The Complete Book on Jute & Coir Products (with Cultivation & Processing) 2nd Revised Edition

Code	NI287
Format	paperback
Indian Price	₹1575
US Price	\$150
Pages	464
ISBN	9788194737988
Publisher	NIIR PROJECT CONSULTANCY SERVICES

Description

Jute is a natural fiber popularly known as the golden fiber. It has gained its name as olden fibre due to its shiny brown colour. The fibre is affordable to all the consumers and is completely biodegradable. It is one of the cheapest and the strongest of all natural fibers and considered as fiber of the future. Jute is second only to cotton in world's production of textile fibers. Jute fibers are composed primarily of the plant materials cellulose and lignin. Jute is the name of the plant or fiber used to make burlap, hessian or gunny cloth.

Coir is a versatile natural fibre extracted from mesocarp tissue, or husk of the coconut fruit. Generally fibre is of golden color when cleaned after removing from coconut husk; and hence the name " The Golden Fibre".

Both coir and jute are natural fibers and come from sustainable products. Coir comes from the husks of coconuts that were typically discarded. It is harvested by hand and soaked in water to soften the fibers, which are then woven together. Jute fiber comes from the stem of the jute plant and is the second most important vegetable fiber, after cotton, when it comes to production and use.

Global jute market on the basis of type, covering jute sack bags and jute shopping bags. Currently, jute sack bags dominate the market, accounting for the majority of the sales volume. Growing environmental awareness among the masses has also created an inclination toward natural and biodegradable products, like jute bags, over plastic bags. This, along with many government initiatives, is bolstering the jute industry. For instance, the Government of India has mandated the packaging of food grain and sugar in jute bags. Some of the key players operative in the market include Aarbur, Ashoka Exports, Hitaishi-KK, Howrah Mills Co. Ltd., Shree Jee International India Ltd. and Gloster Limited.

The growing demand for eco-friendly products in the market is where coir should fast step in. It is a lightweight, soilless growing medium made from the fibers which completely renewable and considered an excellent choice for environmental sustainability. The efforts support the market expansion for coir and the Asia Pacific hopes to further increase production by streamlining the fiber collection process to meet demand.

The Major contents of the Book are BIS Specifications, Jute: an eco-friendly opportunity for a sustainable Future, Green Marketing Of Jute and Jute Products, The Jute And Jute Textiles Industry, Jute Cultivation, Potentiality of coir for salient application, Coconut

Cultivation, Scheme for the Development of Coir Production Line, Step-by Step approach to start a Coir Industry, Coir Geotextiles, Eco-friendly and natural image of coir, Jute Yarn, Sutli & Hessian Cloth, Jute Twine (Jute Rope), Gunny Bags, Jute Garments, Jute Shopping Bags, Gunny Bags (Jute Bags) Manufacturing, Handmade Paper from Jute, Environment Pollution and Effluent Treatment of Jute, Coir Fibre, Coir Pith, Biomass Charcoal Briquetting from Jute and Coir Waste, Rubberized Coir Mattresses, Coir Pith for Absorption and Recovery of Oil from Contaminated Sites, Application of Coir in Agricultural Textiles, Manufacture of Coir Corrugated Roofing Sheet, Coir Machinery Manufacturers, Plant Layout & Process Flow Sheet and Machinery, Equipment and Product Photograph.

A total guide to manufacturing and entrepreneurial success in one of today's Jute & Coir Products industry. This book is one-stop guide to one of the fastest growing sectors of the Jute & Coir Products industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of Jute & Coir Products. It serves up a feast of how-to information, from concept to purchasing equipment.

Content

CONTENTS

1. INTRODUCTION

Jute

Classification of Jute Products

1. Conventional Products
2. Speciality Products
3. Non-Traditional Products
4. Diversified Products Scheme for Modernization of Organised Jute Mills

1. Training of Workers & Supervisors
2. Machinery Development
3. Productivity Improvement & TQM Facilitation
4. Acquisition of Machinery and Plant

(Subsidy Component) Coir

- A. Modernisation of Production Processes
- B. Development of Machinery and Equipments
- C. Product Development and Diversification
- D. Development of Environment Friendly Technologies

2. BIS SPECIFICATIONS

Jute

Coir

3. JUTE: AN ECO-FRIENDLY OPPORTUNITY FOR A SUSTAINABLE FUTURE

Long-term Strategy

4. GREEN MARKETING OF JUTE AND JUTE PRODUCTS

Green Products

Jute – A Green Product

Jute Production in India

Objective

Research Methodology

Nature of Data

Source of Data

Sampling Technique

Analysis and Findings

Manufacturing of Jute & Co-Operative

Jute Mill

Jute Products Produced Co-Operative Jute

Jute Market Development and Promotion

Challenges of Jute Marketing

Scheme for Promotion of Jute

Diversification

1. Design & Development of Jute

Diversified Products

2. Scheme for helping NGOs and Women

Self-Help-Groups (WSHGs)

3. Scheme for Promotion of Jute

Diversification

4. Scheme for Commercialization of

Technology

5. Scheme for Setting up of Jute Parks for
the Diversified Sector

5. THE JUTE AND JUTE TEXTILES INDUSTRY

Development and Regulatory Organizations in Jute Sector

(a) Organizations under Ministry of Textiles

Jute Manufactures Development Council (JMDC)

(b) Other Organizations supported by Ministry of Textiles in Jute Sector

International Jute Study Group (IJSJG) Incentives to Jute Sector

- (a) Extension of Duty Entitlement Pass Book (DEPB) Benefits to Jute Products
- (b) Technology Up gradation Fund Scheme (TUFS)
- (c) Jute Technology Mission Objectives of JTM are
- (d) Non Plan Schemes of JMDC

