## The Complete Book on Managing Food Processing Industry Waste

<b>Code</b>	NI245
<b>Format</b>	paperback
<b>Indian Price</b>	₹1275
<b>US Price</b>	\$125
<b>Pages</b>	400
<b>ISBN</b>	9788178331454
<b>Publisher</b>	Asia Pacific Business Press Inc.

### Description

Food industry produces large volumes of wastes, both solids and liquid, resulting from the production, preparation and consumption of food. These wastes pose increasing disposal and can pose severe pollution problems and represent a loss of valuable biomass and nutrients. Many standard industrial waste treatment texts sufficiently address a few major technologies for conventional in plant environmental control strategies in the food industry. Environmental legislation has significantly contributed to the introduction of sustainable waste management practices worldwide. Considering the challenges in the area of food industry, efforts are to be made to optimize processing technologies to minimize the amount of waste. Food processing wastes have a potential for conversion into useful products of higher value as by product, or even as raw material for other industries, or for use as food or feed after biological treatment. There are many examples of utilizing waste materials from plant material processed by canneries, there are many other types of waste that can be utilized. In many canneries, the organic from the processing system is combined with the other types of non usable wastes, such as hardware, glass, cans, nails etc. Food industry should also have to concentrate on waste avoidance as well as utilization of process wastes. All the combined efforts of waste minimization during the production process, environmentally friendly preservation of the product, and utilization of by products would substantially reduce the amount of waste, as well as boost the environmental aspect of food processing industry.

This book basically deals with utilization of food industry wastes, ultra filtration in the recovery of food waste, recovery of fruit and vegetable wastes, recovery of protein, the screening of vegetable wastes, fat extraction, treatment of fatty effluents, recovery and utilization of protein, conversion of bone to edible products, utilization of waste in animal feeds, production of earthworm proteins, use of microbiological agents in upgrading waste for

feed and food, underutilized proteins for beverages, coffee and tea wastes, utilization of food waste in pet food industry, etc.

Readers, technical institution, food technologists, technocrats, existing industries and new entrepreneurs will find valuable material in this book. This book gives a complete detail on invaluable waste management concepts, utilization of by-products and the practical methods to implement them. This book deals on the techniques and methods for food processing wastage. Comprehensive in scope, the book provides solutions that are directly applicable to the daily waste management problems specific to the food processing industry.

## **Content**

1. Utilization of Food Industry Wastes
2. Ultrafiltration in the Recovery of Food Waste

3. Recovery of Fruit and Vegetable Wastes
4. Recovery of Protein
5. The Screening of Vegetable Wastes
6. Fat Extraction
7. Treatment of Fatty Effluents
8. Recovery and Utilization of Protein
9. Conversion of Bone to Edible Products
10. Utilization of Waste in Animal Feeds
11. Production of Earthworm Proteins
12. Pectate Gelling Agents in Foods
13. Anaerobic Treatment of Food Processing Wastes and Agricultural Effluents
14. Underutilized Proteins for Beverages
15. Coffee and Tea Wastes
16. Aerobic Process for the Treatment of a Wheat Starch Effluent
17. Texturization of Recovered Proteins
18. By-Products from Malting, Brewing and Distilling
19. Use of Microbiological Agents in Upgrading Waste for Feed and Food
20. The Uses of Enzymes
21. The Treatment of Dairy Wastes
22. Silage Production
23. The Mechanical Recovery of Meat
24. Recovery From Effluents
25. Utilization of Food Waste in Pet-Food industry
26. Canning and Food Processing Wastes as Feedstuffs and Fertilizer

## About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making

business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
