## The Complete Technology Book on Soaps (2nd Revised Edition)

<b>Code</b>	NI110
<b>Format</b>	hardcover
<b>Indian Price</b>	₹1425
<b>US Price</b>	\$150
<b>Pages</b>	496
<b>ISBN</b>	9788178331676
<b>Publisher</b>	None

### Description

Soap is the traditional washing compound made from oil fats and caustic alkali. It is an item of daily necessity as cleaning agent. There are few specialty soaps like the washing soaps, castile soaps, sandal soap, specially flavored soaps, medicated soaps, toilet soaps and baby soaps. Population growth, especially households with children has a proportional impact on the growth of the manufacturing sector of the industry. The soap industry is vivacious, varied, creative and tricky, and has the prospective to provide a gratifying career. With increasing popularity there has been increase in potential competitors but it still has the opportunity of further exploitation.

Today with increase in disposable incomes all around the world, demand for these products expected to increase because consumers are moving up towards premium products. With increasing awareness of hygienic standards, the market for the Soap is growing at a rate higher than 8% annually. People have become more creative in trying to find new ways in which they can make soap either for domestic use or commercial purposes. This book will provide all the basic facts and information you need to get started. You will be able to slowly build your way up to completely master the art of soap making.

The book contains processes formulae, Photographs of Plant & Machinery with Supplier's Contact Details, Addresses of Raw Material Suppliers and providing information regarding manufacturing method of different washing and toilet soaps. Some of the fundamentals of the book are raw material oil and fats, fatty acids, manufacture of soap products, technology of soap manufacturing, various formulations of soaps, soap perfumery, management of soap factories, analytical methods.

This book will be a mile stone for its readers who are new to this sector, will also find useful for professionals, entrepreneurs, those studying and researching in this important area.

## **Content**

### 1. Introduction

Definition

Uses

Cleansing Mechanism

Characteristics of Soap

Saponification of Fats - The Basic Chemical  
Reaction Making Soap

### 2. Raw Materials Oil and Fats

(The Main Raw Materials for Soaps)  
Classification of Fats/Oils  
Some of the Most Useful Fats and Oils  
Tallow  
Coconut Oil  
Palm Oil  
Palm Kernel Oil  
Cottonseed Oil  
Castor Oil  
Chinese Vegetable Tallow  
Corn Oil  
Rice Bran Oil  
Linseed Oil  
Olive Oil  
Groundnut Oil  
Tall Oil  
Mahua Oil  
Babassu Oil  
Neat's-Foot Oil  
Lard  
Greases  
Fish Oil  
Hydrogenated Oils  
Purification of Soap Fats  
Acid Washing  
Alkali Refining  
Bleaching  
Absorbent Bleaching  
Bleaching By Using Oxidizing Agents  
Testing Of Soap Fats  
Properties  
Non Fatty Raw Materials For Soap  
The Alkalis  
Soap Builders  
Filler  
Stabilizers, Anti-oxidants  
Other Additives (Foam Producers)  
Foaming Agents Used in Soap  
Solvents  
Medicaments/Deodorants/Bacteriostatic Agents  
Clarifiers

Colouring Matters  
Preparation of Colours  
Water Soluble  
Oil Soluble  
Alcohol Soluble  
Milled Soaps  
Full-boiled/Semi-boiled/cold-made Soaps  
Soap Bases and Liquid Soaps  
Washing/Laundry Soaps  
Medicated Soaps  
Perfumes  
Comprehensive Details  
Essential Oils  
Isolates  
Synthetic Chemicals

### 3. Fatty Acids

Types of fatty acids and their physical properties

Physical properties of fatty acids

Melting point

Boiling point

Viscosity

Density

Solubilities

Refractive Index

Heat of crystallisation

Polymorphism

Fatty acids of oils and fats

Raw materials of fatty acids

Animal fats

Tall oil

Vegetable oils and soap stocks

Manufacture of fatty acids

Pretreatment of feed stock

Fat splitting

High pressure catalytic splitting

High pressure steam splitting

Continuous fat splitting

Refining of crude fatty acids

Distillation of fatty acids  
Mazzoni fat splitting and distillation process  
Distillation of crude fatty acid  
Splitting  
Distillation  
Splitting plant using thermic fluid instead  
of steams  
Fractional distillation of fatty acids  
Development trends in fatty acid distillation  
Panning & pressing process  
Solvent crystallisation process  
Lurgi Wetting Method  
Recovery of glycerine  
Pre-treatment and evaporation of spent-lye  
Pre-treatment and evaporation of sweet water  
Distillation of crude glycerine  
Synthesis of fatty acids

