**Here are few Good Profitable
Project Ideas for You.**

Qatar

Introduction

The State of Qatar is one of the most exciting countries in the Middle East, with the population predominantly young, the economy expanding, and the pace of modernization quickening every year. Most of the farms will produce vegetables and fruits, using hydroponic technology for production. Qatar Agriculture Market is developing due to rapidly increasing tourism (normal as well as at the time of Holy festival of Ramadan), Increase in consumption, advanced technologies, low water requirement in horticulture process and government Initiatives. Qatar is also using desalination for potable drinking water, which helped the country to increase agriculture production for almost two decades. Horticulture is the new trend in agriculture production which have given boost to the production.

Petroleum and natural gas are the cornerstones of Qatar's economy and account for more than 70% of total government revenue, more than 60% of gross domestic product, and roughly 85% of export earnings. Qatar has the world's third largest proven natural gas reserve and is the second-largest exporter of natural gas.

Qatar's agricultural products are consumed locally, providing 70 percent and 40 percent of the consumption of summer and winter vegetables, respectively. In addition to vegetables, Qatar produces cereals, fruits and dates, eggs, poultry, and dairy products. Despite a noticeable increase in agricultural production in the course of the past 20 years, however, Qatar continues to rely on food imports, especially foodstuffs and live animals, which account for roughly 10 percent of total imports.
