The Complete Technology Book on Printing Inks

Code: NI109	Format: paperback
Indian Price: ₹1000	US Price: \$100
Pages: 640	ISBN: 8178330482
Publisher: Asia Pacific Business Press Inc.	

Description

The beginning of ink making is something of a mystery. It is certain however, that the development of the art of writing preceded the invention of ink by almost a thousand years. Today inks are divided into two classes: printing inks and writing inks. Printing is a process for reproducing text and images, typically with ink on paper using a printing press. It is often carried out as a large scale industrial process, and is an essential part of publishing and transaction printing. Different techniques and printing equipments are employed for each printing practices. The demand for innovative printing practices has been on a high in recent times. There are various kinds of printing processes; lithographic process, the gravure process, offset printing process etc. different types of inks derived from different processes are ball pen inks, bleachable inks, fluorescent inks, fast drying ink, automatic press inks, rotary press inks, coated paper inks, planographic inks, lithographic inks, offset tin printing inks etc. The Printing Ink industries have grown significantly during the last decade and this industry is characterized by exceeding high margin profit. As we read newspapers, magazines, and books on a daily basis therefore inks are found in almost every aspect of human activity. The worldwide printing inks market is projected to register a CAGR of about 2.8%. Printing inks market embodies the strength of the global as well as regional economies. With its high correlation to a national GDP, the printing inks market is cyclical in nature, with economic ups and downs amplifying the demand patterns. The world printing inks market is projected to grow moderately over the next couple of years.

The major contents of the book are pigment in the printing inks, manufacturing of printing inks, storage and testing of raw materials, planographic inks, lithographic inks, factors effecting visual appearance of ink film, factors effecting visual appearance of ink film, method of mixing metallic powder and varnish, the principle of reproducing

photographs by printing methods, etc.

In this book an attempt has been made to bring together the useful manner as possible the fundamental Principles of ink making. The book contains formulae processes and other relevant information of the manufacturing of different types of printing inks.

Content

1. Introduction

2. Printing Inks

3. Printing Ink Vehicles

Vegetable Drying Oils

Linseed Oil and Linseed Oil Varnishes

Lithographic Varnish

China Wood Oil or Tung Oil

Soya Bean Oil

Perilla Oil

Other Vegetable Drying Oils

The Vegetable Semi-Drying Oils

Cottonseed Oil

Rapeseed Oil

The Vegetable Non-Drying Oils

Mineral Oils

Animal Oils

Terrestrial Animal Oils

Marine Animal Oils

Rosin Oils

Pitch Varnishes

4. Pigment in the Printing Inks

Pigments

Nature

Minerals

Carbonic sources

Botanical

From animals

Black Pigments

Lamp black

Russian black

Coal or gas

Wooden coal
Ivory coal
Bones
Parish black
Lead and graphite
Composition black
White Pigment
White lead
Antimony
Chinese white
Transparent white
Blainfix white
Yellow Pigments
Chrome yellow
Cadmium yellow
Ochres yellow
Gummy material
Minerals
Red Pigment
Vermillion
Carmine
Lac
Lake pigment
Kothenial lake
Madar
Blue Pigment
Prusian blue
Ultramarine blue
Reflex blue
Oriental blue
Cobalt blue
Indigo blue
Green Pigment
Emerald green
Chrome green
5. Manufacturing of Printing Inks
Storage and Testing of Raw Materials
Mixing operation
Mixing machines
Milling process

