## Petroleum & Petroleum Products Technology Handbook (Thermal Cracking of Pure Saturated Hydrocarbons, Petroleum Asphalts, Refinery Products, Blending and Compounding, Oil Refining and Residual Fuel Oils)

<b>Code</b>	NI528
<b>Format</b>	paperback
<b>Indian Price</b>	₹1875
<b>US Price</b>	\$150
<b>Pages</b>	440
<b>ISBN</b>	9788193733912

## Description

Petroleum asphalt is a sticky, black and highly viscous liquid or semi-solid that is present in most petroleum crude oils and in some natural deposits. Petroleum crude oil is a complex mixture of a great many different hydrocarbons. Refined petroleum products are derived from crude oils through processes such as catalytic cracking and fractional distillation. Refining is a necessary step before oil can be burned as fuel or used to create end products.

Residual fuel oil is a complex mixture of hydrocarbons prepared by blending a residuum component with a flux stock which is a distillate component diluent, to give the desired viscosity of the fuel oil produced. Petroleum refining is the process of separating the many compounds present in crude petroleum. An Oil refinery or petroleum refinery is an industrial process plant where crude oil is processed and refined into more useful products

The global Petroleum Asphalt market is valued at USD 48.8 Billion in 2017 and is expected to reach USD 77.67 Billion by the end of 2024, growing at a Growth Rate of 6.87% between 2017 and 2024. The global bunker fuel market was valued at \$137,215.5 million in 2017 and is expected to reach \$273,050.4 million by 2025, registering a CAGR of 9.4% from 2018 to 2025.

Some of the fundamentals of the book are composition of radiation effects on lubricants, thermal cracking of pure saturated hydrocarbons, petroleum asphalts, refinery products, refinery feedstocks, blending and compounding, oil refining, residual fuel oils, distillate heating oils, formulations of petroleum, photographs of machinery with suppliers contact details.

A total guide to manufacturing and entrepreneurial success in one of today's most lucrative petroleum industry. This book is one-stop guide to one of the fastest growing sectors of the petroleum industry, where opportunities abound for manufacturers, retailers, and entrepreneurs. This is the only complete handbook on the commercial production of petroleum products. It serves up a feast of how-to information, from concept to purchasing equipment.

## Content

### 1. RADIATION EFFECTS ON LUBRICANTS

Introduction

Interaction of Radiation with Organic Matter

General Physical Effects of Radiolysis

Base Oils  
The Radiation Environment  
Hydrocarbons (Petroleum Oils)  
Alkylaromatics  
Ethers  
Esters  
Silicones  
Halogenated Compounds  
Additives  
Radiation Damage Inhibitors  
Antioxidants  
Viscosity Index Improvers  
Antiwear Additives  
Extreme Pressure (EP) Agents  
Foam Inhibitors  
Rust Inhibitors  
Environmental Factors  
Effects of Radiation Type and Intensity  
Role of Temperature  
Influence of Oxygen  
Oil Lubricants  
General: Commercial formulations  
Based on Alkylaromatic Fluids  
Fluids Based on Poly (phenyl ethers)  
Steam Turbine Oils  
Aircraft Turbine Oils  
Hydraulic Fluids  
Lubricating Greases  
Gelling Agents

## CONTENTS

Base Oils  
Commercial Greases  
Greases of Enhanced Radiation Resistance  
Dynamic Tests  
Principles

## 2. THERMAL CRACKING OF PURE SATURATED HYDROCARBONS 65-102

Introduction  
Experimental Methods  
Batch Reactors

Flow Reactors  
Residence Time  
Volume Change on Reaction  
Kinetics of the Cracking Process  
Rates of Decomposition  
Straight Chain Paraffins  
Correlation of the Rate Constants for n-Paraffins  
Effect of Branching on the Rate of Decomposition  
Effect of Pressure on the Decomposition of Paraffinic Hydrocarbons  
Rates of Decomposition-Saturated Cyclic Hydrocarbons  
Estimation of Rate Constant of Decomposition  
APPENDIX  
Calculation of Product Distribution from Paraffin Cracking by the Rice-Kossiakoff Method.

