The Complete Book on Ferroalloys (Ferro Manganese, Ferro Molybdenum, Ferro Niobium, Ferro Boron, Ferro Titanium, Ferro Tungsten, Ferro Silicon, Ferro Nickel, Ferro Chrome)

Code: NI258	Format: paperback
Indian Price: ₹2775	US Price: \$250
Pages: 480	ISBN: 9789381039298
Publisher: NIIR PROJECT CONSULTANCY SERVICES	

Description

The Complete Book on Ferroalloys

(Ferro Manganese, Ferro Molybdenum, Ferro Niobium, Ferro Boron, Ferro Titanium, Ferro Tungsten, Ferro Silicon, Ferro Nickel, Ferro Chrome)

An alloy is a mixture or solid solution composed of metals. Similarly, Ferroalloys are the mixture of Iron with high proportion of other elements like manganese, aluminium or silicon. Alloying improves the physical properties like density, reactivity, Young's modulus, electrical and thermal conductivity etc. Ferroalloys thus show different properties as mixture of different metals in different proportion exhibit a wide range of properties. Also, Alloying is done to alter the mechanical properties of the base metal, to induce hardness, toughness, ductility etc.

The main demand of ferroalloys, nowadays is continuously increasing as the major use of such products are in the field of civil construction; decorative items; automobile; steel industry; electronic appliances. The book provides a wide idea to readers about the usage of appropriate raw material and the treatment involved in the processing of raw material to final produce, safety, uses and properties of raw material involved in the processes.

This book concisely presents the core principles and varied details involved in processing of ferroalloys. The work includes detailed coverage of the major products like ferroaluminium, ferrosilicon, ferronickel, ferromolybdenum, ferrotungsten, ferrovanadium, ferromanganese and lesser known minor ferroalloys.

Progress in thermodynamics and physico-chemical factors in ferroalloy production has developed rapidly during the past twenty-five years or so. The book presents the principles and current knowledge of processes in the production of various ferroalloys. The production of a particular ferroalloy involves a number of processes to be followed in order to give the alloy desired physical and mechanical properties. The slight difference in the temperature or heating or composition can lead to entirely different alloy with different properties. This book is not only confined to the different processes followed in the production of ferroalloys but also describes the processes used and other information related to product, which are necessary for the manufacturer's knowledge. Also, the book gives the reader appropriate knowledge regarding the selection the best of available raw materials.

Content

1. INTRODUCTION

Theory

Terminology

Interstitial Alloy

Classification of Alloys

2. FERROALLOYS

Ferroalloys

Ferro Aluminium

Ferro Boron

Ferro Chromium

Ferro Manganese

Ferro Molybdenum/Molybdic Oxide

Ferro Molybdenum

Molybdic Oxide

Ferro Niobium

Ferro Phosphorus

Ferro Selenium

Ferro Silicon

Ferro Silico Manganese

Ferro Silicon Magnesium

Ferro Silicon Zirconium

Ferrous Sulphide

Ferro Titanium

Ferro Vanadium

Calcium Silicon Manganese

Calcium Silicon

Ferro Tungsten

Iron

3. PRODUCTION OF FERROALLOYS

Primary Processes

Secondary Processes

Applied Processes and Techniques

Ferro-chrome

Raw Materials

Pre-treatment Techniques

Production of Ferro-chrome and Silico-chromium

High-carbon Ferro-chrome

4. PRODUCTION OF FERRO MANGANESE

Raw Materials

Pre-treatment Techniques

Production of Ferro-manganese and Silico-manganese

High-carbon Ferro-manganese

Medium-carbon Ferro-manganese

Low-carbon Ferro-manganese

Silico-manganese

Types of Ferromanganese

Production of Ferromanganese

Production of High Carbon Ferromanganese

Blast Furnace Production

Electric Furnace Production

High Manganese Slag Practice

Discard Slag Practice

Production of Medium-Carbon Ferromanganese

Silicothermic Production of Medium-Carbon Ferro-manganese

Production of Medium-Carbon Ferromanganese by Oxygen Refining of High-Carbon Ferromanganese

