Paper Core and Paper Tubes

Cylindrical Paper Tubes

Introduction

Paper cores are strong cardboard tubes or cylinders which are used in fabric, adhesive, electrical, paper product and converting industries as a sturdy base around which to wind materials for storage or distribution. Depending on the intended use of the tubes, paper cores can be made from heavy-duty thick cardboard for industries such as fabric and electrical, whereas for toilet paper or paper towels, the cores can be made from thinner, less durable cardboard or paper.
Industrial paper cores are manufactured to provide stable storage from the inside of a product roll. Made from wood pulp fiber, paper cores can be combined with a variety of adhesives and laminates for the manufacture of roll products including textiles, newsprint, plastic films and other manufacturing processes. Paper core market depends on packaging industry. It is used in many industries for winding a rewinding the product, such as aluminium foil packaging, polyester film, kraft paper, duplex paper, textiles and many more.
The Paper Tube and Paper Cores Industry

The processing of industrial paper cores is a lynchpin in roll manufacturing that resides at the nexus of:

- The Recycling Industry
- Sustainability/corporate social responsibility (CSR)
- Green manufacturing
- Green packaging/labeling
- Green Supply Chain
Aluminium foil industry is forecast to reach 8.7% p.a. in the coming years. The cotton yarn and other yarns market is estimated to be valued at USD 10.27 billion in 2015. It is projected to grow at a CAGR of 4.2% from 2015 to 2020. So paper core demand directly depends upon the demand of above listed products. As their market value is increasing paper core value is increasing with the same pace. Thus, as an entrepreneur this project offers an exciting opportunity to you.

Reasons for buying our report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product

• This report provides vital information on the product like it’s characteristics and segmentation

• This report helps you market and place the product correctly by identifying the target customer group of the product
• This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials

• The report provides a glimpse of government regulations applicable on the industry

• The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.

• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.

• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.
Scope of the Report

The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Paper Core” provides an insight into the Paper Core market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Paper Core project. The report assesses the market sizing and growth of the Indian Paper Core Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
• Good Present/Future Demand
• Export-Import Market Potential
• Raw Material & Manpower Availability
• Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Paper Core sector in India along with its business prospects. Through this report we have identified Paper Core project as a lucrative investment avenue.

Free Instant Online Project Identification & Selection Search Facility

Selection process starts with the generation of a product idea. In order to select the most promising project, the entrepreneur needs to generate a few ideas about the possible projects. Here’s we offer a best and easiest way for every entrepreneur to searching criteria of projects on our website www.entrepreneurindia.co that is “Instant Online Project Identification and Selection”
NPCS Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites.
