Textile Auxiliaries and Dyestuff Industry
Dyeing Auxiliary, Finishing Auxiliary, Dyes and Dye Intermediates, Textile Auxiliary, Chemicals with Manufacturing Processes and Formulations
The Textile Auxiliaries are specially used for washing and dying of yarns and fabrics. These auxiliaries are formulated for textile products in the forms of cationic, non-ionic, surfactants and amphoteric. Textile chemicals are the specialty chemicals used by textile processing industry for dyeing and processing of textiles in order to get the final end product with required characteristics.

Many companies are nowadays manufacturing textiles auxiliaries like wetting agent, sequestering agent, detergent, polyamide softeners, silicon softeners, anti-back staining agent, different fixing agents etc.
Dyestuff industry plays an important role in the economic development of the country. The Indian Dyestuff Industry, which was primarily started to cater to the needs of domestic textile industry, now not only meets more than 95% requirement of the domestic market, but has gradually also made a dent in the global market. It is one of the core chemical industries in India. It is also the second highest export segment in chemical industry. The Indian dyestuff industry is made up of about 1,000 small scale units and 50 large organized units, who produce around 1,30,000 tonnes of dyestuff.
The major users of dyes in India are textiles, paper, plastics, printing ink and foodstuffs. The textile industry is the major consumer of dyestuffs and about 70% of the total production is consumed by this sector. Globally the dyestuffs industry has seen an impressive growth. Dyestuff can be used for Printing inks, plastics, textiles, paper and foodstuff. The world consumption for dyestuff accounts for printing inks at 40%, paints 30%, plastics 20% and others from segments like textiles.
Textile auxiliaries are defined as chemicals of formulated chemical products which enables a processing operation in preparation, dyeing, printing of finishing to be carried out more effectively or which is essential if a given effect is to be obtained. Certain Textile Auxiliaries are also required in order to produce special finishing effects such as wash & wear, water repellence, flame retardancy, aroma finish, anti odour, colour deepening etc.

The prime consideration in the choice of Textile materials is the purpose for which they are intended, but colour has been termed the best salesman in the present scenario.
The modern tendency is towards an insistence on colour which is fast to light, washing, rubbing, and bleaching; this movement makes a great demand on the science of dyeing. Auxiliaries, dyes and dye intermediates play a vital role in textile processing industries. The manufacture and use of dyes is an important part of modern technology. Because of the variety of materials that must be dyed in a complete spectrum of hues, manufacturer now offer many hundreds of distinctly different dyes. The major uses of dyes are in coloration of textile fibers and paper. The substrates can be grouped into two major classes-hydrophobic and hydrophilic.
Hydrophilic substances such as cotton, wool, silk, and paper are readily swollen by water making access of the day to substrate relatively easy. On other hand hydrophobic fibers, synthetic polyesters, acrylics, polyamides and polyolefin fibers are not readily swollen by water hence, higher application temperatures and smaller molecules are generally required. Dye, are classified according to the application method. Some of the examples of dyes are acid dyes, basic or cationic dyes, direct dyes, sulfur dyes, vat dyes, reactive dyes, mordant dyes etc. Colorants and auxiliaries will remain the biggest product segment, while faster gains will be seen in finishing chemicals.
World demand for dyes and organic pigments is forecast to increase 3.9 percent per year through 2013, in line with real gains in manufacturing activity. Volume demand will grow 3.5 percent annually. While the textile industry will remain the largest consumer of dyes and organic pigments, faster growth is expected in other markets such as printing inks, paint and coatings, and plastics. Market value will benefit from consumer preferences for environmentally friendly products, which will support consumption of high performance dyes and organic pigments.
The market for textile chemicals in India is highly fragmented and comprises of over 300 large and small players. India Textile Auxiliaries Market is anticipated to grow at a healthy pace during 2016-2021 on account of increasing demand for these chemicals in various applications such as home furnishing and apparel, technical textile. The rising advancements in the textile industry of India is due to changing lifestyle and
increased spending capacity of Indian population which is subsequently, driving the textile chemicals market of India.

Textile dyeing industry, which includes both domestic market and exports, is projected to grow at 9% CAGR to reach USD 210 billion by 2022; domestic textile market in India is expected to grow at a CAGR of 8% to reach USD 127 billion by 2022.
Some of the fundamentals of the book are antimony and other inorganic compounds, halogenated flame retardants, phosphorous compounds, dyes and dye intermediates, textile fibers, pigment dyeing and printing, dry cleaning agents, dry cleaning detergents, acrylic ester resins, alginic acid, polyvinyl chloride, sodium carboxy methyl cellulose, guar gum, industries using guar gum, gum tragacanth, hydroxyethyl cellulose, polyethylene glycol, industries using polyethylene glycols, etc.
The book covers details of antimony and other inorganic compounds, halogenated flame retardants, silicone oils, solvents, dyes and dye intermediates, dry cleaning agents, different types of gums used in textile industries, starch, flame retardants for textile and many more. This is very resourceful book for new entrepreneurs, technologists, research scholars and technical institutions related to textile.
# Table of Contents

1. **Antimony and Other Inorganic Compounds**
   - Antimony Compounds
   - Boron Compounds
   - Alumina Hydrates
   - Molybdenum Oxides
   - Applications

