

Top 10 Most Profitable Business Ideas in

Food Processing

Industry

with Rising Opportunities.

Food Processing Industry

.....

INTRODUCTION

Market trends have evolved in tandem with the changing times. Opportunities have broadened the horizon to unimaginable proportions in today's society. It's as though each inch beneath the surface piques your interest in exploring further. It also applies to business. While there are millions of company concepts to choose from, only a handful are the most profitable. What is India's most profitable business? Which are the Top 10 Most Profitable Business Ideas in Food Processing Industry with Low Investment?

Are you looking for a low-cost way to establish a food business? If you answered yes, here are ten of the greatest food manufacturing company ideas to start. Food manufacturing is one of the most profitable companies one can start. There are currently over 1 billion people on the planet, and none of them can exist without food. We all require food at some time in our lives, therefore if you can get your hands on a profitable food manufacturing firm and create a product that everyone enjoys, you can make a lot of money. Below are five profitable food manufacturing business ideas with a lot of profit potential:

Want to Start a Production Business of

Apple Chips

Apple chips or crisps are apple-based chips or crisps. Apple chips grow drier and crispier as they become stale. Apples, contrary to popular perception, are not poisonous. When chips become stale, they become tougher rather than chewier. Fried, deep fried, vacuum fried, dehydrated, or baked apple chips are all options. Apple chips might be dense and crunchy, or they can be puffy but still crisp. Apple chips are delectable. Much more flavourful and nutritious than potato chips. Apple chips can be used to make sandwiches and as a sweetener in desserts like cookies.

Consumer interest in snacks is growing as more brands enter the market with newer technologies and additional benefits, providing consumers with refreshing and quick meals. Snack food manufacturers include companies that produce chips, almonds, popcorn, peanut butter, and a variety of other snacks. Potato chips, which account for up to 25% of overall industry income, corn chips, tortilla chips, which account for up to 20%, and roasted nuts and seeds, which account for up to 20%, are all key goods in this market.

Dal Mill, Split Pulses

Manufacturing Industry

Split Pulses (also called Dal) are manufactured from whole pulses that have been de-skinned and oiled for easier cooking and a longer shelf life. Chana (Gram), Mung, Massor, Urad, and Arhar (Tur) are popular processed pulses that are a staple in all Indian states. In India, pulse splits, also known as 'dal,' are consumed by both vegetarians and non-vegetarians. In Indian cuisine, split pulses are one of the most important sources of protein. Pulses have a lot of vitamins and minerals in them. Pulses include vital minerals such as iron, potassium, magnesium, and zinc, to name a few. Pulses are particularly high in B vitamins like folate, thiamin, and niacin.

In India, about 2.8 kg of pulses are consumed per person per year. In the north, east, and central areas of India consume more pulses. In Western and Southern India, split pulse intake is lower since wheat and rice, as well as green vegetables, are a prominent part of the staple diet. Their intake, however, varies from place to place based on dietary choices, availability, and prevailing circumstances. According to the publisher, the worldwide pulses market is estimated to reach 148.5 million tonnes by 2026, exhibiting moderate growth throughout the forecast period (2021-2026).

A photograph showing the process of egg shell powder production. A wooden cutting board holds a cracked egg, a bowl of white powder, and a pile of egg shell fragments. The text "Rising Demand of Egg Shell Powder" is overlaid in large, bold letters.

Rising Demand of Egg Shell Powder

The hard, outer coating of an egg is called an eggshell. It's primarily calcium carbonate, which is a common type of calcium. Calcium is a vital element that can be found in a variety of meals, including dairy products. Many leafy and root veggies have lower levels as well. As a natural calcium supplement, eggshell powder made from hen eggs has been utilised. Eggshells are one of the world's solid wastes, and they are classified as hazardous according to European Commission standards. The utilisation of solid wastes, such as eggshells, will aid in the creation of a sustainable ecosystem by reducing the amount of solid trash discharged.

