Introduction

Instant noodles are a precooked and usually dried noodle block, sold with flavoring powder and/or seasoning oil. The flavoring is usually in a separate packet, although in the case of cup noodles the flavoring is often loose in the cup. Some instant noodle products are seal packed; these can be reheated or eaten straight from the packet. Dried noodle blocks are cooked or soaked in boiling water before eating.

The main ingredients used in dried noodles are wheat flour, palm oil, and salt. Common ingredients in the flavoring powder are salt, monosodium glutamate, seasoning, and sugar.

The emergence of instant noodles has added a new dimension to consumers' meals; noodles are being consumed not just by kids (who are the core target audience) as an evening snack or a 'tiffin' meal but by consumers across all age groups, as an eating option beyond the 'mundane' ones.

While it continues to be a home snack, it is also increasingly being consumed at work place, colleges, etc. Geographically too, the appetite for instant noodles is growing with players now eyeing the semi-urban and rural markets.

India is the most attractive Instant Noodles market in the world. Instant Noodles market matured in India over the years but still it is limited to few players.

Urbanization, rising income levels, working couples, interstate migration and changing lifestyle of young India are key drivers for the noodles market. The product was positioned as meal which is filling and can be prepared in just a few minutes, thus offering both convenience and time saving.

Market witnessed a growth of 7.4% from 2010 to 2014. Despite of ban on instant noodles in some states of India for short time, instant noodles market will witness a growth of 6.55% till 2020.

Patanjali Group has launched Noodles in India with name “Patanjali Atta Noodles” and they are promoting it as healthy noodles made from wheat floor.

The global market for instant noodles is projected to reach 145.8 billion packs by 2020, driven by the launch of innovative flavors customized to regional preferences and the rising tide of the convenience food trend in emerging markets. Busy lifestyles, growing number of working women, increasing desire of minimal cooking efforts, and reduced labor time for cooking are among the key factors driving growth in the instant noodles market.

Reasons for buying our report:

- **This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the project.**
- **This report provides vital information on the product like it's characteristics and segmentation**
- **This report helps you market and place the product correctly by identifying the target customer group of the product**

- **This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials**
- **The report provides a glimpse of government regulations applicable on the industry**
- **The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions**

Our Approach:

- Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
- The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players
- We use reliable sources of information and databases. And information from such sources is processed by us and included in the report

Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Instant Noodles” provides an insight into the Instant Noodles market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Instant Noodles project. The report assesses the market sizing and growth of the Indian Instant Noodles Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- **Good Present/Future Demand**
- **Export-Import Market Potential**
- **Raw Material & Manpower Availability**
- **Project Costs and Payback Period**

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Instant Noodles sector in India along with its business prospects. Through this report we have identified Instant Noodles project as a lucrative investment avenue.
