Women’s Lingerie-Ladies Undergarments (Bra & Panties)

www.entrepreneurindia.co
Hosiery industry is an ancient industry in the field of textile industry having very good potential in domestic market and also in the export market. There is increasing market demand for hosiery undergarments for its various advantages. Cotton undergarments are widely used by all classes of people because of its good absorbency, cheaper prices and ready availability. These foundation garments are used by the people throughout the year under different climatic conditions. It is presumed that there will be no problem in marketing of knitted undergarments of good quality.
Ladies innerwear (Bra and panties) is the highest growing apparel item across all income groups and exclusive boutiques have popped up in all places. Nothing cramps the style faster than ill-fitting and uncomfortable undergarments. Thus, innerwear are not only made attractive, but also comfortable and practical. Top stylists unchain their creativity by inventing fabulous new forms and materials which make ladies innerwear even more sexy, eccentric and wild, without leaving out elegance.
There has been an increase in demand for innovative, comfort-oriented undergarments and lately, many women are forgoing those fussy lingerie designs for simple, uncomplicated ladies undergarments. In addition to keeping outer garments from soiling, ladies innerwear are worn for a variety of reasons: warmth, comfort and hygiene being the most common.
Market Outlook

The Innerwear Category is one of the high growth categories in the apparel market and promises growth and innovation. The higher income, along with higher discretionary spending, growing fashion orientation of consumers and product innovations by the innerwear market have turned innerwear from a traditionally utilitarian item to an essential fashion requirement.
The current size of the Indian innerwear market is Rs. 15,870 crores ($2.9 billion). The category is also growing at an impressive CAGR of 12 per cent and is expected to reach Rs. 27,900 crores ($5.1 billion) by 2017. The womens innerwear market, which is driven by value-added innerwear products, contributes around 60 per cent to the market.
The women’s innerwear market worth Rs. 9,540 crores ($1.7 billion) is one of the fastest growing categories within women’s apparel. This category is growing at a CAGR of 14 per cent, and is expected to reach Rs. 18,380 crores ($3.4 billion) by 2017.
The lingerie market in India can be classified into super-premium, premium, mid-market and economy and mass market segments. A major share of the lingerie market is held by the mid-market and economy segments, in terms of both value and volume. The super-premium and premium segments are relatively smaller, but fast-growing segments.
In the present scenario, the premium and super premium segments of the lingerie industry are advancing following a consumer shift from economy and mid-market segment to the premium segment.

90% of lingerie in India are sold in mom and pop stores where the experience is very poor because of no trial room, no female staff, stocking capacity is very low, no guidance on size etc. Here, interestingly selling lingerie online is not difficult because the product is seen as utility product in India.
According to a research report, in volume terms, the women’s lingerie segment holds a 52 per cent share of the total innerwear market in India. In value terms, the women’s lingerie segment holds a 66 per cent share of the total innerwear market, thereby enjoying a higher Average Selling Price (ASP) as compared to the men’s innerwear market.
India's lingerie market is currently valued at $3 billion. A mere 1% of it is online. In the next few years the market value is projected to jump to $5 billion. While physical stores obviously ring in the bulk of the sales, the unavailability of sizes, lack of privacy and shortage of trained personnel has paved the way for online lingerie portals.

Reasons for buying our report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product.

• This report provides vital information on the product like it’s characteristics and segmentation.

• This report helps you market and place the product correctly by identifying the target customer group of the product.
This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials.

The report provides a glimpse of government regulations applicable on the industry.

The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions.
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.

• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.

• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.
Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Women's Lingerie-Ladies Undergarments (Bra & Panties)” provides an insight into the Women's Lingerie-Ladies Undergarments (Bra & Panties) market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Women's Lingerie-Ladies Undergarments (Bra & Panties) project. The report assesses the market sizing and growth of the Indian Women's Lingerie-Ladies Undergarments (Bra & Panties) Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