#### 4. Manufacture of Soap Products

Health and safety Factors  
Classification of Soap Products  
Methods of Manufacture  
Various Finishing Methods  
Production  
Full Boiling Process (Description)  
The Process  
First Stage  
Second Stage  
Third Stage  
Fourth Stage  
Fifth Stage  
Washing Bar/Cake Soap From Neat Soap  
Jet Saponification Process  
Glycerine Recovery  
Semi-Boiling Process and Cold-Made Process  
General Description  
Production of Washing Bar/Cake Soap  
by Semi-Boiling/Cold-Made Process  
Equipments  
Process Operations  
Examination of Cold-Made Products

Formulations for Washing Soaps  
Washing Soap Using Soap Stock as Main  
Fatty Raw Material  
A Typical Batch  
Toilet Soap  
Milling Process  
Floating Toilet Soap Cake  
Manufacture of Toilet Soap by Semi-Boiled/  
Cold-Made Process  
Procedure  
Alkali  
Milled Finished Soap  
A Typical Batch For Toilet Soap  
Mottled Soap  
Carbolic Acid Soap  
Suggested Formulation  
Procedure  
Medicated Soaps  
Castile Soap  
Castile Soap by Boiling Process  
Some Suggested Formulations for Castile Soap  
Deodorant Soaps  
Various Industrial Soaps  
Textile Soaps  
Laundry Washing Aids  
A Fabric Cleaning Compound  
Cotton Scouring Soap  
Dry Cleaner's Soap  
Water Softener  
Jelly Soap/Soft Soap  
Automobile Soap  
Wire Drawing Soap  
Scouring Soap  
Preparation of Washing Soap Powder  
Simplified Method  
Powdered By Pulverising Method  
Washing Powder by Spray-Crystallization  
Soap Beads or Granules by Spray-Drying  
Soap Flakes  
Shaving Soaps  
Procedure

Shaving Cream  
Other Formulation  
Brushless/Latherless Shaving Cream  
Liquid Shaving Cream  
Basic Combination  
Thicker Cream  
Aerosol Package  
Liquid Soaps/Shampoos  
Process of Manufacture  
Equipments  
Liquid Toilet Soap Concentrates  
Liquid Washing Soap Concentrate  
Shampoos  
Classification  
Physical States  
Characteristics  
Various Additives of Shampoos Imparting  
Special Properties  
Solubilizer  
Opacifiers  
Thickeners for Body or Viscosity  
Foam Stabilizers  
Conditioning Agents  
Agents for Resistance of Hard-Water  
Germicidal Agents  
Preservatives  
Soap Shampoos  
Older Methods  
Modern Methods  
Some Typical Formulations  
Shampoos Based on Synthetic Surfactants  
General Formulations  
Liquid Cream Shampoos and Paste Cream  
Foamless Oil Shampoos  
Baby Shampoos  
Medicated Dandruff Shampoos  
Other Miscellaneous Shampoos  
Aerosol Shampoos (Pressure Dispersed)  
Method of Continuous Saponification of Fats  
by Alkali Solution  
Method of Continuous Splitting of fats into

fatty Acids and Glycerol with Simultaneous  
Neutralization of free fatty Acids with Alkali  
Yielding Soap  
Continuous Neutralization Process  
Description of A Process  
Advantages  
Disadvantages  
Continuous Neutralization Process using Fatty  
Acids Instead of fats  
Batch Methods of Splitting fats into fatty  
Acids and Glycerol  
Purification of Fatty Acids

5 Technology of Soap Manufacturing  
Manufacturing Soap  
Techniques  
Saponification Equipments used by the  
Small-scale sector  
Equipment for batch soapmaking  
Improved methods of saponification  
Lye Absorption  
Saponification Loop  
Saponification of Distilled Fatty Acids  
Alfa Laval Continuous Saponification  
Washing of saponified soap  
Staight washes  
Counter current washes using a set of pans  
Counter current washes in a single  
divided pan  
Rotating disc contactor (RDC)  
Fitting of Soap  
Method of Expressing Free Alkali, Chloride  
and TFM  
Plant for Total Soapmaking Operation  
Construction Materials for Soapmaking Plants  
Earth bleaching of oils  
Chemical bleaching  
Fatty acids  
Lye treatment  
Storage of raw lye  
Output of Soap and Glycerine

Analysis of oils  
Ester value of oils  
Glycerine Recovery  
Introduction  
Glycerine Recovery Procedure  
Purpose of Lye Treatment  
Method of Lye Treatment  
Treatment of Sweet Water  
First treatment  
Second treatment  
Evaporation  
Continuous Finisher  
Refining of Crude Glycerine  
Production of Laundry and Toilet Soaps  
Introduction  
Frame Cooling of Soap  
Production of Filled Soaps on the Mazzoni  
Billeting  
Technology of Toilet Soaps  
Introduction  
Oil blend  
Production of toilet soap  
Mixing of soap  
Preservatives  
Perfumes  
Colours  
Opacifiers  
Optical brighteners  
Super-fatting agent  
Structurants  
Bactericides and germicides  
Miscellaneous additives  
Design of mixers  
Refiners vs. Mills  
Plodding  
Stamping  
Wrapping  
Packing  
Carbolic Soap  
Transparent Soaps  
Introduction