The global eggshell membrane market was worth USD 120.9 million in 2020, and it is predicted to increase at a CAGR of 9.3% from 2020 to 2028. The global market is expanding as people become more mindful of their health and their consumption habits change. Eggshell membrane is one of the high-potential components that is gaining traction in a variety of applications. The use of the product as a supplement has been popular for a long time, and it's also found in dermatological, cosmetic, and nutraceutical items. Its introduction into the pharmaceutical industry was based on its perception as a natural elixir for treating arthritis.

The background of the slide is a close-up photograph of a banana bunch. The bananas are in various stages of ripeness, with some being bright green and others showing a yellowish-green hue. The stems and leaves are visible, creating a dense, textured background.

Banana Cultivation

Business

Banana farming is a type of commercial agriculture where bananas are grown in tropical climates. In addition to raising the crop, banana plantations will package, process, and ship their product straight to foreign markets. Depending on the magnitude of the business, a plantation can range in size from a small family farm to a corporate facility with enormous tracts of land, many physical plants, and several personnel. Banana is India's second most popular fruit crop, after mango. Due to its year-round availability, affordability, varietal variety, flavour, nutritional and medicinal value, it is a favourite fruit of all classes. It also has a lot of potential for export.

With a CAGR of 4.1 percent, banana output in 2019 was 116.0 million metric tonnes. After wheat, rice, and maize, bananas are the fourth most valuable food crop in terms of value, and the world's favourite fruit in terms of volume consumed. Bananas are the world's most frequently cultivated and traded crop. As a result of rapid population expansion in producing countries and rising worldwide import demand, the crop has seen substantial gains in production and trade volumes in recent decades.

Rising Opportunities in Business of

Dehydrated Onion

Onion powder is a dehydrated ground onion that is extensively used as a flavouring. It's a common ingredient in seasoned salts and spice blends, such as beau monde seasoning. Some of the variants include toasted onion. Onions can be white, yellow, or red. Onion powder is a commercially produced food that can be used in a variety of dishes. Dehydration has long been thought to be one of the most efficient ways to store food for later consumption. Dehydration of onions is a modern trend in which the onion is stripped of all moisture and dried completely.

The global Dehydrated Onion Powder Market is expected to develop at a substantial rate between 2020 and 2025. Onion powder is low in calories but high in vitamins C and B, as well as potassium. Onion powder contains chemicals that help lower blood sugar levels, such as quercetin and sulphur compounds. Despite the fact that the worldwide onion powder market is significantly smaller than the global onion market, it is increasing at a healthy 5% per year.

Growing Opportunities in Production of

Banana Powder

Banana powder is a powder created from bananas that have been processed. It's a common ingredient in milkshakes and infant meals. It's also utilised in the production of a variety of cakes and cookies. Banana powder is made from banana pulp that has been mechanically diced and then processed with a colloid mill utilising hydraulic shear to transform it into a paste. After that, sodium metabisulfite is used to brighten the paste's yellow colour. The paste is subsequently dried by spraying or drum drying, with the latter being more popular because no paste is wasted during the drying process. Drum drying also yields about 2% extra powder and ensures that it is fully dried.

The global banana powder market was valued at USD 1003.72 million in 2020. In the projection period of 2021-2026, the market is expected to increase at a CAGR of 5.8%, reaching USD 1330.58 million by 2026. The market will rise due to the numerous health benefits connected with banana powder. The market is expected to increase rapidly in the near future as people become more aware of the health benefits of banana powder.

Start Manufacturing Industry of

Wheat Starch and Gluten

Wheat gluten and wheat starch are economically significant co-products of wheat flour wet processing. Wheat gluten is a common food component found primarily in baked dishes and processed meat products. Gluten is a type of wheat protein. Gluten forms lengthy molecules that are water insoluble. Because the CO₂ generated by the yeast is retained within the gluten superstructure, this gives dough its characteristic texture and allows breads and cakes to rise.

From 2019 to 2024, the global wheat gluten market is expected to develop at a considerable rate of 8.22%, reaching a market value of USD 1.37 billion by the end of 2024. Because of the growing relevance of a healthy lifestyle and the appeal of plant-based foods, the global market is rapidly expanding. Wheat starch is becoming more widely used in the food and beverage industry, which is driving the market. Because of its exceptional stabilising, thickening, and gelling qualities, it is a key ingredient in the manufacture of a variety of food products.

