Description

Advantage of vermicomposting is that it composts the wastes of rural areas. They clean our villages by using unnecessary organic and non-organic materials. Improves the texture of the soil and its ability to store water. Improves root growth and the multiplication of beneficial soil microorganisms by providing optimum aeration to the soil.

Vermicompost (vermi-compost) is a mixture of decomposing vegetable or food waste, bedding materials, and vermicast created by the decomposition process using various species of worms, usually red wigglers, white worms, and other earthworms. This is known as vermicomposting, and the practise of raising worms for this purpose is known as vermiculture. Sewage treatment can also be done with vermicomposting. The Global Vermicompost Market is reach growing at a CAGR of 16.74%. The Growth of the global vermicompost market is caused by various factors, such as improved soil aeration, improved water holding capacity, better nutrient cycle, and enriched soil with micro-organism, helps in plant root growth and structure, enhanced germination. The vermicomposting method is used in organic farming. Increasing the use of sustainable agricultural practices, such as vermicomposting along with Government support for organic farming is significantly contributing to the global vermicompost market growth. Vermicompost offers plants with necessary nutrients and helps in plant diseases suppression. Worm castings often comprise 7 times more phosphorus, 11 times more potassium, and 5 times more nitrogen than ordinary soil, which are crucial minerals required for plant growth.

Vermiculture and Vermicompost (Earthworm), as well as their manufacturing methods, are all covered in depth in this book. It also offers photos of equipment as well as contact information for industrial providers.

This book is a one-stop shop for everything you need to know about the Vermiculture and Vermicompost (Earthworm) industry, which is ripe for manufacturers, merchants, and entrepreneurs. This is the only book that goes into great detail about Vermiculture and Vermicompost. It's a genuine feast of how-to material, from concept to equipment buying.

Content

1. INTRODUCTION

Advantages of Vermicomposting

Vermicomposting in Daily Life

Vermiculture v/s Vermicomposting

Vermitechnology (VT)

Progress of Worm Industry

Turning Garbage into Money
Chemical Composition of the Vermicompost
Vermicomposting at Home
Vermicomposting on the Farm
The Business of Worms
Interaction of Vermicompost-Earthworm-Mulch-Plantroot (Vemp)
Earthworm Farming is not Hard

2. EARTHWORMS : ECOLOGICAL TYPES

Trophic Classification of Earthworms
Drilosphere
Physical Effects of Earthworms on Soils
Chemical Effects of Earthworms on Soils
The Effect of absence of Earthworms in Soils

3. PHYLUM ANNELIDA : EARTHWORM

Earthworms
Economic Importance
Pheretima Poshuma
The Body Wall
Locomotion
The Coelom
The Digestive System
Food and Digestion
Respiration
Excretory Organs
Physiology of Excretion
Chloragogen Cells
Vascular System
The Nervous System
Working of the Nervous System
Receptor Organs
Generative Organs
Copulation
Fertilization and Cocoon Formation
Classification

4. EARTHWORMS : LIFE CYCLE

Life Cycle Studies
Life Cycle Patterns
Life cycle—Lampito mauritii

Cocoons
Juveniles
Non-Clitellates
Clitellates
Life Cycle—Perionyx excavatus
Cocoons
Juveniles
Non-clitellates
Clitellates
Doubling Time
Biochemical Changes During Growth

5. EARTHWORMS: FOR CULTURE

Worms for Vermiculture
Earthworm Breeding
Vermicompost
Collecting local Earthworms

6. WHY VERMICOMPOSTING

Fertilizers use and Deterioration of Soil Environment
Testing the Impact of Vermicomposting
Nitrogen and Humification in Vermicomposting
Vermicompost - a Quality Manure
Recycling of Wastes through Vermi-Composting
Minimizing Pollution Hazard
Providing Growth Promoters
Vermicomposting : Advantages
Black Gold (Worm Castings) from Worms
Adverse Effects on Crops
Economic Viability

7. VERMICOMPOST HIGH-GRADE FERTILIZER

Crucial to Organic Agriculture
Wide-spread use in the Tropics and Sub-Tropics
Flexible Method
Rapid Conversion
What Exactly is Vermicompost?
Characteristics
Conversion Processes
Plant Nutritionists - Encouragement of Soil Fertility
Soil Conditioning and Plant Strengthening Effect

Minimisation of Solid Waste with Low Toxicity and Containing Heavy Metals

Which Species of Earthworms?

