Manufacturing of Synthetic Resins with Formulae & Processes

(allyl resins, alkyd resins, electro deposition primers, zinc rich coatings, alginate, carboxymethyl cellulose, carrageenan, guar gum, polyethylene glycol, alginate, polyvinyl pyrrolidone, silicones resins)
Synthetic resin is typically manufactured using a chemical polymerization process. This process then results in the creation of polymers that are more stable and homogeneous than naturally occurring resin. Since they are more stable and are cheaper, various forms of synthetic resin are used in a variety of products such as plastics, paints, varnishes, and textiles. There are various kinds of synthetic resins; silicones resins, polyvinyl pyrrolidone, gum arabic, epoxy resins, guar gum, carrageenan, carboxymethyl cellulose, etc. Resins are polymeric compound which are available in nature and are also manufactured by synthetic routes. Some resins are also manufactured by partial modification of natural precursor polymer by chemical.
Silicones are unique among the commercially important polymers both in chemistry and in variety of industrial applications. Silicones can be applied as high temperature insulating varnishes, impregnates to be used with glass, asbestos, mica products and encapsulating agents for electrical components. Water borne dispersions or emulsions, for example emulsions of vinyl or acrylic copolymers are popular in decorative coatings. The applications of synthetic resins are seen in some important industries like paint industry, adhesive industry, the textile industry, paper, paint, agricultural industry, petroleum industry etc. As it can be seen that there is an enormous scope of application of resins hence it is one of the major field to venture.
Some of the fundamentals of the book are electrodepositable pigmented coating compositions based on alkyd resins, phosphorus containing allyl resins, vapour permeation cure technology, characterization of water soluble anodic electrodepositive pigmented coating compositions, protection of concrete substrates, zinc rich coatings, electro deposition primers, developments in thermosetting powder coatings, application of powder coatings, polyethylene glycol, petroleum recovery and processing, industries using polyethylene glycols, silicones resins, preparation & formulation of silicone resin based coatings, pigments and dyes etc. Resin is a thermosetting synthetic polymer having properties such as adhesive strength, luster, and hardness.
Epoxy resins are available in the form of liquid as well as high viscosity solid. Epoxy resins are segmented on the basis of applications such as paint-coatings, electrical & electronics, wind energy, construction, and composites.

During 2009–2013, consumption of epoxy resins for coatings increased at an average annual rate of 8.3% and for electrical and electronics applications at 6.8%. Epoxy resins for composite applications increased at an average rate of 8.1% per year.

In 2013, the largest end use for epoxy resins was coating applications, which accounted for 43% of total consumption, followed by electrical and electronics applications, at 35%. The resin market accounted for USD 7.54 Billion in 2015 and is expected to reach USD 11.22 Billion by 2021, growing at a CAGR
of around 6.9% between 2016 and 2021. In INDIA, epoxy resins consumption will grow at an average annual rate of 4.9% for 2013–2018. Epoxy resin consumption for composites in the United States is forecast to grow at an average annual rate of nearly 10% during 2013–2018. Synthetic Resins are used by lot of industries. Yet, little emphasis has been placed on the comparative value on functionality of polymeric material as a class. These resins have been classified in separate categories, usually in terms of their Chemistry, sources or end uses. The present book contains formulae, processes and other valuable details for various synthetic resins. This is very useful book for those concerned with development, consultants, research scholars, new entrepreneurs existing units, institutional libraries etc.
Table of Contents

1. PHOSPHORUS CONTAINING ALLYL RESINS

Properties of Monomers
Polymerization
Applications

2. ELECTRODEPOSITABLE PIGMENTED COATING COMPOSITIONS BASED ON ALKYD RESINS

Introduction
Experimental
Materials
Synthesis of water soluble alkyd resin from phthalic anhydride and maleic anhydride (A1).

www.entrepreneurindia.co
Synthesis of water soluble alkyd resin from phthalic anhydride and trimellitic anhydride (A2).
Synthesis of water soluble alkyd resin from phthalic anhydride and maleopimamic acid (A3).
Synthesis of water soluble alkyd resin from maleopimamic acid (A4).
Synthesis of water soluble methylated melamine formaldehyde resin.
Preparation of water soluble anodic electrodepositive pigmented coating compositions.
3. VAPOUR PERMEATION CURE TECHNOLOGY

