The Complete Technology Book on Synthetic Resins with Formulae & Processes

Code	NI151
Format	paperback
Indian Price	₹1150
US Price	\$125
Pages	512
ISBN	818662399X
Publisher	National Institute of Industrial Research

Description

Synthetic resin is typically manufactured using a chemical polymerization process. This process then results in the creation of polymers that are more stable and homogeneous than naturally occurring resin. Since they are more stable and are cheaper, various forms of synthetic resin are used in a variety of products such as plastics, paints, varnishes, and textiles. There are various kinds of synthetic resins; silicones resins, polyvinyl pyrrolidone, gum arabic, epoxy resins, guar gum, carrageenan, carboxymethyl cellulose, etc. Resins are polymeric compound which are available in nature and are also manufactured by synthetic routes. Some resins are also manufactured by partial modification of natural precursor polymer by chemical. Silicones are unique among the commercially important polymers both in chemistry and in variety of industrial applications. Silicones can be applied as high temperature insulating varnishes, impregnates to be used with glass, asbestos, mica products and encapsulating agents for electrical components. Water borne dispersions or emulsions, for example emulsions of vinyl or acrylic copolymers are popular in decorative coatings. The applications of synthetic resins are seen in some important industries like paint industry, adhesive industry, the textile industry, paper, paint, agricultural industry, petroleum industry etc. As it can be seen that there is an enormous scope of application of resins hence it is one of the major field to venture.

Some of the fundamentals of the book are electrodepositable pigmented coating compositions based on alkyd resins, phosphorus containing allyl resins, vapour permeation cure technology, characterization of water soluble anodic electrodepositive pigmented coating compositions, protection of concrete substrates, zinc rich coatings, electro deposition primers, developments in thermosetting powder coatings, application of powder coatings, polyethylene glycol, petroleum recovery and processing, industries using polyethylene glycols, silicones resins, preparation & formulation of silicone resin based coatings, pigments and dyes etc.

Synthetic Resins are used by lot of industries. Yet, little emphasis has been placed on the comparative value on functionality of polymeric material as a class. These resins have been classified in separate categories, usually in terms of their Chemistry, sources or end uses. The present book contains formulae, processes and other valuable details for various synthetic resins. This is very useful book for those concerned with development, consultants, research scholars, new entrepreneurs existing units, institutional libraries etc.

Content

1. PHOSPHORUS CONTAINING ALLYL RESINS

Properties of Monomers

Polymerization

Applications

2. ELECTRODEPOSITABLE PIGMENTED COATING COMPOSITIONS BASED ON ALKYD RESINS

Introduction

Experimental

Materials

Synthesis of water soluble alkyd resin from phthalic anhydride and maleic anhydride (A1).

Synthesis of water soluble alkyd resin from phthalic anhydride and trimellitic anhydride (A2).

Synthesis of water soluble alkyd resin from phthalic anhydride and maleopimaric acid (A3).

Synthesis of water soluble alkyd resin from maleopimaric acid (A4).

Synthesis of water soluble methylated melamine formaldehyde resin.

Preparation of water soluble anodic electrodepositive pigmented coating compositions.

Characterisation of water soluble alkyd resins

Characterisation of water soluble anodic electrodepositive pigmented coating compositions.

Optimisation of anodic electrodepositive parameters

Testing and evaluation of anodic electrodepositive pigmented coating compositions

Results and Discussions

Solvent (MTO) Resistance

Protection Against Corrosion

3. VAPOUR PERMEATION CURE TECHNOLOGY

Introduction

Vapour Permeation Cure (VPC)

Primary Advantages of VPC Coating

Disadvantages

Limitations

Vapour Injection Cure (VIC) Process

Chemical Composition

Reaction and Mechanism

Advantages of VIC

Conclusion

4. PROTECTION OF CONCRETE SUBSTRATES

Differences Between Concrete and Metallic Substrates

Constructions Influence

Coatings Used on Concrete
Organic coatings Thin film
Modified Epoxies
Furans
Chlorinated Rubbers
Waterborne Coatings
Vinyl Esters
Other Coatings
Organic Coatings Thick Film
Elastomeric Coatings
Polyurethane Coatings
Synthetic Rubber (Elastomers)
Resin Rich System
Polymer Concretes
Plastic Liners
Brick or Tile and Mortar Systems
Machinery Setting Grouts
Inorganic Coatings
New Versus Aged or Deteriorated Substrates

6. ELECTRO DEPOSITION PRIMERS

Electrodeposition Primers
Mechanism of Electrodeposition
Electro osmosis

Advantages of Electrodeposition
Types of Electrodeposition Primers
Shift to Cathodic E.D. Primer
Cathodic Electrodeposition Paint
Comparison of AED and CED
Properties of Dry Film
Latest Development in C.E.D.
Comparative Features of Different Types of CED

About Niir

NIIR Project Consultancy Services (NPCS) is a reliable name in the industrial world for offering integrated technical consultancy services. Its various services are: Pre-feasibility study, New Project Identification, Project Feasibility and Market Study, Identification of Profitable Industrial Project Opportunities, Preparation of Project Profiles and Pre-Investment and Pre-Feasibility Studies, Market Surveys and Studies, Preparation of Techno-Economic Feasibility Reports, Identification and Selection of Plant and Machinery, Manufacturing Process and/or Equipment required, General Guidance, Technical and Commercial Counseling for setting up new industrial projects and industry. NPCS also publishes various technology books, directories, databases, detailed project reports, market survey reports on various industries and profit making business. Besides being used by manufacturers, industrialists, and entrepreneurs, our publications are also used by Indian and overseas professionals including project engineers, information services bureaus, consultants and consultancy firms as one of the inputs in their research.