Delivery part of the machine

Quality control

Packing and selling

6. Typographic Printing Inks

Job Press Inks

Job Black

Job Press Bright Red

Job Press Green

Automatic Press Inks

Automatic Press Black

Automatic Press Red

Flatbed Cylinder Press Inks

Cylinder Press Black

Cylinder Press Peacock Blue

Rotary Press Inks

Rotary Press Red

Rotary Press Black

Web Press Inks

Web Press News Black

Perfecting Press Red

The Relation of Ink to Stock

Bond and Ledger Paper Inks

Bond Bronze Blue

Bond Black

Coated Paper Inks

Coated Paper Red

Coated Paper Yellow Lake

Super-calendered Paper Inks

Super Paper Red

Super Paper Blue

Parchment Paper Inks

Parchment Black

Parchment Red

Carton Stock Inks

Carton Yellow

Carton Red

Inks for Machine Finished Paper

Machine Finished Red

Machine Finished Blue

Glassine and Cellophane Inks

Glassine Violet
Glassine Green
Halftone Black Inks
High Grade Halftone Black
Publication Halftone Black
Process Inks
Process Transparent Yellow
Process Blue
Process Red
7. Planographic Inks
Lithographic Inks
High Grade Lithographic Black
Lithographic Peacock Blue Ink
Lithographic True Blue
Offset Printing Inks
Offset Red for Lake C
Offset Milori Blue
Offset Tin Printing Inks
Tin Printing Reddish Blue
Tin Printing Medium Yellow
Dry Offset Printing Inks
Dry Offset Red for Lake C
Dry Offset Bronze Blue
Photogelatin Inks
Photogelatin Blue
Photogelatin Black
8. Intaglio Printing Inks
Copper Plate Engraving Inks
Copper Plate Black
Copper Plate Blue
Steel Plate Engraving Inks
Steel Plate Black
Toner Blue Ink for Plate Black
Steel Plate Orange
Stamping Inks
Gloss Stamping Red
Dull Stamping Black
Photogravure Inks
Photogravure Picture Black
Photogravure Brown

Rotary Photogravure Inks
Plateless Engraving or Thermographic Inks
Dense Black for Plateless Engraving
True Blue for Plateless Engraving
9. Printing Inks and Colour
Subtractive Theory of Colours
Additive Theory of Colours
Reproduction of Colour By Printing Ink
Classification of Colours
Primary colours
Secondary colours
Tertiary colours
Examples of tertiary colours
Factors effecting visual appearance of ink film
Influence of colours
Cold colours
Warm colours
Terminology Related to Colour
Contrast
Harmony
Hue
Tint
Shade
Tone
Analogous colours
Complementary colours
Density in colour
Transparent and opaque colours
10. Qualities of Offset Inks
Working Qualities
Optical Qualities
Effects After Printing
11. Gravure Printing Inks
Characteristics of Gravure Inks
Vehicles in the Gravure Inks
Considerations for Purchasing Inks
12. Printing Inks for Letterpress
News ink
Inks for platen and cylinder machines
Moisture-set inks

Important Points

Quick-set inks

Cheque inks

Heat-set inks

Important Points

Metallic inks

Method of mixing metallic powder and varnish

Precautions

Aniline inks

Neo-set Inks

13. The Nature of Printing Ink

The Three Main Printing Systems

Typographic Method

Lithographic Method

Intaglio Method

General Properties of Letterpress Inks

The Silk Screen Method

The Principle of Offset Printing

Methods of Ink Drying

Relation between the Printing Process, Ink, And Paper

The Principle of Reproducing Photographs by Printing Methods

The Actinic Tanning of Gelatine

Letterpress Half-tone Plate Reproduction

The Principle of Photogravure

Half-tone Printing Using Dots Letter Press (or Litho)

Photogravure Printing Using Square Cells

Print Recognition

Differences in Litho and Offset-Litho Printing

Differences in Typographic Printing

14. The Colloidal Nature and Rheology of

Printing Inks

Ink Compared to Colloidal Dispersions

Flocculation

Types of Flow

Fluidity

Newtonian Flow

Plasticity

Plastic Flow

Consistency

Thixotropy

Measurement of Thixotropy
Pseudo-plastic Flow
Dilatant Flow
The Empirical Flow Test
Rheological Specifications of An Ink
Flow Requirements of Letterpress Inks
Supply of Ink from the Duct
Behaviour of Ink in the Duct
Distribution of Ink on the Press
Impression
Special Flow Requirements of News Inks
Flow Requirements of Offset Inks
Flow Requirements of Copper-plate Inks
Ink Tack
Nature of Tack
Measurement of Ink Tack
Elasticity and Plastic Flow
Elasticity
Relaxation Time
Fundamental Rheological Properties
15. Inorganic Pigments and Extenders
Nature of Pigments
The Oil Adsorption of Pigments
Opaque White Pigments
Transparent White Pigments And Extenders
Barytes And Blanc Fixe
Alumina Hydrate
Gloss White
Whiting or Chalk, CaCO_3
Mica
Silica, SiO_2
Magnesium Carbonate
The Use of Extenders In Printing Inks
Ultramarine
Bronze Blue, Iron Blue, Or Ferrocyanide Blue
Lead Chromes
Orange Basic Chrome
Chrome Red
Molybdate Orange and Molybdate Scarlet Chrome
Zinc Chrome on Zinc Yellow