6. JUTE CULTIVATION

Raw Jute Scenario

Botanical Description of Jute

Jute Growing Zones

Manures and Fertilizer Application

Varieties

Seed Rate and Sowing

Weed Management

Top Dressing of Fertilizer

Water Management

Harvest

Yield

Sowing Process of Jute

Harvesting Process of Jute Retting Practices

- a. Retting Practices in India and Bangladesh
- b. Retting Practices in China
- c. Double Immersion/Single-Wash-Retting in China
- d. Retting Practices in Indonesia
- e. Retting Practices in Nepal
- f. Retting Practices in Thailand

Extraction Practices

Single Stem Stripping

Stripping and Washing or Wash-Jerk-Method

Indian Jute Industry at a Glance

Major Producers of Jute

Jute and Mesta in the National Economy

From Jute to Diversified Products

7. POTENTIALITY OF COIR FOR SALIENT APPLICATION

Introduction

Raw Material Availability & Traditional Application

Swot Analysis of Coir Products

Value Addition Present Status Through
Collaborative Project Amongst IICT & CCRI
Value Addition Prospects
Scope of the Study
Potentials of Coir as Technical Textile
Fiber
Introduction
Coir as Technical Textile
Use of Coir as Agrotech
Use of Coir as Buildtech
Use of Coir as Clothtech
Use of Coir as Geotech
Use of Coir as Hometech
Use of Coir as Indutech
Use of Coir as Meditech
Use of Coir as Mobiltech
Use of Coir as Oekotech (Ecotech)

8. COCONUT CULTIVATION

Origin
Climate and Soil
Varieties of Coconut
Tall Varieties
Dwarf Varieties - Suitable for Tender
Coconut
Hybrid Varieties
Planting Material
Site Selection
Time of Planting
Spacing and Systems of Planting
Planting

9. SCHEME FOR THE DEVELOPMENT OF COIR PRODUCTION LINE

Coir Udyami Yojana
Scheme for the Development of Production
Infrastructure Under Coir Vikas Yojana
Skill Up gradation & Mahila Coir Yojana
Under Coir Vikas Yojana

10. STEP-BY STEP APPROACH TO START A COIR INDUSTRY

1. Identifying the Opportunity
 2. Making a Product Choice
 3. Process Selection
- Machinery and Equipment
4. Arranging Finance
 5. Filing of Udyog Aadhaar Registration
 6. Construction of Building
 7. Getting the Utility Connections
 8. Getting 3M's Right
- Men
Machinery
Materials

11. COIR GEOTEXTILES

- Coir Geotextiles for Strengthening Soft Soil
Subgrade
Application of Geotextile Separation
Filtration
Reinforcement
Use of Coirgeotextiles in Unpaved Roads
Subgrade Separation and Stabilization
Typical Solutions
Geotextile Benefits
Base Reinforcement
Coir as a Suitable Geotextile Material for
Roads
Reinforcement
As Filter/Drainage Layer
Strength of Subgrade
Field Installation of Geotextile
Long Term Performance of Coir Geotextile
Methodology
Visual Evaluation
Coir Geotextile for Erosion Control
Universal Soil Loss Equation
Coir Geotextiles
Fuzzy Logic Results
Selection of Coir Geotextile
Coir Fibre and Its Application as Erosion

Control Mats

Mechanism of Erosion Control

Coir Geotextile for Construction of Roads
in Rural Areas

Benefits

The Coir Geotextiles - Natural Solution to
Natures Problem

Historic, Economic and Political
Background

Coir Geo Textiles for Environmental
Application

Types of Coir Bhoovastra

1. Open Weave Coir Bhoovastra
2. Geo Rolls and Vegetation Fascines
3. Non-woven Felts

Coir Needled Felt

4. Cocologs
5. Coir Fiber Beds (Cocobeds)
6. Coir Loop Fabric
7. Coir Cell Geo Textiles

Application of Coir Geo Textiles

a) For Soil Erosion Control

Site Preparation

Fixation

Laying

Vegetation & Seeding

Monitoring

b) Sub-base layer in Village/Rural Roads/

Reinforcement of Paved Roads

c) Application in the Waste Dumping Yards
of Mines

Coir Pith Based Cyanobacterial

Biofertilizers

Cyanobacteria

Coir Pith Degradation

Cyanopith and Cyanospray

Treatment of Textile Effluent

Treatment of Tannery Effluent

Field Trials

Benefits of Coir Pith for Cyanopith and
Cyanospray

As Production
As Biofertilizers
Organic Farming with Self-Aerated Large-Scale Composted Coir Pith
Market of Organically Grown Food
Sustainability Factors of Organic Farming
Coir Pith
Coir Pith Composting Methods
New Method for Coir Pith Composting
Overall Biochemical Reaction of Composting and Rate of Product Formation
Composted Coir Pith Use for Organic Farming
Potential of Bio Composting of Coir Pith
Structure of Coir Pith
Materials and Methods
Culture Inoculum
Coir Pith and Biological Supplements
a. Azolla
Culture Conditions
Diversified Uses of Coir Pith and Coir Pith
Organic Manure (C-POM)
(a) Growing Media
(b) As Amendment
(c) As a Substitute to Peat Moss
(d) As an Organic Fertilizer
(e) As a Base for Home/Vertical/Roof Garden
(f) As a Base for the Preparation of Cocolawn
Binderless Coir Wood

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
