The Complete Technology Book on Textile Processing with Effluent Treatment

Code	NI108
Format	paperback
Indian Price	₹1000
US Price	\$100
Pages	584
ISBN	8178330504
Publisher	Asia Pacific Business Press Inc.

Description

Textile manufacturing is a major industry, it is based in the conversion of three types of fibre into yarn, then fabric, then textiles. These are then fabricated into clothes or other artefacts. Cotton remains the most important natural fibre, so is treated in depth. There are many variable processes available at the weaving and fabric forming stages coupled with the complexities of the finishing and colouration processes to the production of wide ranges of products. Certain other fiber properties increase its value and desirability in its intended end use but are not necessary properties essential to make a textile fiber. Such secondary properties include moisture absorption characteristics, fiber resiliency, abrasion resistance, density, luster, chemical resistance, thermal characteristics, and flammability. Some primary properties of textile fibers are: fiber length to width ratio, fiber uniformity, fiber strength and flexibility, fiber extensibility and elasticity, and fiber cohesiveness. Some, mostly larger, firms operate in the organized sector where firms must comply with numerous government labour and tax regulations. Most firms, however, operate in the small scale unorganized sector where regulations are less stringent and more easily evaded. The textile industry occupies a unique place in our country. One of the earliest to come into existence in India, it accounts for 14% of the total Industrial production, contributes to nearly 20% of the total exports. Being the largest foreign exchange earner, it accounts for more than 5 per cent of GDP.

This book majorly deals with characteristics of cotton textile processing, characteristics of effluents, characteristics and treatment of synthetic, textiles processing effluents, processes, volume and characteristics of effluents, treatment, the properties of textile fibres, important properties of fibres, basic aspects of textile fibres etc.

The book covers complete details of textile processing with the standard parameters of effluents treatment which is the burning problem for the textile processors. Needless to say that this book will be of immense use to textile processors, consultants and chemists engaged in water and waste water treatment, research institutions etc.

Content

1. Characteristics of Cotton Textile Processing

Characteristics of Effluents

Sizing (Slashing)

