Dairy Farming and Dairy Products with Cattle Breeding

(500 Jersey Cows Dairy HB Parlor Milking Process, Veterinary Clinic, Cow Urine Processing, Kande from Cow Dung)

Dairy Products: Processed Cheese, Curd, Butter Milk and Ghee

Dairy farming is a large unorganized sector in India and a major source for livelihood in rural areas. Dairy farming is a class of agriculture for long-term production of milk, which is processed (either on the farm or at a dairy plant, either of which may be called a dairy) for eventual sale of a dairy product.

Commercial and small scale dairy farming in India is no doubt playing an important role in the total milk production and economy of our country. And almost all regions of India are suitable for setting up dairy farming business.
Dairy cow farming means ‘raising highly milk productive cows commercially for milk production purpose’.

Milk Production in India has increased manifold and in the last financial year, the total milk production in the country crossed the mark of 140 Million Tonnes. Milk is used as a food. It is used prepare curd, butter, ghee cream and ice cream etc.

The government is taking several initiatives and introducing yearly plans in order to boost the dairy market. The Indian dairy market is now witnessing the entry of a large number of foreign players.
India’s demand for milk and milk products is increasing twice as fast as the production of milk. The market is also witnessing a consumer shift towards healthier products such as UHT milk, probiotic drinks, Processed Cheese, Curd, Butter Milk & Ghee etc.

India is one of the fastest growing markets for cheese with a total consumption of about 7,000 tons a year. Cheese is becoming a popular item in the menu of all relatively affluent families. Slowly but surely, it will penetrate into the rural markets.
Yogurt, traditionally known as “Dahi” in India, has been a part of the Indian meal, with home-made dahi consumed daily. The Indian palate is well-accustomed to the taste of not only plain yogurt but also such form and taste variants as Lassi, Chaas, Srikhand, Mishti Doi, Raita, etc.

Breeding to meet the demand for beef production, owners also use selective breeding to attain specific traits in their beef cattle. An example of a desired trait could be leaner meat or resistance to illness. Breeds known as dual-purpose breeds are also used for beef production.
These breeds have been selected for two purposes at once, such as for both beef and dairy production. India possesses 27 acknowledged indigenous breeds of cattle and seven breeds of buffaloes. These well-defined breeds are found in the dry parts of the country.

Good breeds of cattle are mostly confined to comparatively dry areas such as Haryana, Punjab, Rajasthan, Gujarat and Madhya Pradesh. Pastures in these areas may qualitatively be enough, but they are often scarce.
India is a land of opportunity for investors looking for new and expanding markets. Dairy food processing holds immense potential for high returns. The dairy food market in the India has witnessed a growth in recent years on account of rising demand for dairy food products fueled by expansion in milk production. The surge in growth is majorly originated from growth in Ice cream and Milk Powder as a segment of dairy food market.
The growth in this segment has been largely led by the domestic factors such as innovative technology and rise in availability of variants. India dairy food market will grow at a considerable CAGR to cross INR 250 billion by 2019 due to the increasing number of dairy farmers and rising average yield of cows.

Reasons for buying our report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product.

• This report provides vital information on the product like its characteristics and segmentation.

• This report helps you market and place the product correctly by identifying the target customer group of the product.
This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials.

The report provides a glimpse of government regulations applicable on the industry.

The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions.
Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.

www.entrepreneurindia.co
Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Dairy Farming with Breeding and Dairy Products” provides an insight into the Dairy Farming with Breeding and Dairy Products market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Dairy Farming with Breeding and Dairy Products project. The report assesses the market sizing and growth of the Indian Dairy Farming and Dairy Products Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
• Good Present/Future Demand
• Export-Import Market Potential
• Raw Material & Manpower Availability
• Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Dairy Farming with Breeding and Dairy Products sector in India along with its business prospects. Through this report we have identified Dairy Farming with Breeding and Dairy Products project as a lucrative investment avenue.

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects.

Here’s we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is “Instant Online Project Identification and Selection”
NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.