Opportunities in Business Industry of

Freeze Dried

Fruits & Vegetables

Freeze-dried food is also largely free of contamination, as the dehydration process renders yeast and possibly hazardous bacteria practically difficult to live. Finally, because the food's physical structure isn't changed during the freeze-drying process, it retains a lot of its colour, shape, texture, and flavour when it's rehydrated for eating. This makes it more appealing to consumers than other types of food preservation. The global market for freeze-dried fruits and vegetables was valued at USD 27950 million in 2019, and is predicted to reach USD 37070 million by the end of 2026, with a CAGR of 4.1 percent between 2021 and 2026.

The expansion of the food-processing business, as well as consumer demand for ready-to-eat or convenience food products, has risen dramatically in recent years, owing to a hectic work lifestyle and an increase in the working population. As a result, demand for freeze-dried fruits and vegetables for use in snacks, soups, sauces, and bakery and confectionery goods has increased.

Growing Popularity of

Pasta and Macaroni

Pasta is seen to be an excellent base for a filling, nutritious, and healthful dinner. As a result, pasta pairs well with a variety of foods, including fish, lean meats and poultry, rich tomato sauce, beans and vegetables, and cheese. The growing popularity of pasta around the world is likely to fuel the global market. Macaroni Pasta is a delectable pasta dish prepared in the traditional Indian style with selected spice powders or masalas. A true fusion recipe of Italian macaroni pasta enrobed in Indian flavours, the boiling macaroni is tossed with onion, tomato, ginger, garlic, capsicum, and carrot, as well as garam masala, and served hot.

In 2018, the Indian pasta market had a sales value of US\$ 335.4 million, with a CAGR of 17.1% from 2011 to 2018. Looking ahead, the market is expected to reach US\$ 821.9 million by 2024, representing a 16 percent CAGR from 2019 to 2024. Because more people are becoming aware of the health benefits of pasta, which is produced from semolina durum wheat rather than refined flour. Pasta is regarded convenient because it eliminates the need to spend time cooking and slicing veggies; this element will contribute to the market's growth.

Production of

Banana Wafers

Banana chips (also known as banana crisps) are dried, often crispy pieces of bananas that originated in Kerala, India, and Indonesia (fruits of herbaceous plants of the genus Musa of the soft, sweet "dessert banana" variety). They can be sprinkled in sugar or honey for a sweet flavour, or they can be fried in oil and spices for a salty or spicy flavour. Banana chips are similar to chifle and are typically prepared from firmer, starchier Musa fruit variants sold as plantains or "cooking bananas." The Saba and Cardava banana varieties are used to make banana chips.

The worldwide snacks market was valued at USD 439.9 billion in 2018, and it is predicted to increase at a CAGR of 6.2 percent between 2019 and 2025. Globally, rising health concerns, as well as changing lifestyles and diets, have fueled demand for a variety of snacking options. A crucial trend supporting the industry is the increasing replacement of meals with snacks, as well as the growing demand for allergen-free, vegan items.

Major Queries/Questions Answered in Our Report?

- 1. How has the industry performed so far and how will it perform in the coming years?**
- 2. What is the Project Feasibility of the Plant?**
- 3. What are the requirements of Working Capital for setting up the plant?**
- 4. What is the structure of the industry and who are the key/major players?**

- 5. What is the total project cost for setting up the plant?**
- 6. What are the operating costs for setting up the plant?**
- 7. What are the machinery and equipment requirements for setting up the plant?**
- 8. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up the plant?**
- 9. What are the requirements of raw material for setting up the plant?**

10. Who are the Suppliers and Manufacturers of Raw materials for setting up the plant?

11. What is the Manufacturing Process of the plant?

12. What is the total size of land required for setting up the plant?

13. What will be the income and expenditures for the plant?

14. What are the Projected Balance Sheets of the plant?

- 15. What are the requirement of utilities and overheads for setting up the plant?**
- 16. What is the Built up Area Requirement and cost for setting up the plant?**
- 17. What are the Personnel (Manpower) Requirements for setting up the plant?**
- 18. What are Statistics of Import & Export for the Industry?**
- 19. What is the time required to break-even?**