Cadmium Pigments

Red Lead, Pb₃O₄

Vermilion, HgS

Brunswick Green And Milioti Green

Zinc Chrome Greens

Guignetâ€™s Green, Chrome Oxide Green

Natural Iron Oxide Pigments

Manufactured Iron Oxide Pigments

Uses of Inorganic Pigments in Printing Inks

16. Ink in Relation to Paper

The Nature of Paper

The Fundamentals of Paper Making

Conversion of Raw Materials to 'Half Stuff'

Rag Half Stuff

Esparto Half Stuff

The Treatment of Wood

Sulphite Method For Chemical Wood

Caustic Soda Method For Chemical Wood

Soda Sulphate Method For Chemical Wood

Mechanical Wood Treatment

Beating

Hand-made Paper

Machine-made Paper

Methods or Glazing Paper

Special Finishes

Opacity Improvements

Watermarking

Wove, Laid, and Twin-wire Paper

Storage of Printing Papers

Paper Troubles And Remedies

Fading of Tinted Printings

Fluffing or Dusting

Picking or Plucking

Static Electricity In The Stock

Types of Printing Paper

The Penetration of Ink Into Paper

Measurement of The Penetration of Ink into Paper

The Penetration of Slow-drying Inks Into Paper

Drying by Absorption

The Transfer of Letterpress Inks from Forme to Paper

Complete Contact of Paper Surface with Ink Film
Maximum Ink Acceptance Capacity of the Paper
Excess Ink on the Forme
General Requirements of Printing Paper
Printability of Offset Paper
General Requirements of Printing Ink in Relation to Stock
17 The Typographic Process
Stereotypes
Half-tone Engravings in zinc and Copper
Line Blocks
Printing Machines
The Hand Press
Platen Machines
Vertical Platen Machines
Automatic Platens
Cylinder Machines
The Vertical Miehle

Summary

Washable Fabric Inks and Textile Marking Inks

Water-colour Inks

Inks for Special Requirements

Low Odour Inks

Rub-resistant Inks

19. Natural Resins, Modified Natural Resins, and Bituminous Materials

Nature of Resins

Classification of Resins

Congo Copal

Manila Copal

Sierra Leone Copal

Zanzibar Copal

Amber

Damar

Rosin or Colophony

Rosin Oil

Polymerized Rosin

Hydrogenated and Oxidized Rosins

Tall Oil

Shellac

Sandarac

Mastic

Zein

Modified Natural Resins

Ester Gum

Lime-hardened Rosin

Bituminous Materials Nature

Asphalts

Bitumens

Pitches

Firnigrals and Iranolins

Uses in Printing Inks

20. Aniline, Dye-spirit, or Flexographic Inks

Transparent Aniline Inks

Uses And Advantages

Basic Dyes Suitable for Transparent Aniline Inks

Media

Pigmented Flexographic Inks

Synthetic Resins For Spirit Inks

Maleics

Pure Phenolics

Unesterified Rosin Modified Cresol-formaldehyde

Resins

Unesterified Rosin Modified Phenol-formaldehyde Resins

Miscellaneous Phenolics

Ketone-aldehyde Base Synthetic Resins

Spirit Type, Flexographic Ink Formulations

Flexouraphic Inks Not Based On Alcohol

Aniline Machines

21. Drying Oils,

The Nature of Drying Oils

The Acids Present In Drying Oils

Properties of Semi-drying Oils

Linseed Oil

Production of Raw Linseed Oil

The Refining of Linseed Oil

Bleaching of Refined Linseed Oils

Comparison of the Properties of Acid

Boiled Linseed Oil

Blown Linseed Oil

Heat-bodied Linseed Oil Or Stand Oil

Plant For Making Stand Oils

Catalysts For Bodying Linseed Oil

Improved Stand Oils

The Chemical Changes in the Heat Bodying

of Linseed Oil

Tung Oil

Properties of Tung Oil

Dehydrated Castor Oil (D.C.O.)

Castor Oil

Following The Dehydration

D.C.O. Stand Oils

Blown Dehydrated Castor Oil

Perilla Oil

Oiticica Oil

Stillingia Oil

Soya Bean Oil

Sunflower Oil

Tobaccoseed Oil

The Drying Oil Fatty Acids

Linseed Oil Fatty Acids (L.O.F.A.)

