Introduction

Pitaya fruit, pitahaya fruit or commonly known as Dragon Fruit is among the most nutritious and wonderful exotic fruits. It is a favorite to many, particularly people of Asian origin. There are 3 types dragon fruit based on their colour.

- Red colour fruit with white colour flesh.**
- Red colour fruit with red colour flesh.**
- Yellow colour fruit with white colour flesh.**

The dragon fruit can be made into juices, wines, flavorings and of course, medicine. Like many other fruits, the dragon fruit has medicinal benefits that a lot of people have grown to trust and depend on.

Dragon Fruit (Hylocereus undatus) production is gaining more and more recognition as an important crop. It is a nutritious fruit with a variety of uses. The fruit pulp can be eaten fresh and can be made into various valuable processed products. The fruit possesses medicinal properties: it is known to prevent colon cancer and diabetes, neutralizes toxic substances such as heavy metals, reduce cholesterol and high blood pressure. It is also reported to control high sugar levels, prevent cancer and bleeding, and promote dental health. Dragon fruit helps improve digestion and reduce fat. It helps maintain the health of eyes.

A Dragon Fruit Production Enterprise has been demonstrated to provide viable source of food, income and employment to growers locally and abroad. It could be an asset to backyard growers as well as entrepreneurs of medium and large scale plantations. The marketability of Dragon Fruit in the locality is expected to be very high because of limited number of commercial producers of the product.

Dragon Fruit farming is native to tropical countries. It is one of the fastest growing vine, which needs vertical support to grow.

It can live upto 20 years with extensive care, which means selection of rings and poles is important. Dragon Fruit is an agriculture based product. The cultivation technology is as almost same like we use in cultivating other domestic crops. There is no much difference, just that dragon fruits are from the cactus family, and they need more water than other domestic crops.

There is a lot of demand for Dragon fruit in India. As consumers are getting more and more aware about this fruit; the demand is increasing steadily.

The fact that this fruit has health benefits as well is also a factor. A very few farmers in the States of Maharashtra, Gujarat, Andhra Pradesh, Karnataka & Tamil Nadu have taken up Dragon Fruit cultivation in India. The total All India area of Dragon Fruit cultivation maybe less than 100 acres. The awareness and demand for this fruit is huge in India mainly for its taste, nutritional and medicinal properties. This fruit is packed with excellent health benefits, has good demand in local as well as international market. Hence one can get good returns in dragon fruit cultivation.

India is a tropical country with moderate climate all round the year. Dragon fruit adapts well to tropical climates. There is a huge demand for dragon fruit in the market. It is used by the juice vendors near IT companies. So if you start cultivating you can earn a good amount by supplying your yield to the juice vendors or if you have a potential to value add the fruit you can make a brand of yours and start selling the dragon fruit juice directly.

Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Dragon Fruits Farming”: provides an insight into the Dragon Fruits market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Dragon Fruits Farming project. The report assesses the market sizing and growth of the Indian Dragon Fruits Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Dragon Fruits sector in India along with its business prospects. Through this report we have identified Dragon Fruits Farming project as a lucrative investment avenue.