20. What is the Break-Even Analysis of the plant?

21. What are the Project financials of the plant?

22. What are the Profitability Ratios of the plant?

23. What is the Sensitivity Analysis-Price/Volume of the plant?

24. What are the Projected Pay-Back Period and IRR of the plant?

25. What is the Process Flow Sheet Diagram of the plant?

26. What are the Market Opportunities for setting up the plant?

27. What is the Market Study and Assessment for setting up the plant?

28. What is the Plant Layout for setting up the plant?

Reasons for Buying Our Report

- ✓ **The report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- ✓ **This report provides vital information on the product like it's characteristics and segmentation**
- ✓ **This report helps you market and place the product correctly by identifying the target customer group of the product**

- ✓ **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- ✓ **The report provides a glimpse of government regulations applicable on the industry**
- ✓ **The report provides forecasts of key parameters which helps anticipate the industry performance and make sound business decisions**

Our Approach

- **Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.**
- **The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players**
- **We use reliable sources of information and databases. And information from such sources is processed by us and included in the report**

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.....[Read more](#)

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.

And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,

Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis. The DPR (Detailed Project Report) is formulated by highly accomplished and experienced consultants and the market research and analysis are supported by a panel of experts and digitalized data bank.

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in India along with its business prospects.....[Read more](#)

Entrepreneur India

Who are we?

A trusted and leading name in the industry, we have been putting forth exceptionally integrated and comprehensive technical consultancy services. We believe that project consultancy serves as a critical element for the success of your projects. Moreover, we keep in mind that no client is the same and nor are the requirements. Therefore, we ensure uniqueness in every service you avail from us.

What do we offer?

- **Project Identification**
- **Detailed Project Reports/Pre-feasibility Reports**
- **Market Research Reports**
- **Business Plan**
- **Technology Books and Directory**
- **Industry Trend**
- **Databases on CD-ROM**
- **Laboratory Testing Services**
- **Turnkey Project Consultancy/Solutions**
- **Entrepreneur India (An Industrial Monthly Journal)**

How are we different ?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision

Our Approach

Requirement collection

Thorough analysis of the project

Economic feasibility study of the Project

Market potential survey/research

Report Compilation

Who do we Serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI's
- Foreign Investors
- Non-profit Organizations, NBFC's
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling

Sectors We Cover *Cont...*

- Bamboo And Cane Based Projects
- Building Materials And Construction Projects
- Biodegradable & Bioplastic Based Projects
- Chemicals (Organic And Inorganic)
- Confectionery, Bakery/Baking And Other Food
- Cereal Processing
- Coconut And Coconut Based Products
- Cold Storage For Fruits & Vegetables
- Coal & Coal Byproduct

Sectors We Cover *Cont...*

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents,
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing

Sectors We Cover *Cont...*

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries

Sectors We Cover *Cont...*

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing(Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.

Sectors We Cover *Cont...*

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.

Sectors We Cover *Cont...*

- Potato And Potato Based Projects
- Printing And Packaging
- Real Estate, Leisure And Hospitality
- Rubber And Rubber Products
- Soaps And Detergents
- Stationary Products
- Spices And Snacks Food
- Steel & Steel Products
- Textile Auxiliary And Chemicals

Sectors We Cover *Cont...*

- Township & Residential Complex
- Textiles And Readymade Garments
- Waste Management & Recycling
- Wood & Wood Products
- Water Industry(Packaged Drinking Water & Mineral Water)
- Wire & Cable

Objective

- To get a detailed scenario of the industry along with its structure and classification
- To provide a comprehensive analysis of the industry by covering aspects like:
 - Growth drivers of the industry
 - Latest market trends
 - Insights on regulatory framework
 - SWOT Analysis
 - Demand-Supply Situation
 - Foreign Trade
 - Porters 5 Forces Analysis