Eisenia Fetida - Hard Workers

Transformation of the Organic Material:

Reproduction

Under Perfect Conditions

Further Uses

Feed

Source Material for the Fodder

Nutritional Balance in Feed

Feeding Process

Various Worm Composting Methods

Size of the Worm Compost Heap

Climate

Construction of a Worm Farm

Harvesting the Vermicompost

Storage of Vermicompost

Spreading the Vermicompost

The Liquid Variety: Vermiwash

A Method to Prepare Vermiwash

Application of Vermiwash

Management

Great Potential for Large and Small Organic Farms alike

8. VERMICULTURE AND VERMITECH

How to Start Vermiculture

Preparation of Vermibeds

Setting Up of a Vermiwash Unit

An Enterprise

Economics of Vermitech (In Indian Rupees)

Construction and Maintenance of a Twin Unit System Marketing

9. VERMICOMPOSTING MATERIALS

Animal Dung

Agricultural Waste

Forestry Wastes

City leaf Litter

Waste Paper and Cotton Cloth etc.

City Refuge

Biogas Slurry

Industrial Wastes

Feeding Vermicomposting Materials
What should not be Fed to Earthworms?
How much Earthworm Eat
How to Feed Earthworm?
Vermicomposting : Types
Small Scale or Indoor Vermicomposting
Large Scale or Outdoor Vermicomposting
In-situ Culturing of Earthworms
Simple Promotion of Vermic Activity in Fields
Development of Eathworms in Gardens and Orchards Large Scale
Commercialized Vermicomposting in Open Heaps
Vermicomposting : Requirements
Environmental Requirements
Air (Aeration)
Moisture Content
Temperature
How to Construct a Worm Bin
Bedding Materials
Other Requirements
Container
Containers : Types
Small Barrel or Drum Composter
Large Barrel or Drum Composter
Three-chambered Bin
Making of three-chambered bin
Bedding Material
Ideal Conditions for Life of Earthworms
Food for Worms
Adding Food Waste
Proper Ingredient Mixture
Browns

Other Factor Affecting Earthworm's Growth
Eathworm and Insects
Tilling and Earthworm Population
Earthworm and come Drounding
Maintaining the Bin
Harvesting the Compost and Worms

10. EXPERIMENTS FROM THE FIELD 151

Earthworms: Their Effect on Plant Growth

Growing Vegetables

Are Earthworms Alone?

Effect on Soil Quality

Soil Loss

Adverse Effects on Crops

Impact of Chemicals on Earthworms

Impact of Heavy Metals

Earthworms in Food Chains

Earthworm Parasites

11. EARTHWORMS : THEIR APPLICATION IN ORGANIC AGRICULTURE 166

Organic Method Under Rainfed Conditions

I. Cultivation of Groundnut (per acre) (All costs in Indian ruppees)

Cost of Field Preparation

Net Profit From Both Types of Cultivation (Per Acre)

II. Cultivation of Brinjal (Per Acre)

Net Profits from both Types of Cultivation (Per Acre)

III. Cultivation of Okra (Per Acre)

Net Profit from Cultivation

IV. Cultivation of Paddy

V. Cultivation of Sugarcane

12. WAYS TO MAKE COMPOST

Selection of Suitable Species

Epiges (*Eisenia Foetida*)

Endoges (*Eudrilus Eugeniae*)

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