Dehydrated Castor Oil Fatty Acids (D.C.O.F.A.)

Semi-drying Oil Fatty Acids

Further Drying Oils

Improved Drying Oils By Processing

Fundamentally Modified Drying Oils

Vulcanized or Sulphurized Oils

Styrenated Oils

Maleinized Oils

Epoxidation And Hydroxylation Of Drying Oils

The Use Of Drying Oils In Printing Inks

22. Printing Ink Driers or Siccatives

Nature of Ink Driers

General Use of Driers

Paste And Liquid Driers

Theory of the Promotion of Drying

Methods of Preparation of Liquid Driers

Properties of Liquid Driers

Appearance of The Driers

Standard Specifications

The Use of Driers In Printing Inks

23. Ink on Surfaces other than Paper

General Principles

Cellophane Printing

Moisture-proof Viscous Film Printing

Polyethylene or Polythene Film Printing

Printing on Lacquers and Varnished Surfaces

Printing on Rubber

Printing on P.V.C.

Printing on Metal and Metal Foil

Printersâ€™ Use For Roller Coating

Roller Coatings

Cold-set Inks

24. Solvents, Diluents, and Plasticizers

General Properties of Solvents

Boiling Range

Flash Point

Evaporation Rate

Solvent Retention

Solvent Balance

Viscosity Changes During Drying

Solvent Power

Undesirable Solvent Properties Instability

Bad Odour

Bad Colour

Impurities

Toxicity

Petroleum Alkanes

Natural Petroleum

Petroleum Ether

S.B.P. Spirit

Petroleum Spirit, Ligroin Or Gasoline

White Spirit (W/S)

Mineral Oils

Coal-tar Hydrocarbons

Benzene C₆H₆

Toluene, C₆H₅CH₃, Methyl Benzene

Solvent Naphthas

Light Naphtha

Heavy Naphtha or Aromatic White Spirit (A.W.S.)

Terpene Solvents

Turpentine

Oxidized Turpentine

Dipentene, C₁₀H₁₆

Pine Oils

Hydrogenated Naphthalene Solvents

Decalin, C₁₀H₁₈

Tetralin C₁₀H₁₂

Alcohol Solvents

Ethanol, Ethyl Alcohol, CH₃CH₂OH

Isopropanol

Butanol CH3CH2CH2CH2OH

Methyl Isobutyl Carbinol (M.I.B.C.)

Diacetone Alcohol Or Dical

Benzyl Alcohol C6H5CH2OH

Glycol Solvents

Ethylene Glycol HO.CH2CH2OH (E.g.)

Diethylene Glycol HO.CH2CH2O.CH2CH2OH. (D.E.G.)

Propylene Glycol Ch3.CHOH. CH2OH (P.G.)

Dipropylene Glycol HO. (CH2)3.O. (CH2)3OH (D.P.G.)

Hexylene Glycol, 2 Methyl, (2, 4) Pentanediol (H.G.)

Ethers

Di-ethyl Ether, C2H5.O. C2H5

The Ether Alcohols or Cellosolves

Methyl Cellosolve / CH3.O.(CH2)2.OH

Cellosolve, Ethylene Glycol Monoethyl Ether

Butyl Cellosolve CH3.(CR2)3.O.(CH2)2OH

The Carbitols

Carbitol

Methyl Carbitol

Ketones

Acetone

Methyl Ethyl Ketone (M.E.K.) CH3.CO. C2H5

Methyl Isobutyl Ketone (M.i.b.k.)

Isophorone, C9H14O

Sextone B, Methyl Cyclohexanone

Acetonyl Acetone, 2.5 Hexanediol

Furfural

Ester Solvents

Butyl Acetate. C4H9.COO.CH3

Butyl Lactate C4H9COO.CHOH.CH3

Plasticizers

Di-butyl Phthalate (D.B.P.)

Tri-phenyl Phosphate (T.P.P.)

Tri-cresyl Phosphate (T.C.P.)

Triacetin

Ethyl Abietate

Solvents From Petroleum

25. Printing Ink Carbon Blacks

Rollers Stripping
Scumming
Spotty Ink Drying
Tinting
Worries Due to Using Etch
33. Directory Section

About NIIR Project Consultancy Services (NPCS)

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
