Handbook on Tall Oil Rosin Production, Processing and Utilization

Code	NI247
Format	paperback
Indian Price	₹1575
US Price	\$150
Pages	480
ISBN	9788178331515
Publisher	Asia Pacific Business Press Inc.

Description

Tall oil, a by-product of kraft pulping of pine wood, is formed by acidifying black liquor soap skimmings. It consists of resin acids or rosin, fatty acids, and neutrals. Crude tall oil is an excellent source of rosin and tall oil fatty acid, an industrial-grade oleic and linoleic acid blend. The bulk of the neutrals, largely esters of fatty acids, sterols, resin and wax alcohols, and hydrocarbons, boil at either lower or higher temperatures than the boiling range of the fatty and resin acids.

Tall oil itself has a variety of uses in industry. It is used as a frothing agent in the flotation process for reclaiming low grade copper- lead- and zinc-bearing ores, and as a solvent or wetting agent in a variety of textile and synthetic fibre manufacturing processes. The distilled fatty acids are used in soaps, detergents and disinfectants and as a base for lubricating greases, textile oils, cutting oils and metal polishes. They are also used as drying agents in paint, although synthetic substances are widely used. The fatty acids are unsaturated and on exposure to air undergo autoxidation and polymerization to form resin-like materials which form a tough protective coating. Resin acids are used in rubber polymerization and compounding, as size to impart water resistance to paper, and in adhesives and printing inks. Resin acids are the major component of a substance known as rosin, which is used by musicians to improve the grip of bows used for string instruments.

The book contains production details of different products like recovery of crude tall oil, Composition and properties of crude tall oil, Lab. Scale fractional vacuum distillation, tall oil soap acidulation, purification of sulphate soap, hydrodynamic separation of CTO, dimerization of tall oil fatty acid, black liquor soap recovery methods, tall oil in asphalt products and petroleum uses, tall oil in liquid soaps, tall oil in rubber, paper and printing inks etc. This book is very useful for scientists, scholars, consultants and technical institutions.

Content

1. INTRODUCTION

Introduction to Tall Oil

History of Tall Oil

Production Process for Tall Oil

Recovery of Tall Oil

Composition and Properties of Tall Oil

Crude Tall Oil

Analysis and Testing of Tall Oil Products

Applications of Tall Oil

2. RECOVERY OF TALL OIL

The Chemistry of Tall Oil Fatty and Rosin Acids

Chemical Composition of Tall Oil Fatty Acids

General Reactions of Tall Oil Fatty Acids

Reactions Involving the Carboxyl Group

Chemical Composition of Tall Oil Rosin

Dimer Acids Manufacture and Feedstock

3. COMPOSITION AND PROPERTIES OF CRUDE

TALL OIL

Tall Oil Production and Laboratory Analyses at the Factories

Studies on the Precursors of Indian Tall Oil

Analytical Studies on the Composition of Crude Tall Oil

Experimental

Testing of Tall Oil with Standard Methods

Fractionation of Samples

Crude Tall Oil Recovery from Sulfate Soap

Separation of Free Acids and Neutrals

Preferential Esterification

Saponification

Methylation and Silylation

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
