Chilli Oleoresin

Paprika Oleoresin, Paprika Extract, Oil-soluble Extract from the Fruits Of Capsicum Annuum, Capsicum Frutescens, Oleoresin Capsicum, Chilli Extract, Spice Oleoresin, Flavouring Agent, Coloring Agent, Chili Oleoresin, Chilly Oleoresin

Paprika Oleoresin is a deep red colored, semi viscous liquid extracted from dried red pepper or paprika. It draws its deep red color from various Carotenoids present in Red Pepper. Paprika Oleoresin is a natural extract without any antioxidant. It is highly sensitive to light, heat and air. The paprika oleoresins are produced by solvent extraction of dried, ground red pepper fruits,
using a solvent-system compatible with the lipophilic/hydrophilic characteristics of the extract sought and subsequent solvent-system removal. The solvents most commonly used for paprika oleoresin extraction are trichloroethylene, ethylacetate, acetone, propan-2-ol, methanol, ethanol and n-hexane. Paprika powder originally was retailed and the product used in the kitchen only.
Now the product finds a huge market for applications in the food ingredient industry; mainly meat processing, sauces and snack food segments. Since the 1960’s requirements arose for the standardization of application in the food ingredient industry. Methods were developed to measure the concentration of the pigments, carotenoids, in paprika powder.
Capsaicin is used as an analgesic in topical ointments, nasal sprays (Sinol-M), and dermal patches to relieve pain, typically in concentrations between 0.025% and 0.25%. It may be applied in cream form for the temporary relief of minor aches and pains of muscles and joints associated with arthritis, backache, strains and sprains, often in compounds.
The major driving factors for oleoresins market is increasing popularity and food & beverage industries on global level. Strong economical growth coupled with rising disposable income and changing lifestyle has been resulted into growing demand for spicy food in India.

Global paprika market is expected to witness strong growth over the forecast period on account of increasing demand for spice oils from food industry.
Rising consumer awareness towards health benefits of paprika over traditional raw spices is further expected to drive the market over the projected period. Demand for specialty products has been increasing on account of growing consumer preference towards health benefit products in addition to coloring and flavoring properties, which is expected to open several growth opportunities for paprika market over the forecast period.
Increasing demand for coloring foodstuff is one of the key driving factors for the market. Demand for paprika is also increasing owing to its special coloring properties which is due to carotenoid pigments content, which add major health benefits in wide range of food products.
1. Flavouring Agent: Due to its pungent effect it is used to provide flavour in food products.

2. Coloring Agent: Coloring of food, eatables and medicines is commonm application where chilli oleoresin gives a range of red color.

3. Safety Gear: It is used in making safety gear for girls and can make a person blind for few minutes.

4. Preservative: Capsaicinoids help to preserve the meet and other food items against microbial activity.
Benefits:

1. Dence Color: Its red color the most used natural red color in the world.

2. Pharmacological: Chilli oleoresin possesses anti-oxidant, analgesia, anticancer & anti-inflammation features. It radically reduce free radicals in our body.
1. **Pharmaceuticals:** Chilli oleoresin compounds are used extensively in pharmaceuticals industry. Capsaicinoids are quite effective as analgesia, anticancer, anti-inflammatory, antioxidant and anti-obesity. Capsaicinoids may have potential application in pain relief, cancer prevention and weight loss. In addition, capsaicinoids also display the benefits on cardiovascular and gastrointestinal system.

2. **Food:** Chilli extract has been used for coloring various types of food.
Few Indian Major Players are as under

- A V T Natural Products Ltd.
- Akay Flavours & Aromatics Ltd.
- Enjayes Spices & Chemical Oils Ltd.
- Kancor Ingredients Ltd.
- Naturite Agro Products Ltd.
- South East Agro Inds. Ltd.

Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services

- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad
What do we offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Market Research Reports
- Technology Books and Directory
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)
How are we different?

- We have two decades long experience in project consultancy and market research field.
- We empower our customers with the prerequisite know-how to take sound business decisions.
- We help catalyze business growth by providing distinctive and profound market analysis.
- We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors.
- We use authentic & reliable sources to ensure business precision.
Our Approach

- Requirement collection
- Thorough analysis of the project
- Economic feasibility study of the Project
- Market potential survey/research
- Report Compilation
Who do we serve?