Introduction
Vapour Permeation Cure (VPC)
Primary Advantages of VPC Coating
Disadvantages
Limitations
Vapour Injection Cure (VIC) Process
Chemical Composition
Reaction and Mechanism
Advantages of VIC

Conclusion

4. PROTECTION OF CONCRETE SUBSTRATES

Differences Between Concrete and Metallic Substrates
Constructions Influence
Coatings Used on Concrete
Organic coatings  Thin film
Modified Epoxies
Furans
Chlorinated Rubbers
Waterborne Coatings
Vinyl Esters
Other Coatings
Organic Coatings  Thick Film
Elastomeric Coatings
Polyurethane Coatings
Synthetic Rubber (Elastomers)
Resin Rich System
Polymer Concretes
Plastic Liners
Brick or Tile and Mortar Systems
Machinery Setting Grouts
Inorganic Coatings
New Versus Aged or Deteriorated Substrates
Quality Assurance
Conclusion

5. ZINC RICH COATINGS
Inhibitive Primers
Organic Zinc Rich Coatings
Inorganic Zinc Rich Coatings
Surface Preparation
White Metal Blasting
Galvanising
Galvanising and Zinc Rich Coating Comparison
Beach Front Exposure
Tidal Exposure
5% Salt Spray Test
Inorganic Zinc Rich Coating Advantages and Limitations
Application of Inorganic Zinc Rich Coatings
Cost Aspects

6. ELECTRO DEPOSITION PRIMERS
Electrodeposition Primers
Mechanism of Electrodeposition
Electro osmosis

www.entrepreneurindia.co
Advantages of Electrodeposition
Types of Electrodeposition Primers
Shift to Cathodic E.D. Primer
Cathodic Electrodeposition Paint
Comparison of AED and CED
Properties of Dry Film
Latest Development in C.E.D.
Comparative Features of Different Types of CED
Plant Design and Process Control
Trends in Top Coats
Up gradation of Appearance & Performance of Top Coats
Solid Colors
Metallic Colors
Developments in Top Coat Application
Developments in Thermosetting Powder Coatings
Powder Manufacture
Types of Powder
Powder Coatings  Method of Application
Electrostatic Spray Corona Charging
Faraday Cage
Back Ionization
Electrostatic Spray Tribo Charging
Advantages of Powder Coatings
Dis Advantages of Powder
Economic Advantages of Powder Coatings
Application of Powder Coatings
General Metal Coatings
Industrial Machinery
Conclusion
7. WATERBORNE DISPERSIONS
Formulating Principles
Pigments
Additives
Binders
Acrylics/Vinyls/Vinyl Acrylic Emulsions
Polyurethane Dispersions
Cross Linking
Epoxy Dispersions
Miscellaneous Systems
Conclusion

8. ALGINATE
Chemical Structure
Chemical Derivatives
Manufacture
Physical Properties
Powdered Alginates

Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects. Here’s we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is “Instant Online Project Identification and Selection”
NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.

Niir Project Consultancy Services

An ISO 9001:2008 Company

www.entrepreneurindia.co
Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services.

- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad.

www.entrepreneurindia.co
We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.
We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.
What do we offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Business Plan
- Industry Trends
- Market Research Reports
- Technology Books and Directory
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)
How are we different?

- We have two decades long experience in project consultancy and market research field.
- We empower our customers with the prerequisite know-how to take sound business decisions.
- We help catalyze business growth by providing distinctive and profound market analysis.
- We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors.
- We use authentic & reliable sources to ensure business precision.
Our Approach

- Requirement collection
- Thorough analysis of the project
- Economic feasibility study of the Project
- Market potential survey/research
- Report Compilation

www.entrepreneurindia.co
Who do we serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI’s
- Foreign Investors
- Non-profit Organizations, NBFC’s
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations
Sectors We Cover

- Ayurvedic And Herbal Medicines, Herbal Cosmetics
- Alcoholic And Non Alcoholic Beverages, Drinks
- Adhesives, Industrial Adhesive, Sealants, Glues, Gum & Resin
- Activated Carbon & Activated Charcoal
- Aluminium And Aluminium Extrusion Profiles & Sections,
- Bio-fertilizers And Biotechnology
- Breakfast Snacks And Cereal Food
- Bicycle Tyres & Tubes, Bicycle Parts, Bicycle Assembling
