Introduction

Corn starch, corn flour or maize starch is the starch derived from the corn (maize) grain. The starch is obtained from the endosperm of the corn kernel. Corn starch is a popular food ingredient used in thickening sauces or soups, and is used in making corn syrup and other sugars.
Starch or amylum is a carbohydrate consisting of a large number of glucose units joined by glycosidic bonds. This polysaccharide is produced by most green plants as an energy store. It is the most common carbohydrate in human diets and is contained in large amounts in such staple foods as potatoes, wheat, maize (corn), rice, and cassava.
Starch is processed to produce many of the sugars in processed foods. Dissolving starch in warm water gives wheat paste, which can be used as a thickening, stiffening or gluing agent. The biggest industrial non-food use of starch is as adhesive in the paper making process. Starch can be applied to parts of some garments before ironing, to stiffen them.
Maize Starch is a mixture of polysaccharides about 74% amylopectin and 26% amylose. It is a fine White Powder, odorless, taste slight and characteristic and microbiologically suitable as Pharmaceutical grade, useful in Pharmaceutical and Food Industry as a binder, thickener, disintegrating agents in tableting and various formulations.
Starch derivative is a growing industry, and with technological advancements taking place, new products are being launched on a regular basis. The various stakeholders in the industry are the raw material suppliers, processors, and the product manufacturers.
Starch derivatives are applied in food & beverages, feed, and non-food applications like, pharmaceutical, cosmetics, paper making, bioethanol, and other industrial applications. Asia-Pacific Holds the largest market share in the global starch derivatives market, by geography, and is also estimated to achieve the highest growth rate. Any entrepreneurs venture into this field will be successful.

Niir Project Consultancy Services

An ISO 9001:2008 Company
Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services

- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad
What do we offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Market Research Reports
- Technology Books and Directory
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)
How are we different?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision
Our Approach

1. Requirement collection
2. Thorough analysis of the project
3. Economic feasibility study of the Project
4. Market potential survey/research
5. Report Compilation
Who do we serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI’s
- Foreign Investors
- Non-profit Organizations, NBFC’s
- Educational Institutions
- Embassies & Consulates
- Consultancies
