

Products From Industrial and Agricultural Waste

*(Silicon, Silver, Rubber Powder, Bricks,
Particle Board, Oxalic Acid, Plastic Granules,
Cotton, Caffine, Cement, etc.)*

Introduction

Processing of useful products from waste is achieved by Integrated Waste Management (IWM) which is the most important approach for the management of wastes. Rather than incurring the costs and risks of managing waste, it has been recognized, it is better to reduce the generation of waste. A waste minimization approach is outlined, in order to save costs and greatly minimize environmental liability.

The major technique for waste management is recycling, though recycling and use reuse are the two major techniques for waste minimization, the options must be carefully evaluated. In the chemical industry, recovery of solvents, metal values, lubricant and oils has proven particularly cost effective in many countries. There are many such products processed from industrial and agricultural waste like silicon from rice husk, caffeine from tea waste.

Here we are going to describe the waste management options and risks of hazardous waste and technologies related to it. Integrated waste management approach is one of the essential components of any successful waste management programme to control hazardous waste. Hazardous waste management is a new concept for most of the Asian countries including India. The utilization of resources and generation of waste is far beyond the limit that the biosphere was made to carry.

This book basically describes about the waste management options and technologies for the treatment and disposal of hazardous waste, economic policies and analysis in effluent treatment and financial constraint, municipal waste water treatment and energy recovery, cogeneration: a technology in waste reduction, utilization of industrial wastes in cement manufacture, quality and stability factors in composting, environmental legislation and enforcement mechanism etc.

We have made a sincere effort to bring out this book which is a key to the goldmine which can be obtained from waste. For the conservation of our environment and sustainable development, we have tried to bring about the solution. This book is a careful attempt in bringing together some selected articles from both entrepreneurs and specialist on all that is possible in the field of waste management.

Table of Contents

1. Waste Management Options and Technologies for the Treatment and Disposal of Hazardous Waste
2. Economic Policies and Analysis in Effluent Treatment and Financial Constraint
3. Municipal Waste Water Treatment and Energy Recovery
4. Cogeneration: A Technology in Waste Reduction
5. Utilisation of industrial wastes in cement manufacture

6. **Quality and Stability Factors in Composting**
7. **Power Generation Based on Distillery Spentwash**
8. **Environmental Legislation and Enforcement Mechanism**
9. **Managing the Environment**
10. **Removal of lead from industrial effluents using coconut shell carbon**
11. **Biological Computer Aided Design of a Waste Water Treatment Plant**

12. Cost-benefit analysis of various treatment options for waste water from starch industry
13. Pollution control strategies in India
14. Wastewater treatment at pulp and paper mills
15. Fumes and Dust Extraction System in Aluminium Industry
16. Making waste work
17. Silicon from Rice Husk

18. Silver Extraction from Waste Hypo Solution X-Ray Film and Cinema Film
19. Rubber Powder from Waste Tyres
20. Bricks from Flyash (Compression Process)
21. Vermiculture
22. Particle Board from Rice Husk
23. Oxalic Acid from Vegetable Waste
24. Plastic Granules from Scraps/Waste
25. Mini Paper Plant from Waste Paper

26. Biocoal Briquettes from Agricultural Cellulosic Waste
27. Cotton from Waste Yarn
28. Caffine from Tea Waste
29. Pectin from Organe/Lime Peels
30. Cement from Rice Husk
31. Acrylic Sheets from Acrylic Scraps
32. Activated Carbon from Saw Dust, Rice Husk and Coconut Shells

33. Leading Environment Consultants In U.S.A

34. Leading Pollution Control Equipment

Manufacturers from United Kingdom

35. International Environmental Organisations

**36. Central and State Pollution Control Boards in
India**

37. Pollution Control Equipment Manufacturers

**38. Powers and Functions of the Pollution Control
Boards**

39. Standards for Cleaner and Greener Environment

NIIR PROJECT CONSULTANCY SERVICES

An ISO 9001:2008 Company

Who are we?

- *One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services*
- *We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients' in India & abroad*

What do we offer?

- *Project Identification*
- *Detailed Project Reports/Pre-feasibility Reports*
- *Business Plan*
- *Industry Trends*
- *Market Research Reports*
- *Technology Books and Directory*
- *Databases on CD-ROM*
- *Laboratory Testing Services*
- *Turnkey Project Consultancy/Solutions*
- *Entrepreneur India (An Industrial Monthly Journal)*

How are we different ?

- *We have two decades long experience in project consultancy and market research field*
- *We empower our customers with the prerequisite know-how to take sound business decisions*
- *We help catalyze business growth by providing distinctive and profound market analysis*
- *We serve a wide array of customers , from individual entrepreneurs to Corporations and Foreign Investors*