Production of Low-Carbon Ferromanganese

Thermodynamics of Reduction of Manganese Oxides

High Carbon Ferromanganese Slags

Refining of Ferro Manganese

Introduction

The Sintering Pilot Facility

Preparation of the Sinter Mix

Sintering

Characterization

Performances

Eramet Research Mn Alloys Smelting Pilots

Background

Pilot Campaign Approach

Transfer of the Pilot Results to the Plants

The New Pyrometallurgy Piloting Facility

Constraints and Stakes for the New Facility

Definition of the Power Supply Characteristics

Design of the New Power Supply

Design of the Furnace

Furnace Diameter

Furnace Height

Side Wall Furnace Lining

Hearth Lining and Bottom Electrode

5. PRODUCTION OF FERRO MOLYBDENUM

Production of Ferro-molybdenum

Raw Materials

Carbo-thermic Production of Ferro-molybdenum

Metallo-thermic Production of Ferro-molybdenum

6. PRODUCTION OF FERRO NIOBIUM

Introduction

Basic Technology of FeNb Manufacturing

The Evolution of Ferro-niobium Manufacturing

Recent Developments in Ferro-niobium Manufacturing

Pyrometallurgical Refining of Concentrate

Sintering

Electric Arc Furnace Smelting

Ferro-Niobium Production

Crushirm and Packaging

Future Developments in Ferro-niobium Manufacturing

7. PRODUCTION OF FERRO BORON

Ferro-niobium

Production of Ferroalloys from Secondary Raw Material

Raw Material and Raw Material Preparation

8. PRODUCTION OF FERRO TITANIUM

Transferred-arc Plasma Furnaces

The Reduction of TiO_2

Enthalpy Considerations

Constitution of the Charge

Choice of Raw Material

Reasons for the Choice of a d.c. Transferred-arc Plasma Furnace

Small-scale Batch Tests in a 50 kVA Water-cooled Furnace

Equipment and Procedures

Objectives of the Experimental Work

Interpretation of Results of the Small-scale Tests

Large-scale Continuous Tests

Further Experimental Work

Melting Point of the Alloy

The Addition of Iron to the Charge

Further Furnace Modifications

Small-scale Sealed Furnace

9. PRODUCTION OF FERRO TUNGSTEN

Production of Ferro-tungsten and Tungsten Melting Base

Tungsten Melting Base (TMB)

Ferro-titanium

10. PRODUCTION PROCESS OF FERRO SILICON

Raw Materials

Production of Ferro-silicon, Silicon Metal and Silico-calcium

Ferro-manganese and Manganese Alloys

Refining of Ferro-silicon

Introduction

Processes for the Refining of Ferro-silicon

Solid/Liquid Oxide Method

Oxidising Treatment with Gaseous Oxygen/Enriched Air

Refining with Chlorine Gas

Purification by Carbon Dioxide Injection Method

Typical Results from Studies on the Refining of Ferrosilicon Carried Out at NML

The Chlorine Donor Method

The Carbon Dioxide Injection Method

The Oxygen Injection Method

Conclusions

Ferro Silicon Operation at IMFA—A Critical Analysis

Introduction

Quality Norms of Raw Materials at IMFA

Quality Deviations Experienced By IMFA

Ferro Silicon Process Description

Formation of Slags in Ferro Silicon

Types of Slag

Characteristics of Different Kinds of Slags

Incompletely converted charge (Slagging)
SiC with Si at the Bottom
Crusts of Sintered Charge Materials in the Upper Parts of the Furnace
Description of the Furnace
Operating conditions of the Furnace
Problems in the Furnace
Observations on the Deteriorating Conditions
Introduction of Lime Stone in the Burden
Variation in the Slag Properties
Operating Data
Improvements in the Furnace Performance
Comparison of Output Alloy Analysis
Detrimental Effects of CaO in the Burden Charge
Overcoming the Problem of Alloy Disintegration
Remarks and Conclusion
Controlled solidification of Ferrosilicon
Introduction
Experimental Work
Equipment
Casting
Investigation
Results and Discussion
Primary Silicon Grains
Eutectic
Distribution of Aluminium and Calcium
Cracking
Porosity
Conclusions

