements and government regulations that assist the vehicle industry.

Watch Video: [Auto Parts Manufacturing Industry | Production of Automobile Components](#)

Global Market Outlook

The market for brake pads will have grown from US\$ 2,580.57 million to US\$ 3,342.58 million. From 2020 to 2028, it is anticipated to expand at a CAGR of 3.8%. The forecast for the global market for automotive brake shoes and pads is excellent. In fact, if you're interested in launching a new vehicle brake pad or shoe business, you should move quickly because demand for these products will surpass supply in the upcoming years. The auto sector is enormous! It should come as no surprise that there is a large demand for shoes and brake pads given the amount of money that has been spent on automobiles.

Reasons for Buying Our Business Plan

- ✓ **The Business Plan helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ✓ **This Business Plan provides vital information on the product like it's characteristics and segmentation**
- ✓ **This Business Plan helps you market and place the product correctly by identifying the target customer group of the product**

- 
- ✓ **This Business Plan helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
 - ✓ **The Business Plan provides a glimpse of government regulations applicable on the industry**
 - ✓ **The Business Plan provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

Our Approach

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

How to Choose The Right Business For You?

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify Businesses based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the Business Ideas on the basis of mentioned pointers and identify a suitable Business Plan matching your investment requisites.....[Read more](#)

Visit:- <https://www.entrepreneurindia.co/complete-project-list>

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The Business Plan covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

Who are we?

A trusted and leading name in the industry, we have been putting forth exceptionally integrated and comprehensive technical consultancy services. We believe that project consultancy serves as a critical element for the success of your projects. Moreover, we keep in mind that no client is the same and nor are the requirements. Therefore, we ensure uniqueness in every service you avail from us.

What do we offer?

- **Selection of Right Business Ideas For You (Project Identification)**
- **Detailed Project Reports/Pre-feasibility Reports**
- **Market Research Reports**
- **Business Plan**
- **Technology Books and Directory**
- **Industry Trend**
- **Databases on CD-ROM**
- **Laboratory Testing Services**
- **Turnkey Project Consultancy/Solutions**
- **Entrepreneur India (An Industrial Monthly Journal)**

How are we different ?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