Objective

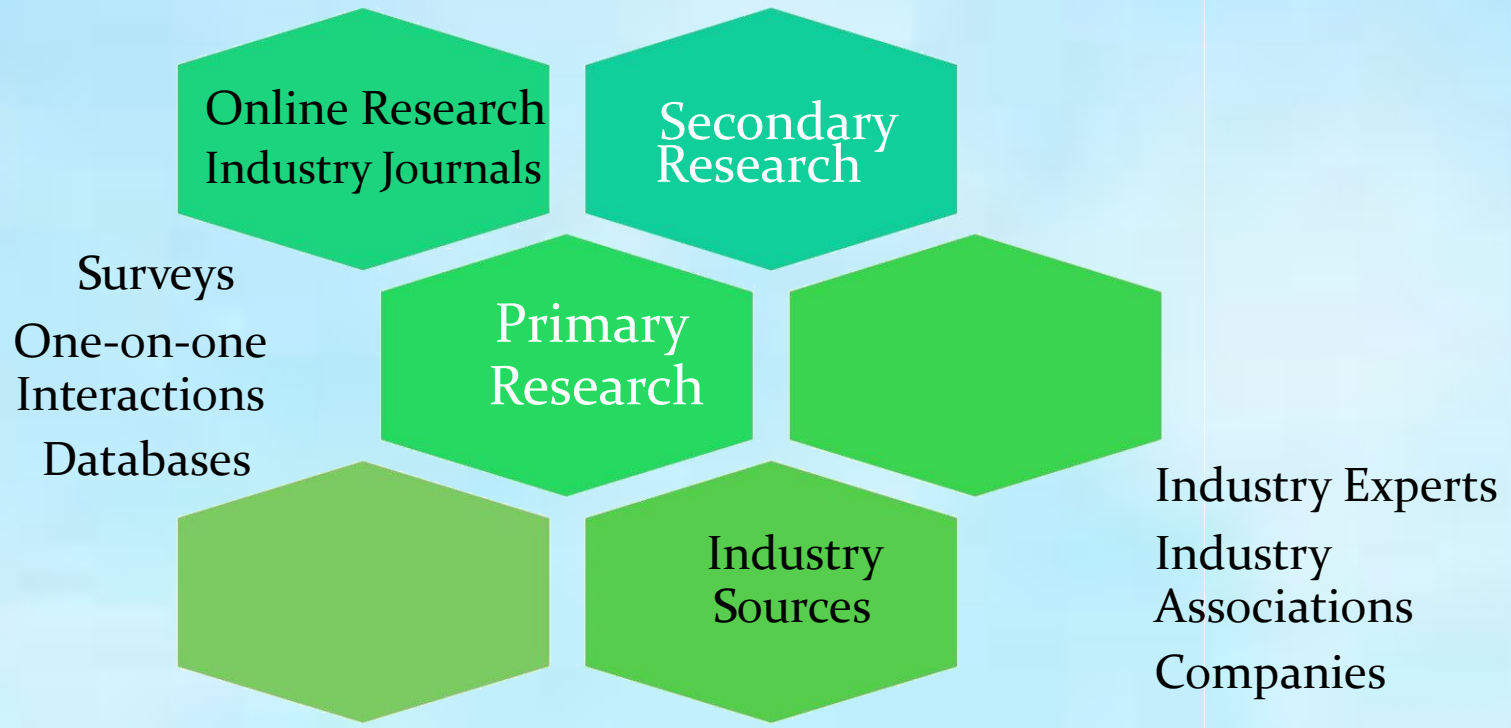

- To provide forecasts of key parameters which helps to anticipate the industry performance
- To help chart growth trajectory of a business by detailing the factors that affect the industry growth
- To help an entrepreneur/manager in keeping abreast with the changes in the industry
- To evaluate the competitive landscape of the industry by detailing:
 - Key players with their market shares
 - Financial comparison of present players

Clientele

- Venturist/Capitalists
- Entrepreneur/Companies
- Industry Researchers
- Investment Funds
- Foreign Investors, NRI's
- Project Consultants/Chartered Accountants
- Banks
- Corporates
