Production and Processing of Wax

(Vegetable Waxes, Synthetic Mineral Waxes, Bayberry Wax, Candelilla Wax, Carnauba Wax, Cotton Wax, Esparto Wax, Esparto Wax, Japan Wax, Ouricury Wax, Palm Waxes, Rice-oil Wax, Sugar Cane Wax, Ucuhuba Wax, Paraffin Wax, Synthetic Mineral Wax, Ozocerite Wax, Montan Wax, Durmont Wax)
Introduction

This growth in demand is driven by a number of new uses for the material. Markets for wax are truly diverse, ranging from simple fuel in manufactured fire logs and candles, to practical applications such as adhesives, anti-oxidation agents in tires, and sizing in construction materials, to even more exotic uses in cosmetics and foods. Although, the largest single consumer of wax in North America remains the packaging area, followed by candles, and then building materials.
On the demand side of the equation, waxes are used in thousands of applications around the world, with candles being the predominant application on a global basis. Candles are estimated to account for 43% of the waxes consumed.

Wax is used as high value product for energy reserve in the world. It not only provides various good products for general public, but increases petrochemical plant revenue also. Renewable alternatives to wax are enjoying new opportunities as a result of a raft of factors.
Among these are a dwindling supply of petroleum-based waxes, skyrocketing paraffin wax prices, and a growing consumer preference for greener products. Growing paraffin wax consumption for cardboard and paper coating mainly in food industry owing to the excellent protection and water barrier properties is expected to stimulate demand over the forecast period. Rising demand for paper in food packaging owing to its biodegradability is likely to fuel demand.
Increasing application in manufacturing hot melt adhesives, industrial & surface protection coatings, rubber & plastic processing aids, pharmaceuticals, electrical insulation, metal castings and fabric proofing & impregnation is expected to fuel demand over the forecast period.

Growing use of alternatives including soy wax, polyethylene wax and beeswax is expected to restrict market penetration. However, the introduction of deoiling technology to produce paraffin wax from slack wax is further expected to open new opportunities over the upcoming years.
This book basically deals with microcrystalline waxes in floor polishes, properties of braxilian grades of carnauba wax, compatibility of paraffin waxes with other substances, synthetic mineral waxes, miscellaneous synthetic waxes, additives for raising melting point of candles, wax coating for fruits, shribs, and plants, effect of paraffin on esparto montan mixtures, water proofing of kraft papers, production of montan wax, polish, abrasives, metal cleaners, nickel silver castings, cleaning, polishing metals for metallographic analysis, paste for wax calf leather, burnishing polishes for automobile maintenance, etc.

The purpose of this book is to present comprehensive information of different types of wax and polishes like their processing, properties and uses. This book is very useful for new entrepreneurs, technocrats, professionals and researchers.
# Table of Contents

## CHAPTER 1
COMPOSITIONS WITH RESINS AND RUBBER
- Resin-wax compositions
- Compatibility of varnish resins with waxes
- Wax-rosin compositions
- Cumar (cumarone-indene resins) and wax compositions
- Methacrylate resin hot-melt blends
- Pliolite S-7 wax compositions
- Microcrystalline wax-resin blends
- Microcrystalline Waxes in Floor polishes
- Wax-rubber compositions
- Wax-Vistanex Blends
- Viscosity of Vistanex-Wax Mixtures
- Water Vapor Transmission
- Flexibility
Sealing Strength
Paper Coatings (wax-Vinyl Copolymer)

CHAPTER 2
VEGETABLE WAXES
Bayberry wax
Source
Candelilla wax
Compatibility
Specifications
Scope
Carnauba Wax
Production
Composition
Properties of Braxilian Grades of Carnauba Wax
Flower wax
First wax
Medium wax
Sandy wax
Fat wax
Specifications
Colour
Adulterations of Carnauba Wax
Cotton wax
Esparto wax
Fir Eax
Properties of Fir wax
Flax wax
Japan wax
Composition
Grades Available
Ouricury wax
Preparation
Composition

Specifications
Palm waxes
Grade available
Cuban Palm wax
Compatibility
Rice-oil wax
Sugar cane wax
Source
Constituents of Sugar Cane Wax
Ucuhuba Wax
Cocoa Butter

CHAPTER 3
PARAFFIN WAX COMPOUNDS
Compatibility of paraffin Waxes with Other Substances
Paraffin wax with Bitumen
CHAPTER 4
SYNTHETIC MINERAL WAXES
Fischer-Tropsch (F-T) Waxes
FT-200 and FT-300 Wax
Specifications
Hardening Fischer-Tropsch Wax
Duroxon waxes
Duroxen Waxes-Group C
Douroxon Waxes- Group E
Duroxon Waxes- Group H
Duroxon Waxes- Group J
Duroxon Waxes- Group R
Paraflint
Paraflint as Modifier
Polymekon
CHAPTER 5
MISCELLANEOUS SYNTHETIC WAXES
Albacer
Atlasene Waxes
BASF waxes
Cardis waxes
Ceramid
Diolin (Octadecanediol)
Glyco Waxes
Flexo Wax C
Oxazoline waxes
Toxicity
Experimental Synthetic waxes

CHAPTER 6
INDUSTRIAL USES OF WAX
Adhesives
Candles
Wicks
Winding
Size of Candles
Machinery
Wax Candles
Paraffin Candles
Temperature Control
Colors, Sizes, Shapes
Standard Candle
Additives for Raising Melting Point of Candles
Melting point of Wax mixtures
Congealing Point of Candles
Coatings
Foil Coatings
Hot-melt coatings
Protective and Decorative Coatings
Wax Coating for Fruits, Shrubs, and Plants
Cosmetics
Cold creams

Niir Project Consultancy Services

AN ISO 9001:2008 COMPANY

www.entrepreneurindia.co
Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services

- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad

www.entrepreneurindia.co
What do we offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Business Plan
- Industry Trends
- Market Research Reports
- Technology Books and Directory
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)
