Description

Herbs can be used for beauty in original or compound form. They act against the internal impurities and external toxins of our body, add additional nutrients to it, make it glow and shine. Herbs provide natural, flawless treatment to our skin; nourish it from within, leading to its internal development. It combines the skills of specialists in chemistry, physics, biology, medicine and herbs. These are less likely to cause any damaging effect to health. These days a number of products that are using the herbal formulae have got lot of attention and have been witnessing a huge rise in demand not only nationally but on international arena. Bath and beauty products use herbs for both their scents and therapeutic qualities. Herbal products are replacing the synthetics products because of its harsh nature. Herbal products are in huge demand in the developed world for health care for the reason that they are efficient, safe and have lesser side effects. The formulations based on herbs are safe and effective. Drugs obtained from plant origin occupy important position in different pharmacopoeias. Products from natural sources are an integral part of human health care system because of major concern about synthetic drugs and their side effects and toxicity. The demand of herbal cosmetic products is high soaring in the world today. India has always been a rich producer of herbal products. The natural resources in the country are in abundance and have been a major source for the booming industry of herbal and cosmetic products.

Some of the basic fundamentals of the book are herbal body care, herbal combinations for the bath, herbal perfumes, herbal perfumes flower based rose, herbal perfumes (special type), herbal toilet waters, lavender water, amber lavender, herbal toilet preparations, herbal skin care products, herbal treatments, herbal medicines, analysis of medicinal plants, manufacturers of standardized herbal extracts, phytochemicals and essential oils in India etc. This book contains the formula and manufacturing processes of herbal products.

An attempt to blend ancient and modern science as well as art could be fruitful and such attempts must be carried out on sound scientific basis. The book is very resourceful for research scholars, technocrats, institutional libraries and entrepreneurs who want to enter into the field of manufacturing herbal beauty products.