Desizing

Scouring

Bleaching

Mercerizing

Dyeing

Printing

Final Finishing

Combined Effluent
Treatment

Desizing

Scouring

Bleaching

Mercerizing

Dyeing

Printing

Combined Effluent

Primary Treatment

Secondary Treatment

Tertiary Treatment

2. Characteristics and Treatment of Synthetic

Textiles Processing Effluents

Processes, Volume and Characteristics of Effluents

Treatment

3. Characteristics and Treatment of Woollen Textile

Processing Effluents

Processes, Sources and Characteristics of Effluents

Raw Wool Scouring

Weaving & Finishing Operations

Characteristics of Scouring Effluents

Characteristics of Effluents from Weaving &

Finishing Operations

Effects of Effluents

Treatment of Wool Processing Effluents

Primary Treatment

Secondary Treatment

Tertiary Treatment

Recovery of Valuable Materials from Woollen

Processing Effluent

4. Color Removal

5. Recovery and Reuse of waste Water

6. Conservation and Reuse of Water

7. Melt Spinning

Associated Apparatus

Spinneret Assembly producing Plug Flow

Multifilamentary Yarns of Uniform Quality

Filament Manufacturing Device of Small Height

Filaments and Fibers Having Discontinuous Cavities

Spinning Pack Filter

Polyesters

Highly Oriented Undrawn Yarn

Multifunctional Chain Branches

Transfer System Between Melt Source and Spinning Position

Enhanced Dyeability and Thermal Stability by

High Speed Spinning

Deep-Dyeing Textured Yarn Spun at High Speed

High Speed Production of Preoriented Yarn

Vinyl Copolymer to Reduce Pilling

Anti-Pilling Filaments with High Tenacity and

low Knot Tenacity

Low carboxyl Polyester Fibers Using Alkali

Metal salt as catalyst

Antistatic Polyether-Polyester Block Copolymer

Process for Textured Yarn

C-Shaped Filaments

Nylons

Polycaproamide Reacted with Cyclic Tetracarboxylic

Acid Dianhydride

Polypyrrolidone with Alkylamines for Improved

Extrudability

Nylon 66 Spinning Process

Magnesium Oxide Incorporated into Polycaprolactam

Trilobal Filaments

High Speed Spinning of Polyamides

Acrylics

Acrylonitrile/Styrene/Isobutylene Copolymer Needing

No After-Stretch

Extrusion of a Single Phase Melt of Polyacrylonitrile

and Water

Other Polymers

Polyethylene Oxide Monofilament

Nylon Modified Phenolic Resin Fiber

Nonwoven Webs

Reinforced Matting

Webs of Continuous Thermoplastic Filaments

Continuous Production of Tubular Modular Filter Elements

Bonded, Low Density Matting

Wet Lay Process

Coatings and Finishes

Fiber Finishes

Stabilized Silicone Oil Coating for Melt Spinning Nozzles

8. Dry Spinning

Acrylics and Modacrylics

Bifilar Acrylic Fibers

Modacrylics with Improved Coloristic Properties

Removal or Residual Solvent

Cellulosics

Manufacture of Viscose Filaments

Cellulose spun into Ammonia Atmosphere

Other Polymers

Polypyrrolidone

Halogenated Aromatic Polyesters

Flame Retardant Melamine

Protein Fibers

Associated Apparatus

Dry Spinning Pack Assembly

Static Mixing Apparatus

9. Wet Spinning

Acrylics and Modacrylics

Reduction of Voids in Wet-Spun Acrylic Fibers

Acrylic Fibers Free from Delustering

Improved Hot/Wet Properties

Flame-Retardant Acrylics

Modacryl Filaments with Permanent Brilliance and
Transparence

Cellulose and Starch

Rayon Fibers Containing Starch

Continuous Process for Viscose Yarn

Water-Insensitive Starch Fibers

Polyamides and Other Nitrogen-containing Polymers

Production Arylamides with Recovery of Amide Solvent

Air Gage Arylamide Spinning Process

Reduced Salt Content in Arylamide Fibers

Neutralization of Polyamide Spin Dope

Fibers from Anisotropic Dopes of Aromatic Polymers

Arylene Oxadiazole/Arylene N-Alkylhdrazide

Copolymer Fibers

Aromatic Oxadizole Polymers and Copolymers

Vinyls

Recovery and Recycle of Salt Solution in Vinyl Polymer
Spinning

Lithium Halides as Solvents for Polyhydroxymethylene

10. Computers in Textile Manufacturing

Computer - Aided Design (CAD) systems

Computer - aided manufacturing

Computer - aided design

Computer - aided process planning

Mechatronics and information engineering

Computer - Aided Logistic Support (CALs)

Development of LAN system

Network controller

11. The Properties of Textile Fibres

Important properties of fibres

Fibre shape and strength of yarns

Fibre extensibility

Softness

Plasticity and thermoplasticity

Lustre

Fibre density

Solubility in various solvents

Affinity for dyes

Fibre structure

The special properties of synthetic fibres

12. Basic Aspects of Textile Fibres

Filament and staple

Yarn

Fabrics

Woven fabrics

Knitted fabrics

Lace and net fabrics

Braided fabrics

Felt fabrics

Bonded fibre fabrics

Textile mills

Woven textile fabrics

Cotton

Wool

Silk

Rayon

Acetate

Nylon

Vinyon

Mohair
Linen
Glass fibres
Dacron
Orlon
Vicara
Yarns for weaving
13. Structure and Properties of Textile Fibres
Fibre structure
Properties of synthetic fibres
14. Textile Weaving
Plain Weave
Twill Weaves
Effect and flush
Satin Weaves
Basket and rib weaves
Weave Combinations
Face and back of fibres
Knitted Fabrics
Colouring
Braiding
Lace
Nonwoven fabrics
Bonded Fabrics
Automatic weaving machine
3-D weaving processes
15. Textile Wet Processes
Cotton Textiles
Sizing (Slashing)
Desizing
Scouring
Bleaching
Mercerizing
Dyeing
Printing
Finishing
Synthetic Textiles
Wool Processing
Wool Scouring
Wool fulling
Wool Carbonizing