2. **Halogenated Flame Retardants**
   - Principles of Developing Flame-Retardant Polymers
   - Testing
   - Polymer Classes
   - Additive Flame Retardants
   - Reactive Flame Retardants
   - Economic Aspects
3. Phosphorous Compounds
   - Mechanism of Action of Phosphorus Flame Retardants
   - Phosphorus-Based Flame Retardants in Commercial Use
   - Health and Safety Factors
   - Economic Aspects

4. Urea-Formaldehyde Resins
   - Composition Variables
   - Melamine

5. Melamine-Formaldehyde Resins
   - New Nitrogen Compounds for Amino Resins

6. High Styrene-butadiene Rubber Resins

7. Chlorinated Biphenyls
8. Chlorinated Paraffins

9. Synthetic Rubber Resin Latexes
   Procedure

10. Silicone Oils
    Procedure

11. Solvents
    Types of Volatile Solvents

12. Dyes and Dye Intermediates
    Textile Fibers
    Cotton and Rayon
    Wool and Silk
    Cellulose Acetates
Polyamides
Polyester
Acrylics
Vinyls
Polyolefins
Glass Fibers
Paper
The Properties of Dyes
Classification of Dyes
Acid dyes
Basic or Cationic Dyes
Direct Dyes
Sulfur Dyes
Vat Dyes
Reactive Dyes
Disperse Dyes
Mordant Dyes
Sulfonation
Halogenation
Alkaline Fusion
Oxidation
Other Important Reactions
Production of Dye Intermediates
The Manufacture of Dyes
Azo dyes
Manufacturing Processes for Azo Dyes
Triphenylmethane Dyes
Xanthene Dyes
Anthraquinone and Related Dyes
Indigoid and Thioindigoid dyes
Sulfur Dyes
Phthalocyanines
Fluorescent brightening agents
Production Statistics
New Developments in Dyes
13. **Dry Cleaning Agents**
- Stoddard Solvent
- Specification Tests
- Perchloroethylene
- Specification tests
- Procedure
- Fluorocarbon Solvent
- Used Drycleaning Solvents
- Drycleaning Detergents
- Methods of Analysis
- Specification tests
- Procedure
- Performance tests
- Procedure

14. **Acrylic Ester Resins**
15. Alginic Acid
General Information
Chemical Structure
Manufacture
Physical Properties
Solution Properties
Compatibilities
Toxicology/Environment
Application Procedures
Film forming
Pie Fillings
Industrial Applications
Laboratory Techniques
Viscosity Measurement

Niir Project Consultancy Services

An ISO 9001:2008 Company

www.entrepreneurindia.co
Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services.
- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad.
What do we offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Business Plan
- Industry Trends
- Market Research Reports
- Technology Books and Directory
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)
We have two decades long experience in project consultancy and market research field

We empower our customers with the prerequisite know-how to take sound business decisions

We help catalyze business growth by providing distinctive and profound market analysis

We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors

We use authentic & reliable sources to ensure business precision
Our Approach

- Requirement collection
- Thorough analysis of the project
- Economic feasibility study of the Project
- Market potential survey/research
- Report Compilation
Who do we serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI’s
- Foreign Investors
- Non-profit Organizations, NBFC’s
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations

www.entrepreneurindia.co
Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling
Bamboo And Cane Based Projects
Building Materials And Construction Projects
Biodegradable & Bioplastic Based Projects
Chemicals (Organic And Inorganic)
Confectionery, Bakery/Baking And Other Food
Cereal Processing
Coconut And Coconut Based Products
Cold Storage For Fruits & Vegetables
Coal & Coal Byproduct
Sectors We Cover

- Copper & Copper Based Projects
- Dairy/Milk Processing
- Disinfectants, Pesticides, Insecticides, Mosquito Repellents
- Electrical, Electronic And Computer based Projects
- Essential Oils, Oils & Fats And Allied
- Engineering Goods
- Fibre Glass & Float Glass
- Fast Moving Consumer Goods
- Food, Bakery, Agro Processing
Sectors We Cover

- Fruits & Vegetables Processing
- Ferro Alloys Based Projects
- Fertilizers & Biofertilizers
- Ginger & Ginger Based Projects
- Herbs And Medicinal Cultivation And Jatropha (Biofuel)
- Hotel & Hospitality Projects
- Hospital Based Projects
- Herbal Based Projects
- Inks, Stationery And Export Industries
Sectors We Cover

- Infrastructure Projects
- Jute & Jute Based Products
- Leather And Leather Based Projects
- Leisure & Entertainment Based Projects
- Livestock Farming Of Birds & Animals
- Minerals And Minerals
- Maize Processing (Wet Milling) & Maize Based Projects
- Medical Plastics, Disposables Plastic Syringe, Blood Bags
- Organic Farming, Neem Products Etc.
Sectors We Cover

- Paints, Pigments, Varnish & Lacquer
- Paper And Paper Board, Paper Recycling Projects
- Printing Inks
- Packaging Based Projects
- Perfumes, Cosmetics And Flavours
- Power Generation Based Projects & Renewable Energy Based Projects
- Pharmaceuticals And Drugs
- Plantations, Farming And Cultivations
- Plastic Film, Plastic Waste And Plastic Compounds
- Plastic, PVC, PET, HDPE, LDPE Etc.