Manufacturing methods  
Manufacturing method  
Translucent Soaps  
Oil blend  
Floating Soap  
Marbled Soap  
Process Control  
Introduction  
Pre-treatment of Raw Materials  
Soapmaking  
Fat charge control  
Colour of soap base  
Free alkali and chloride  
Unsaponified fat  
Glycerol in soap  
Process Controls Beyond Pan Room:  
Domestic Soap  
Toilet Soap  
Other Soaps  
Soap Chips  
Soap Noodles  
Soap Flakes  
Soap Powder for Laundries  
Shaving Cream  
Soft Soap  
Medicated Soap  
Shaving Soap

## 6 Various Formulations of Soaps

Toilet Soap of Inferior Quality  
Process  
Toilet Soap of Lux Type  
Process  
Khas Soap  
Amla Soap  
Rose Soap  
Sandal Soap  
Musk Soap  
Almond Soap  
Transparent Soaps  
Process

Medicated Soaps

Stock Soap

Formulae and Process Description for

Various Medicated Soaps

Process

Carbolic Soap

Process

Procedure

Neem Soap

Process

Camphor Soap

Procedure

Chaulmogra Soap

Procedure

Shaving Soaps and Creams

Shaving Soaps

Solid Shaving Preparation

Liquid Soaps and Shampoos

Process of Manufacture

Liquid Shampoos

Egg Shampoos

Herbal Shampoos

Washing Soap (Various Types)

Precautions regarding Manufacture of Soap

Nerol Washing Soap

Process

Soap Removal Procedure

Formulae for Nerol Soap

7 Soap perfumery

Soap compounds

Brown Windsor

Carnation

Chypre

Cologne

Cyclamen

Fougere

Heliotrope

Hyacinth

Jasmin

Lavender

Lilac

Lily

## 8 Management of Soap factories

Technical Efficiency

Introduction

Yield

Fatty acid yield

Glycerol yield

Active detergent yield

Over/under usage of materials

Packing loss/gain

Oil usage pattern

Scrap and downgrading losses

Productivity

Steam, water, electricity

Financial Summary

Pollution Control

Introduction

Source of Pollution

Oil spills

Chemical spills

Bleaching

Chemical treatment

Soap-making

Glycerine Recovery

Laundry Soaps

Toilet Soap

## Common Quality Problems of Detergents

Detergent Powder

Solubility

Skin irritation

Poor lather/detergency

Detergent Cake

Sogginess

Roughness

Whitish deposit

Poor colour

Poor lather and detergency

Stain Removal

Introduction

Type of stains

Removal of Stains

Lime soap

Protein stains

Iron compounds

Stains due to dyes

Mildew stains

Physical methods of stain removal

Assessment of stain removal

## 9 Analytical Methods

Determination of Soap Composition

For Nature of Fatty acids in soap

For Anhydrous soap and total alkali content

Procedure

Isolation of Fatty Acids and Rosin Acid

From Soap

Acid Value

Saponification Value

The Saponification

Iodine Value

Wijs Solution (Iodine monochloride solution)

Determination

Titer Test

Procedure

Rosin Value

Procedure

Determination of Total Anhydrous Soap and

Combined Alkali Content  
Procedure  
Unsaponified and Unsaponifiable Matter  
Determination  
Testing of Fatty Oils used for Soap  
Moisture and Volatile Matter  
Insoluble Impurities  
Soluble Mineral Matter  
Determination of Total Fatty Acids of soap  
stock and acidulated soap stock  
Acid value  
Ester value  
Determination of rancidity  
Rosin Test  
Colour Test  
Bleach Test  
Smoke Point  
Flash Point  
Turbidity Point  
Cloud Point

10 Plant and Machinery  
Four Blades Chipping Machine  
Other Chipping Machines  
Packing Machine  
Spray Drier for making Detergent Powder  
Portal Stirrer (Mechanical Agitator)  
High Speed Dissolver  
Planetary Mixer  
Centrifuge  
Emulsifier  
Edge Runners  
Ball and Pebble Mills  
Automatic Liquid Filling and Weighing Machine  
Automatic Paste Filling and Crimping Machine  
Automatic Power Filling Machine  
Marking and Printing Machine  
Marking and Printing Machine  
Bottle Washing Machine  
Ribbon Blender  
Batch Mixer

Plodders  
Cutters  
Soap Press

11 Addresses of Raw Material Suppliers

12 Photographs of Plant & Machinery with Supplier's Contact Details

## **About Niir**

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
