Handbook on Organic Farming and Processing

Code: NI255	Format: paperback
Indian Price: ₹1275	US Price: \$125
Pages: 400	ISBN: 9788178331546
Publisher: Asia Pacific Business Press Inc.	

Description

India is an agro based country. So organic farming plays an important role in agro field. The popularity of organic farming is gradually increasing and now organic agriculture is practiced in almost all countries of the world, and its share of agricultural land and farms is growing. As the organic food market continues to expand, so do the opportunities for small farmers.

Organic farming has emerged as the only answer to bring sustainability to agriculture and environment.

This handbook is a comprehensive guide to growing, certifying, and marketing organic produce. Organic farming is not only a philosophy, but also a well-researched science that combines soil fertility, plant pathology and other biological and environmental sciences.

The major contents of this book are Sustainable Agriculture, National Programme on organic farming, Integration with organics and biofertilizers, Bulky organic manures and crop residues, Manuring on sight, Manuring potentials, Green Manuring, Production and promotion of organic fertilizers, Vermi composting, Response of crops to organic fertilizers, Phosphate solubilizing, *Bacillus thuringiensis*, Crop residue management, Integrated nutrient management towards sustainable agriculture, Integrated farming system, Mechanism of nitrogen fixation, Economics and marketing of organic farming.

As we have seen, the booming development taking place in organic farming and marketing offers many opportunities. We will be able to go on contributing to the establishment of organic production systems and this could lead to changes in life style and consumption patterns that will reach far beyond food and nutrition.

This book will be very helpful to soil scientists, microbiologists, biologists, students,

new entrepreneurs, fertilizer industries, training centers and to all those interested in efficient use and sustainable farming.

Content

1. SUSTAINABLE AGRICULTURE

Evolution of Sustainable Agriculture
Sustainable Livelihood

2. NATIONAL PROGRAMME ON ORGANIC FARMING

National Programme for Organic Production
Operational Structure of NPOP
Accreditation Agencies
Evaluating Agency
Accredited Inspection and Certification Agencies
Inspectors
Accreditation Regulation 2001
Committee for Accreditation
Application for Accreditation
Updating and Renewal of Accreditation
Power to Issue Guidelines
Logo
Suspension/Termination of Accreditation
Categories for Accreditation
Reciprocity
The National Standards for Organic Products
Guidelines for Organic Production and Processing
Package of Practices

3. INTEGRATION WITH ORGANICS AND BIOFERTILIZERS

Fertilizers
Nutrient Uptake and Removal by Crops
Fertility Status of Soils
Crop Responses to Fertilizer Application
Optimum Application Rates
Integration of Diverse Sources of Plant Nutrients
Some Basic Issues
Farmyard Manure

Green Manures

Rhizobium

Blue Green Algae

Azolla

Conclusions

4. BULKY ORGANIC MANURES AND CROP RESIDUES

Organic Manures and Their Composition

Potential and Available Supplies

Technologies for Quicker and Better Compost Production

Competing Uses of Resources

Fate of Organic Materials in Soil

Effect on Soil Properties

Effect on Crop Yields

Long-term Effects of Organic Manures

Management Aspects

Constraints in Adoption

Future Research Needs

5. MANURING ON SIGHT

In-situ Manuring by Animal

The System

Advantages

Limitations

Verification of Farmers Experiences

Sustainability

Prospects

In-situ Manuring with Plants (Green Manures)

Benefits of Using Green Manures

Enhance Soil Fertility

Supplement for Nutrients

Improved Soil Structure

Prevention of Soil Erosion

Weed Control

Method of Use

Green Manuring in Situ

Green Leaf Manuring

Place in Farming System

Green Manures in Rotation

Green Manures and Undersowing

Long Term Green Manures
Green Manures as Mulch
Green Manures in Agroforestry
Management of Green Manuring
Time of Sowing and Seed Rate
Seed Treatment
Stem Cuttings
Mixed Cropping
Inter Cropping
Border Planting
Phosphorus Response
Digging in Green Manures
The Choice of Green Manure
Other Important Considerations
Achieving Sustainability in the Use of Green Manures
Sustainability
Experiences Worldwide
Conclusions

6. MANURING POTENTIALS

Available Potential of Organic Materials for Ex-Stu Manuring
Organic Resources and Potential
Livestock and Human Wastes
Crop Residues, Tree Wastes and Aquatic Weeds
Urban and Rural Wastes
Agro-Industries Byproducts
Marine Wastes
Agricultural Waste
Crop Residues
Agro-industrial Wastes
Rice Husk
Bagasse
Pressmud
Tea Wastes
Coir Waste
Characteristics of Agricultural Wastes
Nitrogen
Phosphorus
pH
Bio Plant Growth Promoters

Livestock Wastes

Type of Production Unit

Species and Age of Animal

Other Factors

Beef Cattle

Slotted Floors

Dairy Cattle

Utilization of Agricultural Organic Waste

Recycling of Organic Materials for Fertilization

Organic Mulch

Concentrated Organic Manures

Aquatic Weeds

Aquatic Weeds as Source of Energy

Aquatic Weeds as Organic Manures

Oilcakes

How to Use Oilcakes

Cattle, Pig, and Poultry Manures

Poultry

Litter Grown

Cage Grown

Meat-meal

Bloodmeal

Fishmeal

Horn-and-hoofmeal

Collection and Storage of Organic Waste

Economic Value of Organic Waste

Availability of Organic Waste in India

Processing of Agriculture Waste

Conclusion

Economic Considerations

Public Policy

7. GREEN MANURING : NUTRIENT POTENTIALS AND MANAGEMENT

Green Manures

Role of Green Manuring in Cropping Systems

Fate of Green Manures on Application to Soils

Availability of Essential Nutrients

Crop Responses and Residual Effects

Green Manure Management

Residual and Long-term Effects

Economics of Green Manuring

Constraints of Green Manuring

Future Research Needs

Conclusions

8. PRODUCTION, DISTRIBUTION AND PROMOTION OF ORGANIC FERTILIZERS

Definition and Classification

Practical Significance of Biofertilizers

Requirement of Biofertilizers

Production Technology of Biofertilizers

Production of Biofertilizers

Standards and Quality Control

Government Support and Programmes

Constraints

Areas for Future Development

Conclusions

9. VERMI COMPOSTING

Earthworms as Indicators of Soil Fertility

Earthworms and Plant Growth

Interaction of Vermicompost-Earthworm-Mulch-Plantroot (Vemp)

