Modern Technology of Paints, Varnishes & Lacquers (3rd edition)

Code	NI345
Format	paperback
Indian Price	₹2200
US Price	$200
Pages	616
ISBN	978-81-957447-2-5

Publisher	Asia Pacific Business Press Inc.

Description

(Solvents, Plasticizers, Distempers, Whitewash, Putties & Emulsion, Lacquers, Primers, Powder Coatings, Pigments, Alkyd Resin, Solvent-type Resins, Hydrocarbon Thinners, Epoxy Resins with Formulations, Machinery Equipment Details and Factory Layout)

Paints, varnishes, and lacquers are chemicals or substances that you can use to change the color, texture or shine of a surface. These materials can be applied to a wide range of surfaces, including those made of metal, wood, paper, and plastic. They can be used to paint canvas works of art, to coat beautiful things with a layer of protection, or for practical uses like polishing furniture. The most popular kind of paints are oil-based paints, which are created using pigments that, when dried, leave an oily layer on the surface. Due to their lower levels of toxicity as compared to paintings made with an oil base, acrylics have grown in popularity in recent years.

Paints, varnishes, and lacquers are essential supplies for any job involving home décor. Numerous colours are available for these products to match any style. Additionally, you can choose the finish that best meets your needs because they come in a variety of finishes. These products come in a variety that makes it simple to obtain just what you need without having to purchase numerous different things. These paints, varnishes, and lacquers are not only long-lasting but also simple to use thanks to current technology.

The size of the global market for paints, varnishes, and lacquers is anticipated to increase at a CAGR of 7.8%. The demand is on the rise, and technological developments in the paint business are the main drivers of this expansion. Global population growth is also driving up demand for residential and commercial real estate, which will drive up demand for paints, varnishes, and lacquers globally. This sector's growth can be attributed to a variety of factors. More paints, varnishes, and lacquers will be required when there is a rise in the demand for new housing due to population growth. As homeowners attempt to make their homes appear newer with fresh coats of paint, industry analysts predict that sales will increase even further. In order to meet the expectations of the market, manufacturers must also adapt. While they look for new markets to supply, they have been investing in machinery and extending their manufacturing lines. In fact, it's one of the fastest-growing manufacturing industries. This industry not only has a high growth rate but also offers

tremendous opportunities for entrepreneurs to enter this booming business. Modern paint, varnish, and lacquer technologies have made it simpler for people to design unique paint jobs for use on furniture. Due to the low entrance requirements, this industry benefits entrepreneurs, to launch your business.

The Major Contents of the books are Solvents, Plasticizers, Distempers, Whitewash, Putties & Emulsion, Lacquers, Primers, Powder Coatings, Pigments, Alkyd Resin, Solvent-type Resins, Hydrocarbon Thinners, Epoxy Resins with Formulations, Factory Layout, and Photographs of Machinery with Supplier Contact Information.

A comprehensive reference to manufacturing and entrepreneurship in the Paints, Varnishes & Lacquers products business. This book is a one-stop shop for everything you need to know about the Paints, Varnishes & Lacquers products manufacturing industry, which is ripe with potential for manufacturers, merchants, and entrepreneurs. This is the only comprehensive guide to commercial Paints, Varnishes & Lacquers products manufacture. It provides a feast of how-to knowledge, from concept through equipment purchase.

Content

1. Introduction 1.1 Components 1.1.1 Vehicle 1.1.2 Binder or Film Former 1.1.3 Diluent or Solvent or Thinner 1.2 Pigment, Dye and Filler 1.3 Additives 1.4 Color Changing 1.5 Art 1.6 Application 1.7 Product Variants 1.8 Finish Types 1.9 Failure 1.9.1 Dilution 1.9.2 Contamination 1.9.3 Peeling/Blistering 1.9.4 Chalking 1.9.5 Cracking 1.9.6 Erosion 1.10 Types of Paint 1.10.1 Oil Paint 1.10.2 Emulsion Paint 1.10.3 Enamel Paint 1.10.4 Bituminous Paint 1.10.5 Aluminium Paint 1.10.6 Anti-Corrosive Paint 1.10.7 Synthetic Rubber Paint 1.10.8 Cement Paint 1.10.9 Speciality Home Paints: Lasts Long, Protects Longer 1.11 Properties 1.11.1 Wear Ability 1.11.2 Covering Ability 1.11.3 Ease of Cleaning 1.11.4 Environmentally Friendly 1.11.5 Aesthetic 1.11.6 Practical and Cost Effective 1.12 Paint Compositions and Their Functions in Paints 1.12.1 Pigments 1.13 Prime Pigments 1.13.1 Extender Pigments 1.14 Inorganic Pigments in Pictures 1.15 Organic Pigments in Pictures 1.15.1 Binders 1.15.2 Linseed Oil 1.16 Tips & Techniques 1.16.1 Safflower Oil 1.16.2 Acrylic Resin Dispersion 1.16.3 Gum Arabic 1.16.4 Kaolin 1.16.5 Waxes 1.16.6 Dextrin 1.16.7 Schellac 1.16.8 Alkyd Resin 1.16.9 Alkyd Polymers (Resins) 1.16.10 Epoxy Polymers (Resins) 1.16.11 Liquid Metal Paint 1.17 Types of Liquid Metal Paint 1.17.1 Liquid Epoxy Coating 1.17.2 Polyurethane Coating 1.17.3 Polyaspartic Coating 1.18 Common Uses of Liquid Metal Paint 1.19 Additives 1.19.1. About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