### 3. PETROLEUM ASPHALTS

Chemical and Physical Composition  
Possible Structures of the Nuclei in Resins and Asphaltenes  
Manufacture of Asphalt from Petroleum  
uses of Asphalts

### 4. REFINERY PRODUCTS

Low-boiling Products  
Gasoline  
Gasoline Specifications  
Distillate Fuels  
Jet and Turbine Fuels  
Automotive Diesel Fuels  
Railroad Diesel Fuels  
Heating Oils  
Residual Fuel Oils

### 5. REFINERY FEEDSTOCKS

Crude Oil Properties  
1. API Gravity  
2. Sulfur Content, Wt%  
3. Pour Point, °F (°C)  
4. Carbon Residue, Wt%  
5. Salt Content, 1lb/1000 bbl  
6. Characterization Factors

7. Nitrogen Content, Wt%

8. Distillation Range

9. Metals Content, ppm

10. Total Acid Number

Composition of Petroleum

1. Paraffins

2. Olefins

3. Naphthenes (Cycloparaffins)

4. Aromatics

Crudes Suitable for Asphalt Manufacture

Crude Distillation Curves

Problems

## 6. BLENDING AND COMPOUNDING

## 7. OIL REFINING

Introduction

General Aspects of Oil Refining

Crude Oils and Products

Crude Oil Constituents

Classification of Crude Oils

Oil Products

1. Gas Fuels

2. Liquid Fuels

Nonfuel Applications

Oil Refining Processes

Crude Oil Distillation

Atmospheric Distillation

Vacuum Distillation

Crude Oil Desalting

Catalytic Cracking (Cat Cracking)

Hydrotreating

Distillate Hydrotreating

Pyrolysis Gasoline Hydrotreating

Desulfurizing by Adsorption

Catalytic Reforming

Introduction

Semiregenerative Reformer

Fully Regenerative Reformer

Continuously Regenerative Reformer

Hydrocracking

Residue Conversion Process Introduction  
Fundamentals of Residue Conversion and Process Options  
Hydrogen Addition (“H-in”) Processes  
Residue Hydrotreating (Demetallization, Desulfurization,  
Denitrification)  
Residue Hydrocracking (Hydroconversion)  
Carbon Rejection (“C-out”) Processes  
Thermal Processes (Visbreaking, Coking)  
Catalytic Processes (Residue Cat Cracking)  
Other Processes  
Extraction of Asphaltenes  
Partial Oxidation  
Process Combinations  
Gasoline Upgrading Processes  
1. Alkylation  
2. Polymerization  
3. Isomerization  
4. Production of Ethers (MTBE, ETBE)  
Other Processes  
Gas Treating  
Sulfur Recovery  
Catalysts  
Environmental Protection in Oil Refining  
Introduction  
Manufacturing Emissions  
Hydrocarbons  
Hydrocarbons in Air  
Hydrocarbons in Wastewater  
Hydrocarbons in Soil and Groundwater  
Sulfur and Nitrogen Compounds  
Sulfur Compounds  
Nitrogen Compounds  
Consumer Related Emissions  
Transportation Fuels  
Motor Gasoline  
Diesel Fuel  
Marine Fuels  
Fuels for Heat Generation  
Cost of Environmental Conservation  
Integrated Refinery Models  
Trends of Refinery Structures

Hydroskimming Refinery  
Conversion Concepts  
Cat Cracking – Visbreaking Refinery  
Hydrocracking- Cat Cracking Refinery  
Hydrocracking – Coking Refinery  
Integration of Existing Refineries  
Corrosion and Materials  
Testing and Analysis  
Crude Oil and Product Properties  
Testing Methods and Standards  
Storage and Transport

## 8. RESIDUAL FUEL OILS

History  
Specifications For Residual Fuels  
Fluidity  
Thermal Stability  
Explosiveness  
Pacific Specifications for Fuel Oils  
Detailed Inspections of Heavy Fuels  
End uses of Residual Fuel Oils  
Steam Boilers  
Industrial Applications  
Diesel Engines  
Gas Turbines  
Gas-enrichment Oils  
Problems Associated with Utilization  
Sulfur in Residual Fuel Oils  
Ash Possible Source of Contaminants  
Soot and Carbon Particles  
Instability and Incompatibility  
The Combustion of Residual Fuels  
Heating Value  
Chemistry of Combustion  
Flue-gas Analysis  
Humidity in Air and Flue Gases  
Heat Content of Flue Gases  
Specific Heat of Fuel Oils  
Residual Fuel Oil Burners

## 9. DISTILLATE HEATING OILS

Status of the Heating-Oil Industry  
Burners, Controls and Tanks  
Central-Heating Systems  
Burning Qualities in Oils  
Stability in Heating Oils  
Handling and Delivery  
10. FORMULATIONS OF PETROLEUM

11. PHOTOGRAPHS OF MACHINERY WITH SUPPLIERS CONTACT DETAILS

## About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