11. PRODUCTION OF FERRO NICKEL

Raw Materials
Production of Ferro-Nickel from Primary Raw Material
Production of Ferro-Nickel from Secondary Raw Material
“Ferronickel Ladle Furnace Refining Process”
Introduction
Process Description
Equipment
Process Theory
Oxidation
Desulfurization
Development

Oxidation
Desulfurization
Observation
Conclusions
Design of a Modern Large Capacity FeNi Smelting Plant
History, Applications and Trends
Experiences in FeNi-Smelters and Rectangular Furnaces
General Trends in the FeNi-production; Industry Demand
Design Principles of Large Scale FeNi-smelters

Submerged Arc Furnace (SAF)
Principle of Submerged Arc Furnaces
Design Principle of a Large-Scale Rectangular FeNi-smelter
Process and Furnace Dimensioning
3-D Fluid Dynamic Codelling
Control and Operation
Furnace Integrity and Cooling
Further Application of Side Wall Copper Cooling for Rectangular Furnace
Additional Technological Highlights
SMS DEMAG Tapping Machines
Off-gas System
Plant Start Up
Refining of FeNi
Conclusions and Outlook
12. PRODUCTION PROCESS OF FERRO CHROME
Medium-Carbon Ferro-Chrome
Low-Carbon Ferro-Chrome
Silico-Chromium
Ferro-Silicon and Silicon Alloys
Various Techniques to Produce Low Carbon Ferrochrome
Introduction
Problems of Carbon
Decarburization
Decarburization Techniques
Conventional Techniques
Refining of Ferrochrome by Chromium Ore
Refining of Ferrochrome by Blowing Oxygen
Refining of Ferrochrome with the Presence of Silica
Silicothermic Process for the Production of Low Carbon Ferrochrome
Production of Carbon Free Ferrochrome by Aluminothermic Method

Non Conventional Techniques

Decarburization of Solid Ferrochrome

Decarburization using Oxidizing Gas Mixture

Production of Low Carbon Ferrochrome from Chromite Ore

Khalafala's Method

Other Methods

Conclusion

Modern Practices of Post Taphole Operation in Ferro Chrome Production and its

Advantages

Introduction

Mechanized Flow Sheet for Handling High Carbon Ferro Chrome Metal 62000 T/Y and

Corresponding Slag

Post Taphole Concept

Taphole Installation

Granulation Process

Recovery of Entrapped Metal from the Slag

13. PRODUCTION OF FERROALLOY FROM

SECONDARY RAW MATERIALS

Raw Material and Raw Material Preparation

Preprocessing

Mixing and Drying (Plasma Dust Process only)

Submerged arc Furnace Process

Plasmadust Process

14. PRODUCTION TECHNIQUES OF

FERROALLOYS

General

Process Description

Submerged Electric Arc Process

Exothermic (Metallothermic) Process

Electrolytic Processes
Emissions and Controls
Aluminothermic Reduction of Oxides with Liquid Start
Description
Innovative Aspect and Main Advantages
Areas of Application
Atomisation of Ferroalloys
The Atomisation Process
Why Atomise (or Granulate)?
To Produce a Saleable, Dust-free Brittle Product
To Produce a Small-sized Ductile Product
To Produce a Reactive Intermediate Product
To Produce a “Rapidly Solidified” Product
To Produce Special Powder Products
Atomisation Processes
Water Atomisation
Gas/Air Atomisation
Centrifugal Atomisation
Atomised Products and Their Markets
Ferrosilicon 15% Dense Medium
Ferrosilicon 45% for the Welding Industry
Ferromanganese for the Welding Industry
Injectables
Higher Melting Alloys
Silicon
Process Selection
The Improvements to Copper Casting Machine for Ferroalloys
Brief Description of Casting Machine
Artificial Vision System
Monitoring of Main Parameters of the Casting
New Improvements of the Casting Machine
Advantages of the Casting Machine
From the Metal Quality Point of View
From the Economical Point of View
Application of Fluid Bed in Ferroalloy Industry
Introduction
Particle Characterization and Flow Regimes
Fluidized Beds in the Ferroalloy Industry
Ferrochromium Production
Ferronickel Production

Ferromanganese Production

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies,

Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