Vermicompost

Recycling of Wastes Through Verm-composting

Minimizing Pollution Hazard

Advantages of Vermi-Compost

Adverse Effects on Crops

Economic Viability

Vermiculture Process

Selection of Suitable Species

Epiges

Endoges

Aneciques

Basic Characteristics of Suitable Species

Fixing Earthworms for Identification

Transport of Fixed Worms to Laboratory

Description of Suitable Species

Family: Lumbricidae

Eisenia foetida (Sav.)

Family: Eudrilidae

Eudrilus eugeniae (Kinb.)
Family: Megascolecidae
Lampito mauritii (Kinb.)
Metaphire anomala Mich. (= Pheretima anomala)
Metaphire posthuma (= Pheretima posthuma)
Perionyx excavatus E. Perr.
Perionyx Sansbaricus Michaelson
Maintenance of Base Culture
Vermicomposting Materials
Animal Dung
Agricultural Waste
Forestry Wastes
City Leaf Litter
Waste Paper and Cotton Cloth etc.
City Refuge
Biogas Slurry
Industrial Wastes
Preliminary Treatment of Composting Material
Pre-Treatment of Leaf Litter and Agricultural Waste
Small Scale or Indoor Vermicomposting
Large Scale or Outdoor Vermicomposting
Requirements for Vermicomposting
Container
Bedding Material
Moisture Content
Temperature
Initiation of Vermiculture in India

10. RESPONSE OF CROPS TO ORGANIC FERTILIZERS IN SALT AFFECTED SOILS

Response of Crops in Salt-Affected Soils of Punjab and Haryana

11. PHOSPHATE SOLUBILIZING SOIL ACTINOMYCETES AS BIOFERTILIZERS

Material and Methods

Results and Discussion

Summary

12. VERMICOMPOSTING OF KITCHEN WASTE

Material and Methods

Results and Discussion

Conclusion

13. BACILLUS THURINGIENSIS : AN EFFECTIVE BIOINSECTICIDE

Criteria for Microbial Insecticide

Material and Methods

Results

Discussion

Summary

14. COMPOSTING OF AGRICULTURAL AND INDUSTRIAL WASTES

Definition

Principles of Composting

Agricultural Wastes

Methods for Composting of Agricultural Wastes

Indore Method

Activated Compost

Banglore Method

NADEP Compost

Coimbatore Method

Synthetic Compost

Windrow Composting (Leaf Compost)

Accelerated Composting and Enrichment

Vermi-composting

Animal Waste Composting

Oil Palm Waste Composting

Phospho-Compost

Reinforced Compost from Sugarcane Trash and Pressmud

Enriched FYM (EFYM)

Weed Composting

Composting of Parthenium

Hints for Composting Agricultural Wastes

Industrial Wastes

Composting of Coir Pith

Composting of Pressmud

Using Distillery Effluent

Using Microbial Inoculum

Using Pressmud and Distillery Effluent

Conclusion

Future Needs

15. CROP RESIDUE MANAGEMENT

Residue Management

Crop Residue Potential

Crop Residue Components

Crop Residue Uses

Effect on Soil Management

Residues with Fertilizer

Effect of Residues on N Fertilization

Future Research Needs

16. INTEGRATED NUTRIENT MANAGEMENT TOWARDS SUSTAINABLE AGRICULTURE

Need for INM

Concepts and Approaches

Components of Integrated Nutrient Management Strategies

Reduction of Losses from Applied Inorganic Fertilizers

Application to synchronize with the demands of Crops

Timing, Placement and Choice of Fertilizers

Controlled Release of Nutrients

Crop Choice

Retention of Native Soil Nutrients

Alternate or Supplementary Sources of Nutrients

Biofertilizers in INM

Blue Green Algae

Azolla

Azospirillum spp. (A. Lipoferum and A. brasiliense)

Rhizobium

Phospobacteria

VAM

Organic Manures

Municipal and Sewage Wastes

Composting of Organic Wastes

Crop Residue Management

Green Manuring

Non-conventional Green Manures

Oil Cakes

Legumes in INM

Legumes Grown in System

Legumes as Intercrops

INM Cropping System

Rice-based Cropping System

Cotton-based Cropping System
Wheat-based Cropping Systems
Sugarcane-based Cropping System
INM and Long Term Studies
Future Strategies

17. MECHANISM OF NITROGEN FIXATION

18. INTEGRATED FARMING SYSTEM

Definitions
Advantages of IFS
1. Productivity
2. Profitability
3. Potentiality/Sustainability
4. Balanced Food
5. Environmental Safety
6. Recycling
7. Income Round the Year
8. Adoption of New Technology
9. Saving Energy
10. Meeting Fodder Crisis
11. Solving Fuel and Timber Crisis
12. Employment Generation
13. Agro-industries
14. Increasing Input Efficiency
15. Increasing the Standard of Living of the Farmer
Integration of Subsystem in Farming System
Aquaculture

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