Water Usage

Data Processing Block

16. Printing Processes

Fixation

Fixation with Vapor of Organic Solvent

Dyestuffs for Methylene Chloride Fixation Processes

Improved Fixation of Reactive Dyes on Cellulose Fibers

Treatments of Cellulosics

Crosspadding or Overprinting Impregnated Cellulose Materials

Basic Dyes and Simultaneous Crosslinking

Printing and Simultaneous Finishing

Other Treatments

Addition of Lactone for pH Adjustments

Sodium Hydrosulfite Aftertreatment of Aromatic Polyesters

Improved Pretreatment and Aftertreatment for Optimum Handle

Aftertreatment with Surfactant and Reductonate

Coloration of Aromatic Polyester or Cellulose Triacetate

Special effects

Continuous Process for Two-Color Effect on Blends

Double-Surface Multicolor Printed Cloth

Double Face Printing of Polyester Fabrics

Well - Defined Multicolor Patterns on Porous Substrates

Polymer - Printed Fabric Having Differential Dyeing Characteristic

Acid Dye Mixture for Differential-Dyeing Nylons

Spotted Effect on Synthetic Fiber Materials

Resist Printing Polyesters with Acid Dyes

Discharge Effects on Prints with Disperse Dyes

Reserve Effects in Multicolor Printing

Relief Printing to Simulate Animal Skins

Camouflage Dyeings and Prints on Synthetics and Blends

Photographic Techniques

Continuous Repetitive Patterns on Piled Fabrics

Impregnation with Leuco Ester of Vat Dyestuff

Other Processes

Continuous Process for Optical Brightening and Printing

Continuous Dyeing and Printing of Piece Goods

Printing Heavy Pile Fabrics with Powder Preparations

Improved Alignment of Printed Patterns
Uniform Heat-Setting of Continuous Synthetic Filament
Groups
Voluminous Substrate Rolled Up with Foamed Dye
Continuous Printing Process by Direct Liquid Film
Transfer
Method for Printing and Flocking Simultaneously
Sprayed Carriers for Continuous Print Fixation
17. Weaving of Synthetic Yarns And Blends
Introduction
Polyester Blended Fabrics
Sizing
Pirn Winding
Weaving
Weaving of Multifilament Yarns
Commonly Used Multifilament Fabrics
Warping
Sizing
Monofilament Fabrics
18. Weaving of Certain Commercial Fabrics
Introduction
Weaving of Poplin
Wrap preparation
Weaving
Denim
Dyeing and Sizing Processes
Tyre Cord Fabric
Yarn and Fabric Particulars
Production Flow for Tyre Cord Fabric
Weaving
Weaving of Tapes
Tubular Cloth
Weaving of Aramide (Kevlar) yarns
Characteristics of Aramides
Ranges of Application of Kevlar Fibres
Basic Requirements
Warping
Sizing
Weaving
19. Weaving and Fabric Engineering Calculations
Introduction

Conversion Tables
Yarn Numbering System
SI Units recommended for Textiles
Folded Yarns
Average Count
Weight of a Piece of Cloth
Heald Calculations
Reed Calculations
Take-Up Motion on a Plain Loom
Loom speed
Production of Looms
Efficiency
Shuttle Movement
Accelerating force of Sley
Calculation on shuttleless weaving Machines Example 33
Fractional Cover and Cover Factor
Diameter
Bulk density
Fractional Cover
Cloth Setting Rules
20. Fabric Defects and Value Loss
Grading of fabrics
Value loss
Types of Fabrics Defects
Common Fabric Defects and their causes
Bar
Box Mark
Broken Pattern
Broken Pick
Cracks
Cut weft
Defective selvages
Floats Stiches
Fuzzy
Hang Pick
Harness skip or warp skip
Lashing in or weft trail or jark in weft
Loose warp ends
Hanging threads
Missing Ends/Ends Out (chira)
Reed Marks

Shuttle Marks
Slough-off
Stains
Sticker
Tear Drop
Temple Mark
Uneven cloth
Wrong Denting
Wrong Drawing
Control of Fabric Quality at Loom State
Design Specifications
First Piece Inspection
Weaving Defects
Grey Inspection
Recording of Loomwise and Weaverwise Fabrics Faults
Point Rate System
Directory Section

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
