Tomato Products Manufacturing Business.

Production of Tomato Ketchup, Sauce and Soup.

Processing of Tomato
**Introduction**

**Tomato Ketchup**

Tomato Ketchup word originated from Chinese koechiap meaning ‘brine of fish’, or generally mentioned as ‘spicy sauce’; the word sauce is derived from Latin word salsas that means ‘salted’. Ketchup is originally supposed to have been invented in the seventeenth century and was related to a sauce that contained fish brine, herbs, and spices as main ingredients. Tomato ketchup might be just an additional sauce for foods or a dressing for pasta. As we know, tomato is not only delicious as a fresh fruit but also delicious as sauce and even when it has been processed as tomato ketchup, the taste is still tasty. As part of worldwide culinary ingredients, tomato ketchup could be found in any kitchen around the world.
Tomato Sauce

Tomato sauces are used in many products including frozen foods, pasta sauces and pizza toppings, etc. A typical tomato sauce would be based on sieved or whole tomatoes, and/or tomato paste. It would also contain water, sugar, vinegar, salt and seasoning. The desired product viscosity would normally be achieved using a starch-based thickener.

Tomato sauce is one of the most common sauces made primarily out of tomatoes. It is a product prepared by cooking fresh tomatoes down in to a medium thick sauce, which is strained to remove seeds and peels. Due to its rich flavor, low liquid content, very soft flesh that breaks down easily, and the right composition to thicken up into a sauce when cooked, tomato serves as the best option for preparing the sauce.
Different Uses of Tomato Sauce:

1. It is used in the household along with snacks.
2. Used in restaurants for coloring and seasoning of foods.
3. Used by railways and other transportation modes that provide food services.
4. Street food dwellers.

Market Outlook

Tomato processing industry is huge. The only ketchup and sauce market in India is pegged at Rs 1,000 crore and growing at around 20% year-on-year. There is a big market for the processed tomato products. The market scenario has revealed a positive indication for the specially packed tomato sauce in local as well as outside market. Rapid urbanization has increased the use of processed tomato products.
Tomato ketchup is a widely popular condiment made from tomatoes, vinegar, sweeteners, and salt. The simple yet versatile formulation of tomato ketchup has made it popular in various cuisines, with the growing demand for fast food enabling smooth expansion of the tomato ketchup market. Tomato ketchup is commonly served with fast food items such as sandwiches, burgers, fries, and grilled or fried meat. It is also commonly used as a base for other sauces, since its flavor is popular and agreeable.

The ketchup market can be broadly segmented into four major segments, such as product ingredient type, application, distribution channel, and geography. Regarding product ingredient type, ketchup market can be classified into tomato ketchup, mushroom ketchup, mustard ketchup, fruit & nut ketchup, and others. Ketchup is a staple with traditional fast food items, but the agreeable flavor of tomato ketchup has also boosted its use with local fast food items in emerging regions.
As a result, leading producers of tomato ketchup have been able to successfully create regional variants of their products based on the cultural preferences and compatibility with the local cuisines. The global tomato ketchup market is primarily driven by the growing demand for fast food across the world. While North America is the prime market for fast food, the growing adoption of the Western culture across the world is leading to significant demand for fast food in Asia Pacific and Latin America, where the market stands to grow rapidly owing to the increasing disposable income of urban consumers.

The convenience of fast food means the burgeoning middle class is likely to remain a key consumer demographic for the fast food industry in the coming years, leading to strong growth prospects for the global tomato ketchup market. Due to the widespread prevalence of fast food joints and quick service restaurants in North America and Europe, these two are the leading contributors to the global tomato ketchup market and are likely to retain a dominant share in the coming years.
However, the Asia Pacific and Middle East markets for tomato ketchup have exhibited promise in the last few decade, and with many countries in this region steadily climbing the rungs of economic progress, the fast food industry is also growing smoothly in these regions. This is likely to present promising growth prospects for manufacturers of tomato ketchup in the coming years.

With an annual growth of over 20% per annum, the demand for tomato sauce is getting huge in India which is expected to rise more in times to come. It can be used along with snacks to coloring and seasoning in restaurants. The eating culture of Indian people has certainly given rise to the use of tomato sauce extensively.

The demand of tomato sauce is huge in India. It has got an annual growth of over 20 % per annum. As the tomato sauces come in different kind of uses, that is why the demand is also very high in the market.
Tomato Processing Market

The global tomato processing market has experienced a healthy growth over the past several years. This can be accredited to the changing lifestyle and increasing spending power of the consumers coupled with the innovative product packaging. Around 80% of the tomatoes produced worldwide are consumed fresh, whereas the remaining 20% are utilized in the tomato processing industry. As an important flavoring ingredient, processed tomato products are extensively used in the food processing industry, fast food joints, hotels, restaurants and households. There are many processed tomato products available in the market. Some of these include - peeled tomato, partially dehydrated tomato, diced tomato, tomato snacks, tomato paste, ketchup, soup, juice, sauce, powder and concentrate. The global market for tomato processing is currently being driven by numerous factors. Rising fast food trends have led to an increase in the global demand for processed tomatoes.
Population growth, rising disposable incomes, urbanization, changing dietary patterns, growing fast food industry and rising demand from emerging markets are also broadening the growth aspects of the global tomato processing market.

The global tomato processing market reached a volume of around 34 Million Tons in 2016. A number of factors are currently driving the growth of this market. These include changing food habits, rising incomes, urbanisation, emerging markets, growing consumption of fast foods especially by youngsters, etc.

Tomato processing in India is still not very significant. Processed tomato products have good export potential, especially in the Middle East. Many units are operating in the small scale sector in the country.

Reasons for Buying our Report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product

• This report provides vital information on the product like it’s characteristics and segmentation

• This report helps you market and place the product correctly by identifying the target customer group of the product
• This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials

• The report provides a glimpse of government regulations applicable on the industry

• The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions

www.entrepreneurindia.co
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.

• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.

• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.

www.entrepreneurindia.co
Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Tomato Products - Tomato Ketchup, Sauce & Soup.” provides an insight into Tomato Products - Tomato Ketchup, Sauce & Soup market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Tomato Products - Tomato Ketchup, Sauce & Soup project. The report assesses the market sizing and growth of the Indian Tomato Products - Tomato Ketchup, Sauce & Soup Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
• Good Present/Future Demand
• Export-Import Market Potential
• Raw Material & Manpower Availability
• Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Tomato Products - Tomato Ketchup, Sauce & Soup sector in India along with its business prospects. Through this report we have identified Tomato Products - Tomato Ketchup, Sauce & Soup project as a lucrative investment avenue.

www.entrepreneurindia.co
Niir Project Consultancy Services (NPCS) can provide Detailed Project Report on Tomato Products Manufacturing Business. Production of Tomato Ketchup, Sauce and Soup.

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites......Read more
Download Complete List of Project Reports:

- **Detailed Project Reports**

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- Good Present/Future Demand
- Export-Import Market Potential
- Raw Material & Manpower Availability
- Project Costs and Payback Period

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,
Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects......Read more

An ISO 9001:2015 Company
Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services
- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad
We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.
We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.
What do we offer?
