Corrugated Cardboard Boxes Manufacturing Unit with Printing

www.entrepreneurindia.co
Cardboard boxes are industrially prefabricated boxes, primarily used for packaging goods and materials. Specialists in industry seldom use the term cardboard because it does not denote a specific material.

The term cardboard may refer to a variety of heavy paper-like materials, including card stock, corrugated fiberboard, or paperboard.
Packing, in a way represents the extent of industrialization of a country. Packaging has been assuming importance in the context of growth of industries in general and consumer industries in particular. Among the packaging materials, paper and paper based products continue to occupy a predominant place. Corrugated boxes form an integral part of the packaging industry.
These are found everywhere helping people shift both domestic as well as industrial items safely from one place to the other.

A corrugated box is quite strong and can withstand huge weights. These boxes are especially made of cardboard. Also there are partitions which basically protect items inside and hold them in place so as to avoid damage.
Market Outlook

The global market for corrugated boxes is forecast to grow from $63.29 billion in 2016 to reach $76.76 billion by 2021, at an estimated CAGR of 3.94% with flexography printing and slotted boxes accounted for the largest market share due to the growing demand for environment-friendly packaging and growth of the e-commerce industry.
Global demand for corrugated boxes is forecast to increase 4.2% per year to 234 billion square meters in 2017.

The Global Corrugated Box Packaging Market is expected to grow at a CAGR of 4.37% during the period 2015 to 2022. The increasing industrial activity in manufacturing sector and rising demand for value added box are the drivers for corrugated box packaging market.
Corrugated boxes and solid fiber boxes are the largest and fastest growing segments in corrugated & paperboard boxes market due to recovery of the manufacturing sector.

Food and beverage segment dominates the global corrugated box packaging market due to increasing demand for value added boxes. World demand for corrugated boxes is expected to increase 3.7 percent per year through 2019, approaching 260 billion square meters.

Reasons for buying our report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product.

• This report provides vital information on the product like its characteristics and segmentation.

• This report helps you market and place the product correctly by identifying the target customer group of the product.
• This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials

• The report provides a glimpse of government regulations applicable on the industry

• The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.

• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.

• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Corrugated Cardboard Boxes” provides an insight into the Corrugated Cardboard Boxes market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Corrugated Cardboard Boxes project. The report assesses the market sizing and growth of the Indian Corrugated Cardboard Boxes Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Corrugated Cardboard Boxes sector in India along with its business prospects. Through this report we have identified Corrugated Cardboard Boxes project as a lucrative investment avenue.

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects. Here’s we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is “Instant Online Project Identification and Selection”
NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.
